Hull. all interested in this new movement, for. as Professor Shaler rather quaintly puts prominent men of Salt Lake city are duties of the citizen and the social being gover for oppose, but may let it pass tinual sources of trouble and unhappioned the day after his death are most imperfectly done." Perhaps the best way to reconcile com-

the conception that every bad road exlabor or in wear or injury to the team. This imposition may be slight, but it is properly reckoned it will be found to way tax than the interest on the money needed for building a proper road and An Ashland paper says: Gen. E. L. keeping it in repair. Another point inent near Wilderville and paid Ashland of abandoning the old tendency of roadfriends a visit, looking after their wants | masters to take the straightest course and necessities and taking the sense of from one point to another, up hill and down, rather than choose a level but

Here also a simple calculation of the extra strain on the horses, the extra wear on the vehicle and the increased avoided. Still another important mat-Then a common fault in American roads s that of making them too wide, with the result of having a fringe of arable land going to waste in weeds, and too broad a road to maintain properly. But in this matter the length of axles common in any region must be considered. Professor Shaler thinks that farm vehicles in most parts of this country are

ow tending toward shorter axles. Much of the trouble with American roads is ascribed to the absurd narrowness of the tire on wagon wheels, a relic of the days of high priced iron. The parrow rim is very hard on the average road when heavy loads are carried. But ccepting this peculiarity of the tires, a undamental rule in road construction ould be to keep the substances which form the bed firmly in place. This need shown by the shearing train on a road loored with gravel. In cities blocks of the country districts, on account of the ost, and the best ordinary substitute for e country is angular bits of stone, so ne country is angular bits of stone, so riven together on the macadam princiole that they will not be moved by the

ressure of the wheels. ence scientific school of Harvard uniersity considers this subject of a nucl mportance that it has engaged tructor for teaching exclusively the art f road construction. It is thought that good results would follow from similar ttention to the subject in the leading ngineering schools of the country. Inbe attracting attention. The department concludes that one method of developing the Indian reservations will be to open good roads on them, so as to help the red men who are trying to be farmers. If half the study and energy that have been devoted to the develop ment of American railroads are applied to the improvement of the country high ways, there will be a wonderful trans formation in the latter before the end of this century.-New York Sun.

The Country Road. The pathway of life may be narrow and steep, But the road through the country is steeper. The pitfalls and snares that best us are deep, But the mud that surrounds us is deeper.

There are fence rails for bridges and mudhole for drains,
And hard heads and bowlders for gravel,
And broken down buggies on hillsides a Give warnings, like ghosts, as we travel.

Lank horses, by work and abuse broken down, Gaze at us from roadside and stable. Young men reaching wistfully out toward the Or seeking its portals when able.

Deserted farmhouses, the fences decayed, And the breezes through weed patches blowing.
Where once happy children rejoiced as they
played
Hide and seek when the field corn was grow-

What joy for the youth, as his longings expand, In a life so restricted and narrow; His prospect, 'mid all opportunities grand, But to follow the plow and the harrow.
