Rev. J. R. N. Bell gave a lecture on his trip to the east last Tuesday evening and the Independence junior band made their first debut. Messrs. H. M. Patterson, L. C. Gilmore, H. L. Lines and Ed Owens went out to the mountains, last Wednesday on a fishing and hunting expedition. To investigate the very extraordinary cure and place before the people of our years ago, became stricken with the dread disease, locomotor ataxia—a disease attacking the nerves and rendering that portion of the system attacked perfectly helpless, proclaimed by physicians to be incurable—which left him from the waist downwards without feeling and utterly unable to move his lower limbs. All he was able to do was to raise himself by the aid of sticks and crutches and drag himself around the house, and occasionally to the corner of the street on fine days. His legs were without feeling, pins and even knives were stuck into them without the sick man taking any notice of the pain. He could take a walking stick and beat his legs until the blows resounded through the house and yet he felt nothing. During all these years of torture Mr. Marshall consulted every doctor of ability in the city; tried every form of treatment and took almost every kind of patent medicine, but without receiving one tithe of relief. The agony was frequent, so intense that he was obliged to take morphine pills in order to receive a reasonable amount of sleep.

As the months and years passed by, although the doctors continued to treat him in various ways, they plainly told the suffering man that he could not get better, the disease was set down in the works of specialists incurable. The doomed man was a member of the United Empire Council, No. 129, Royal Temple of Temperance, and about four years ago he was first taken seriously ill and his case was brought before the order. The provision under which the total disability claim is paid in our organization are very strict. The weekly sick benefit is payable to any one under the doctor's care, who is unable to follow their usual avocation, but the total disability is comparatively rare, and is only paid to those who are disabled for life, and declared by medical men to be entirely past all hope of recovery. In Mr. Marshall's case there was some difficulty, it is true; he was examined upon a number of occasions, covering a period of upward of two years. The medical men who examined him all agreed that there was little

hope of his recovery, but they would not give the definite declaration that our law demands—that the claimant was permanently and totally disabled—until last November. When this declaration by two regular physicians was made and our Dominion Medical referees, we paid Mr. Marshall all the total disability benefit of the thousands of dollars. He was paid by a check on the Bank of Montreal. There is no doubt whatever about the remarkable character of Mr. Marshall's cure. A large number of our members in this city were intimately acquainted with Mr. Marshall and called upon him frequently. All were unanimous in the belief that he was past all hope of recovery. His cure is looked upon as a miracle. I have conversed with him a number of times about it, and he gives the whole credit to Dr. Williams' Pink Pills and the application of cold water which is recommended as a subsidiary treatment by the proprietors of the medicine. He drops into my office every day or two and is apparently enjoying good health.

The general officers of the order are in the old Bank of Upper Canada building, just opposite the publishing house. Mr. J. H. Land, the Dominion Secretary, was easily found, and in response to the questions asked simply corroborated all that the general manager had said. Mr. Land is a neighbor of Mr. Marshall, living within a block of him in the northwestern part of the city. He was well acquainted with him for years before he was taken sick, and pronounced his recovery as one of the most remarkable things in all his experience. "I had not much faith in patent nostrums," said Mr. Land, "but Mr. Marshall's case proves beyond a doubt that Dr. Williams' Pink Pills are a wonderful medicine. He seems to be exhausted after all other means and methods of treatment during his long illness and all without any benefit, but his recovery was rapid and wonderful immediately after he commenced using Dr. Williams' Pink Pills."

Inquiries among the city druggists disclosed the fact that an extraordinary demand had arisen for Dr. Williams' Pink Pills, and that the claims made for them by the proprietors are borne out by numerous cures. John A. Barr, a well-known and popular dispenser of drugs here, told the reporter that he knew of no patient who had had such a demand upon him, or one that had done all that was promised for it. He told of several cases of great relief and cure that had come under his notice. Mr. William Webster, after suffering from staxty from many years, from the first had found certain relief from taking the pills, and he is now a new man. Mr. George Lee, after years of illness of a similar nature, had taken the pills, and was able to walk out greatly improved in health. Another case, Mr. Barr vouched for a city patient, who had been cured by the pills of the effect of the disease. Dr. Williams' Pink Pills are not a patent medicine in the sense in which that term is usually understood, but are a scientific preparation successfully used in general practice for many years before being offered to the public generally. They contain in a condensed form all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an infallible specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of la grippe, palpitation of the heart, pale and sallow complexion, that tired feeling resulting from nervous prostration; all diseases depending upon vitiated humors in the blood, and all chronic erysipelas, etc. They are also a specific for troubles peculiar to females, such as suppressed menstruation, and all forms of weakness. They build up the blood and restore the glow of health to pale and sallow cheeks. In the case of men they effect a radical cure in all cases arising from mental worry, overwork or excess of whatever nature.

On further inquiry the writer found that these pills are manufactured by the Dr. Williams' Medicine Company, Schenectady, N. Y., and Brockville, Ontario, and are sold in boxes (never in loose form by the dozen or hundred) at 50 cents a box, or six boxes for \$2.50 and may be had of all druggists or direct by mail from Dr. Williams' Medicine Company, from either address. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.
