It takes money to run the government, and that should be obtained by a tariff levied where it will give the most protection and be the least hurdensome to the poor. There is not a parallel case in history of any government with an overflowing treasury, taxing its subjects heavily for the necessaries of life. The census of 1880 gave the estimated value of all the farms in the United States at ten billions of dollars and there are three and one third billions of mortgages on them -one billion more than our national debt was at the close of the war, and yet after twenty-five years of peace and great republican prosperity, with a high tariff and undisputed rule, the debt is only about half paid, and instead of those farm cancers being canceled, they are gradually increasing. Statistics show us that in 1853 the farmers owned 55 per cent. of the wealth of the country; in 1860, 66 per cent. Then is when our tariff commenced robbing them and paying over to the favored class, for whose special benefit the law was made. In 1870 they owned 35 per cent; in 1880, 27 per cent, and now less than one-fourth of the wealth of the nation, and to use your own words, this farmer is the chap you are after, and every effort of yours proves it to be correct. Every contemptable humbug in existence is after the farmer. First, but not least is the mortgage banks, and then comes the grain merchants, stock dealers, morchants, machine manufectories transportation companies, all the hungry world and on down the list to the little pill maker; all after the farmer with no protection, only in case of a crop failure, when he has to import wheat and potatoes he has to pay 20 cents tariff on the first and 15 cents per bushel on the latter. That is a little pill maker; all after the farmer fair sample of your much boasted republican tariff protection for the farmer. But the farmer is, supposed to keep a back seat and swallow the republican dose like a little man, without a murmer, sanction Hayes' steal of the presidency, New Orleans and New York custom house frauds, credit Mobilier, China Harrison, free whisky and tobacco, and this is what makes your whangdoodle mourn for your first born and draw pen pictures of castles in the air. If I purchase one hundred dollar's worth of dry goods for my family I pay on them \$45 tariff taxes, but the av-erage is put at 47, and for many years we have been paying this fancy price.
