is a genuine bargain sale. Come at once while the stock is  
full.  
**B. FORSTNER & CO.,**  
297 Commercial street, Salem, Oregon.

## Don't You Know

that you can secure al-  
most immediate relief  
from Indigestion, and  
that uncomfortable full-  
ness after meals, by sim-  
ply taking a dose of Sim-  
mons Liver Regulator?  
Some people think that  
because it is called Liver  
Regulator it has nothing  
to do with Indigestion  
and the like. It is the  
inaction of the Liver that  
causes Indigestion, and  
that fullness; also Con-  
stipation, and those Bil-  
ious Headaches. Millions  
have been made to under-  
stand this and have been  
cured from these troubles  
by Simmons Liver Regu-  
lator—a medicine unfa-  
ltering and purely vegetable.

From Rev. M. B. Wharton, Baltimore, Md.  
"It affords me pleasure to add my testi-  
mony to the great virtues of Simmons  
Liver Regulator. I have had experience  
with it, as occasion demanded, for many  
years, and regard it as the greatest medi-  
cine of the times. So good a medicine  
deserves universal commendation."

Impatient.  
Sainte-Beuve, the great French critic,  
having occasion to speak of what he  
thought impatience on the part of an em-  
inent theologian and ecclesiastic, brightens  
his discussion and enforces his lesson by  
telling a story of Alfred de Musset.

When the future poet was a small child  
his mother bought him a pair of bright red  
shoes. The maid put them on his feet and  
made ready to take him out to walk.  
Something delayed her for a minute, and  
little Alfred grew impatient.

"Harry! hurry!" said she, "I want to  
start. My shoes will be too old!"—Youth's  
Companion.

The Best Man.  
Helen, the great French critic,  
having occasion to speak of what he  
thought impatience on the part of an em-  
inent theologian and ecclesiastic, brightens  
his discussion and enforces his lesson by  
telling a story of Alfred de Musset.

## WOMAN AND HOME.

HINTS AS TO THE TRAINING OF  
NERVOUS CHILDREN.

The Mouth, Teeth and Breath—A Plea  
for Single Beds—Ancient Hints of Fare,  
The Baby Carriage—The Housekeeper,  
Children and Their Mothers.

In a paper on "Education in the Treat-  
ment of Nervous Girls," the author traced  
the value of cultivating a love of good  
books. "First should come the nursery  
books—'Mother Goose,' 'The Three  
Princes of Fortunatus,' etc., to be followed  
later by Grimm, Hans Andersen, 'Alice  
in Wonderland,' Howard Pyle's 'Wonder  
Cloak' and other equally fascinating  
books. About the age of eight the child can be  
led by the hand through parts of Shake-  
speare's plays. If twelve come Dickens,  
some of Thackeray and Cooper, all of  
Hawthorne, and the most interesting  
of the carefully guided child will be  
left free to tumble about in a library.

The paper later on advised the study of  
history which the child will find in-  
teresting. The most important study of all for a woman.  
It will be noticed that all the books recom-  
mended are of the kind which are stories  
of the imagination, which it would seem  
almost harmful to the easily excited na-  
ture of a nervous child, but this criticism  
is answered in the paper with the argu-  
ment that interest must be developed and  
a healthy imagination cultivated, which is  
possible only through the love of good  
books.

Some listeners to this paper afterward  
declared it informally, and one woman  
made the pertinent suggestion that the  
writers were often responsible for nervous girls  
through their constant stirring them up.

"I have seen mother," she said, "and  
her little daughter of four years of age  
perhaps to her side and deliberately go  
and read the paper to her. I know how  
much both mother and child need the air, but  
in our variable climate, with its easterly  
winds, it is not always safe to let the  
child be out in the open air. I have  
better let it at home until the weather has  
become settled. I often see babies in  
charge of children not large or strong  
enough to be out in the open air. I have  
a carriage with a jar that must affect the  
side of the child's head. I know how much  
both mother and child need the air, but  
in our variable climate, with its easterly  
winds, it is not always safe to let the  
child be out in the open air. I have

side of the child's head. I know how much  
both mother and child need the air, but  
in our variable climate, with its easterly  
winds, it is not always safe to let the  
child be out in the open air. I have  
better let it at home until the weather has  
become settled. I often see babies in  
charge of children not large or strong  
enough to be out in the open air. I have  
a carriage with a jar that must affect the  
side of the child's head. I know how much
