The collapse of the "Bunch Grass Blade" and the advent of a new journal entitled the "Lexington Budget" at Lexington, Morrow county, has taken place, recently. The founders of the "Budget" are practical printers and newspaper men, well known and energetic, and will no doubt make a success of it.

The North Powder Amateur Theatrical troupe will give their first entertainment, a drama entitled "Above the Clouds," at Spencer's hall on Tuesday evening under the management of Mr. Beale of La Grande. The play is first-class and should draw a crowded house. The proceeds will be donated to the Baptist church fund and as the troupe are so liberal the people should manifest as much interest as to greet them with a crowded house, thereby not only encouraging home talent but aiding with their dimes the church organization in completing their new edifice soon to be erected in this place.

The lumber flume now being constructed for Messrs. Kellogg, Punch & Co. is 8 inches at the bottom, 30 inches at the top, and 16 inches in depth and will be about seven miles in length, terminating on their land one mile up the river. The water will be supplied by the mill race, after being utilized by the mill. The right of way has been secured and the flume will be completed and in operation probably within the next two months. The company expects to save the cost of construction, right of way, etc., within twelve months, in the way of transportation as price paid at present amounts to \$2.50 per thousand feet.

### SHIPPING CATTLE.

The Sound Markets Supplied With Beef Shipped Through Portland.

The number of cattle shipped through this city this season for the Sound markets has been surprisingly large. There has hardly been a day but at least three or four car loads of cattle have been sent over the Tacoma road, and the average has been at least four.

About thirty beef cattle can be put in an ordinary cattle car, hence the average daily shipments would be 120.

A train of thirteen cattle cars was standing in the yard in the north end this morning, awaiting shipment, but though it seemed to astonish strangers when told that this number was not unusually large, the employees about the yards and depots did not appear very much surprised, because they frequently have to handle as many as eighteen car loads of cattle in one shipment.

These cattle come from all parts of the country. Some of them from Eastern Oregon, but of late the greater part of them come from the southern and the southeastern portion of the State. In this connection it might be interesting to note that the Siuslaw region in Southwestern Oregon is rapidly coming into prominence as a cattle-growing section. A great deal of that country is exceedingly swampy and can produce nothing except grass and hay, and can hardly be put to any other use than for producing cattle.—Portland Exchange.

### A WARNING.

The modes of death's approach are various, and statistics show conclusively that more people die from diseases of the throat and lungs than any other. It is probable that everyone without exception, receives vast numbers of tubercle germs into the system and where these germs fall upon suitable soil they start into life and develop, at first slowly and is shown by a slight tickling sensation in the throat and if allowed to continue their ravages they extend to the lungs producing consumption and to the head, causing catarrh. Now all this is dangerous and if allowed to proceed will in time cause death. At the onset you must act without promptness; allowing a cold to go without attention is dangerous and may lose you your life. As soon as you feel that something is wrong with your throat, lungs or nostrils, obtain a bottle of Boech's German Syrup. It will give you immediate relief.

Don't fail to see the Knight of the yard stick saw and wheel away the cord of wood, Thursday next week. The gentleman of soft hands has the sympathy of a large list of mourners. It is safe to say he will not back his judgment in such a rash way a second time.

I saluted another man's girl with a farewell kiss.—Lew. "As round as a ring without any end, so is my love for you my friend."—F. S. You can be clerk if you will promise to vote to suit us.—W. She bought of us a bottle of Dr. King's New Discovery for Consumption and was so much relieved on taking first dose that she slept all night and with one bottle has been miraculously cured. Her name is Mrs. Luther Lutz." Thus writes W. C. Hambley & Co., of Shelby, N. C. Get a free trial bottle at Wright's drug store, Union, Oregon.

### SANGER.

News of the Week In and Around the Sanger Mines.

The snow at this writing is six inches deep and still snowing.

Sanger can boast of having a very accommodating postmistress.

Henry Foster, the head sawyer, has gone to Snake river for a short time, on business.

A. N. Oliver, Supt. of the Sanger mines, is in Baker City at present attending to business for the company.

Mrs. Oliver, of Sanger, started, recently, on a visit to Maine where she will probably remain during the winter.

Mr. Rith, of Sanger, has been very sick for the past few days. Dr. Snow from Baker City was in attendance. Mr. Rith is slowly recovering.

W. J. Townly, the clerk, who has been absent, has returned to Sanger and is now very busy at the desk trying to catch up with his work.

Mr. Dunham Wright brought up a load of Big creek apples that he raised on his own ranch at Medical springs, and sold them readily for three cents per pound.

Mat Dean still brings beef to supply the camp. He reports things quiet on Powder river. Beef scarce and bad roads makes the beef business somewhat discouraging.

J. J. Bowman, one of the company's engineers, has taken a short lay off and gone to Powder river to attend to his general business affairs and will return on the coming Sunday.

Mr. Ed Turner is still in camp and is busy hauling the waste gravel from the mine and paving the road from the mines to the mill so the quartz can be hauled in all kinds of weather.

Mr. R. B. Bridges and family who have been residing on Goose creek in the Sanger mining district for the past spring and summer, will move to Indian creek in Grande Ronde valley where they will spend the winter.

The Lost Gulch mine, belonging to J. F. Weaver and R. B. Bridges, is situated in Lost Gulch in the Sanger mining district about one mile from the quartz mill. They are now down on the shaft 100 feet. One cross cut from the main shaft down the gulch 30 feet and one cross cut from the main shaft opposite 12 feet. The ore looks fine. The ledge of vein is from 15 inches to 30 inches in width. The rock is said to be very rich, averaging from \$100 to \$700 per ton. They are constantly taking out ore and storing it away and are preparing to build an arastra in the spring. Mr. Weaver is offering this mine for sale.
