Cabbages.

This useful and common vegetable can be easily grown and easily kept through the winter. Not long since a carload of cabbage went through this OATS-Milling, 38@40c.; feed, 44 valley and on up the Columbia, on its way to Butte, in Montana. It is possible that other carloads have gone since then and have gone often this spring. The question that comes home to producers here is: Why do miners in Montana have to depend on California for their supply of cabbage? and why do the people of this valley eat California cabbage this spring? BUTTER-Fancy roll, per pound. These questions show that something 25c.; pickled, 25@30c.; inferior is wrong in the producing capacity of grade, 15@20c. It is to be hoped that the present year will see cabbage enough planted to supply Montana from Oregon as well as to supply our VEGETABLES- Beets, per sack, own home market.

Probably the day will come when sugar can be profitably made from sorghum wherever sorghum thrives; but that day is yet some distance in and his right arm broken. the future.

It appears that there is about as much difference in maple sap from copied since the first of April last. different trees, as there is in the milk from different cows. This difference tion, exposure, strength, time of season and other causes.

In California the raisin pack of 1887 the good quality of former years is tully maintained. The demand in the East increases every year, and the unfavorable season in Spain proves to be advantageous to the California grower.

A New York paper says: If Western dealers would realize that it is utter folly to send stale or even rotten eggs to this market the country would be better off. Good fresh eggs are in demand. Stale ones are not wanted. When ever they come here they cause trouble, disappointment and protanity.

An authority on dairying says: A deep cut in the palm. healthy milch cow, in full flow of milk, will drink and requires sixty to one hundred pounds of water per diem. It is utterly impossible to get one to take one-half or even one quarter of edged, per M, \$12 00; T. and G. this amount of ice-water, nor will they sheathing, per M, \$13 00; No. 2 floor- drink the ice-water or cold water with any regularity.

America is far ahead of Europe in many things, but in the matter af forestry in all its branches this country is 100 years behind them. The Russian city of Kazan is said to have a better collection of American trees than can be found in any one city in the United States. We have far more Missouri as slave of Capt. Sharp, in natural forests than exist in Europe. 1844, and settled in Polk county, was
