Some War Reminiscences. Last week we spoke of visiting Cumberland Gap to see a fellow Confederate officer in 1862.

When we were in the line of entrenchments and through the camps of the several regiments constituting the garrison.

A federal army was not far away on the Kentucky side and a battle was probable at any time.

It was so reported to the commander and we were invited up to headquarters for an interview of the subject.

The general said he recognized as genuine the adjutant general's signature on our photograph and was personally satisfied that we were all right.

We were all right but added that the soldiers were so sure of our being a federal spy that it would probably be a bad idea for us to remain around headquarters until our friend came in.

and again took us for a spy. About 10 o'clock that night we were awakened by an officer and several soldiers coming into the room with a lighted candle.

We at once supposed the reason of their presence, and recognized the officer as Capt. Rufus Bearden, of Knoxville.

He felt ashamed and pretended that they were hunting some place to sleep and had got into the wrong room.

When we went to his camp next morning he said that never in life had he been so badly sold, his soldiers feeling sure that they were capturing a Yankee officer.

We really enjoyed those and many similar episodes while soldiering.

The president has decided to appoint territorial officers from within the territories. The general public have always looked upon that as the proper thing, but heretofore too many outside political friends or helpers had to be thus provided for.
