E. C. HOLDEN, Esq., Secretary Chamber Commerce, Astoria, Or.—Dear Sir. You were kind enough to favor me with a telegram extending to myself and guests the hospitality of Astoria. Unfortunately, owing to the disarrangement of our plans, your dispatch could not be definitely answered any cardiar.

As you have no doubt seen from the published programme, it was my fixed intention to take all my guests to Asteria; the but, owing to the extreme difficulty of moving five immense passenger trains over the just completed portion of the Northern Pacific main line west of the Northern Pacific main line west of the Recky mountains, so much time was lost in reaching this point with the party that we are reluctantly obliged to give up our excursion to your town. This is a great disappointment to me, but the time for the return of our guests being fixed it can not be helped.

Referring to the conference had with the committee of your chamber of com-

last, I am only now able to redeem the promise then made, that I would inform your chamber of commerce at the earliest possible moment, of the result of the surveys of the Astoria-Forest Grove line. I resulting the sweetest of tempers and faultiess need to sweetest of tempers and wrinkly place to the work at an earlier date. I resulting the sweetest of tempers and wrinkly place to the work at an earlier date. matter of absolute impossibility to complete the work at an earlier date. I regret to say that the estimates of the cost of the line in question, now before me, are so large that it will be impossible for the Oregon & Transcontinental company, as lessee of the Oregon & California Railroad company, to undertake its construction. According to the engineer's figures, the cost will be no less than an average of \$50,000 per mile in money, not including the probable cost of proper terminal facilities at Astoria—estimated at \$750,000. Under the existing mortgages we could not possibly issue more than the nominal amount of \$30,000 per mile in bonds on the line, and there are absolutely no means to meet the deficiency at the command of either company. We must, therefore, abandon the project.

I was surprised to learn, some time since, through the Portland newspapers, that responsible parties stand ready to build the line and turn it over, ready for operation in consideration of the land.
