The Assistant Secretary of the Interior Depatment Files His Report for the Fiscal Year.

Assistant Secretary Bussy, of the Interior Department, has filed his report for the fiscal year. The report reviews the work of the board of pension appeals. It shows that January 1, 1891. there were 5,028 appeals pending before the board, as against 5,030 July 1, 1891. Mr. Bussey points out several defects in pension legislation, and makes a number of recommendations looking to their correction. He asks that Congress be requested to enact a law that shall expressly authorize the department to treat all improper, illegal and excessive payments of pensions, whether caused by fraud or mistake, as payments to be charged against the current pension, with a view to readjust or equal the current pension payments within the discretion of the Secretary. He suggests that in case of insane, idiotic or otherwise helpless children of deceased pen- the world's supremacy. sioners, of pensionable age, the limit be abolished, so as to admit such children at any date to the pension roll. He also recommends that persons who served in the Confederate army and a terwards enlisted in the navy of the United States be given the same pension accorded those who served the Confederate cause and then enlisted in the army of the United States. Under the authority of the act of

Congress, approved September 28, 1890, the Director of the Mint has prepared a new design for silver coin, which has been approved by the Secretary of the Treasury. The design is intended for half dollars, quarters and dimes. On the obverse face of the coin is a female head representative of liberty looking to the right with an olive leaf and Phoenecian cap on the back of the head. On the band, or fillet, over the front of the bead is the word "Liberty," and over the head at the top of the coin, "In God We Trust." Around the medaliion are thirteen stars, and at the bottom the date of coinage. On the reverse side appears the seal of the United States, as adopted in 1782, an eagle with open wings. On the breast a shield argent, six pellets gules, a chief azure. In his dexter claw the eagle holds an olive branch, representing peace, and in the sinister claw a sheaf of thirteen arrows. representing war. In his beak the eagle holds a scroll containing "E Pluribus Unum," entwined above and about the head with thirteen stars, environed by clouds. This will be the design of halves and quarters. The dime on the obverse side, in place of the stars, will have "United States of America." "In God We Trust" will be omitted from the dime. The reverse of the dime will be the same as the present dime in use. The reverse of the half and quarter is a return to the design of almost the first spinage of the country.
