

What Causes Pimples?

Clipping of the pores or mouths of the sebaceous glands with excess or oily matter.

The plug of matter in the center of the pore is called a blackhead, gray, or comedo.

When the plug is not allowed to discharge of the pore it becomes long, bent, and inflamed, and the matter which is in it is called a whitehead, or pustule.

When the plug comes out and the pore is once more free, the plug comes out and the pore is once more free.

There is no treatment of these pimples on the face, nose, or any other place which is liable to become clogged by sebum or oil.

What Cures Pimples?

The only reliable preventive and cure, when due to a constitutional humor, is

Cuticura Soap.

It contains a mild proportion of CUTICURA, the great Skin Cure, which enables it to dissolve the poisonous or oily matter as it forms at the mouth of the pore.

It stimulates the sluggish glands and tubules to healthy activity, reduces inflammation, soothes and heals irritated and roughened surfaces and restores the skin to its original purity.

This is the secret of its wonderful success.

For bad complexion, red, rough hands and chapped lips, dry, thin, falling hair, scaly and irritated scalp and simple hairy blemishes it is wonderful.

It is preserving, purifying and beautifying to a degree hitherto unknown among remedies for the skin and complexion.

Sale greater than the combined sales of all other skin and complexion soaps.

Trade throughout the world.

PUTER DUGG AND CHEM. CO., Sole Proprietors, Boston.

Women full of pains, aches and weakness find comfort, strength and renewed vitality in Cuticura Plaster, the first and only pain-killing, nerve-strengthening plaster when all else fails.

Death cannot be cured by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, that is by constitutional remediation. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it becomes strictly closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous lining of the ear.

Women full of pains, aches and weakness find comfort, strength and renewed vitality in Cuticura Plaster, the first and only pain-killing, nerve-strengthening plaster when all else fails.

Put 6 ounces of raspberry jam to a quart of cream; pulp it through a lawn sieve; add to the juice of a lemon and a little sugar, and whisk it till thick. Serve it in a dish or glasses.

We will give One Hundred Dollars for any case of deafness (proved by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & Co., Toledo, O.

Sold by Druggists, 75c.

In California grapes are now worth only from \$6 to \$8 per ton.

Shiloh's Vitalizer is what you need for dyspepsia, torpid liver, yellow skin or kidney trouble. It is guaranteed to give you satisfaction. Price, 75 cents.

Honorable and working men or women are always welcomed into any organization.

Shiloh's Cure, the great cough and croup cure, is for sale at all druggists. Pocket size contains twenty-five doses, only 25 cents. Children love it.

The Multnomah county delinquent tax roll fills thirty-five columns in the Oregonian.

I was severely taken with dysentery. I took a dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy after each operation of the bowels, more than natural, for about thirty six hours and checked the complaint. It took about all of a small bottle to cure me, while two or three doses might cure an ordinary case. I found it would give me immediate relief from all pain in the bowels. T. M. BLACKWOOD, Friendship, Grant Par., La. For sale by druggists.

Nearly all persistent lawbreakers finally conclude from bitter experience that it don't pay.

I have been a great sufferer from catarrh for over ten years; had it very bad. I could not sleep and had to walk the floor. I purchased Ely's Cream Balm and am using it freely. It is working a cure surely. I have advised several friends to use it, and with happy results in every case. It is the medicine above all others for catarrh, and it is worth its weight in gold. I thank God I have found a remedy I can use with safety and that does all that is claimed for it. It is curing my deafness.—B. W. Sperry, Hartford, Conn.

There is enough iron in the blood of 48 men to make a 24 pound plowshare.

Syracuse, N. Y., Feb. 23, 1891.

My Dear Mr. FRYMAN: I am glad to hear that you want to please send a boy down to the hotel drug store next to the Cafe and have them send half a dozen boxes of Krause's Balm to my residence. I bought some while I was in Pittsburgh and found it wonderfully effective. I do not know how much they will cost, so would ask to have them sent C. O. D., care of the Colorado Hotel, Philadelphia. Hoping that I will have an early opportunity to return the favor, I remain,

Very truly,
BALLEY AVERY,
"McCaull,"
For sale by J. D. Bell, 804 agent.

The narrowest part of the Strait of Florida, through which the Gulf Stream flows at the rate of five miles an hour, is 50 miles wide, and has a mean depth of 350 fathoms. If this were stopped up the climate of this country in winter would be totally changed.

The perpetual advantage of an easy grade should be secured at the beginning. Straight lines are best and on line grades are cheapest; it is economy, however, to secure easy grades at the expense of straight lines, where such grade is otherwise obtainable, because the perpetual advantage to all users of the road more than offsets the disadvantage to the land owner from ill shaped fields.

Capelets middle blind drains in all roads will dry the soil in summer and minimize the damage by frost in winter. Side drains should never be omitted.

If natural soil of road be arched at center, its drainage will be easier.

All stones laid to disintegrate the road surface should be rejected.

Comparatively large cost is unavoidable. Cheaply made roads will prove the most expensive roads.

Two Australian girls have gained honors similar to those won by Miss Ramsey and Philippa Fawcett at Cambridge. Appropos of Australia, schoolmistresses in Victoria state schools can earn a possible \$1,500 for their yearly salary. There are many women journalists in Australia, some dozens of them acting as reporters in Sydney and Melbourne.

When a dozen of eggs will bring more than a pound of butter the poultryman can consider himself ahead of the dairyman. This will often be the case in the fall and winter.

Attention to the daily habits of the young prevents suffering. Take Simmon's Liver Regulator.

Mints For the Roadmaster.

Novelties in Silver and Glass.

Ice pails for champagne have the favorite broken raised edge and are loaded with two luxurious lines. Other ice pails have raised bands of ornaments on metal.

French shakers are in dull metal and with no ornamentation.

The latest glass ice receivers are leaf shaped in front and back.

The large round stout jars intended for rooms have large bits of carmelian and transparent quartz set in the covers.

Old fashioned low candlesticks with ex-tinguishers are seen.

Berry dishes of cut glass have silver handles.—Jewellers' Circular.

Frozen Cherries and Cherry Pancakes.

Sweeten a quart pitted cherries with the same measure of sugar and let them stand till the juice is drawn out. Stir them till the sugar dissolves, then add a quart of water.

Old fashioned low candlesticks with ex-tinguishers are seen.

Berry dishes of cut glass have silver handles.—Jewellers' Circular.

Blackberry Cordial.

Use only the ripest berries. To 2 quarts of fruit put a quart of whisky and let it ferment 12 hours in the system after straining through flannel. To every quart of liquor allow a quarter pound of loaf sugar, a half pound of blackberry ginger and half a lemon. Let it stand five days, then strain and bottle. Seal the corks.

Tomato Toast.

Cook two tiny onions with four large tomatoes. Let stand to settle for five minutes, then replace the juice in a generous half cupful of sweet cream. Add a bit of butter, pepper and salt. Pour white hot over golden brown slices of well buttered toast and serve without delay.

Raspberry Cream.

Put 6 ounces of raspberry jam to a quart of cream; pulp it through a lawn sieve; add to the juice of a lemon and a little sugar, and whisk it till thick. Serve it in a dish or glasses.

The Fountain Head of Strength.

When we recollect that the stomach is the grand laboratory in which food is transformed into the nutritions which furnish vigor to the system after entering and enriching the blood; that it is, in short, the fountain head of strength, it is essential to keep this important supplying machine in order, and to restore it to activity when it becomes inactive.

Some of the fashionable work designs of today have the entire cover of velvet, velveteen or pongee silk, with the worked square for the front laced on by a silk cord.

There is a heavy set present for colored linen worked in silk or fax thread and adapted as aprons, blouses and cushions, covers and work bags, sideboard and tea cloths. A blower worked with white roses and deep green leaves of sprays of white jasmine on orange linen; frames of a penicill of roses and a pair of white roses and deep green leaves of sprays of white jasmine on orange linen; frames of a penicill of roses and a pair of white roses and deep green leaves of sprays of white jasmine on orange linen.

A Homestead Refrigerator.

An ice chest constructed as an actual one of the few cents and which did good work. The ice chest is constructed as an actual one of the few cents and which did good work.

FRAME REST IN PLACE.

the bent from corner to corner a two inch plank, so that it will strike all five timbers, and if one plank is not long enough splice on another.

Fasten the diagonal plank in place, driving two spikes at every intersection of brace, post, cap and sill. It makes a better job to spike a second brace on the opposite end of the side of the box. At this point a light hand tackle would come in nicely, and if we are lucky enough to have one we can fasten it to the cap in the usual manner and "up" the bent, holding it from turning clear over by a guy line previously fastened to the cap and pulling in the opposite direction. If the tackle is wanting then a square lift with a lot of men and pickpoles as in olden times will enable us to do the work. As soon as the bent is up and we lay across the two inch plank for floor joists, spacing them two feet apart with one end resting on the shore and the other on the cap. As soon as this is done we lay crosswise of the joint a course of the two inch plank in hand for a floor, after which we can pass over the joint and floor from the center of the bridge to build the second half. This completes the bulk of our temporary bridge, but it is well to lay a line of square timber, or a pile of plank over the outside just at each side of the roadway to hold down the floor and act as a wheel guard, and we shall probably have to grade up the earth a little at both ends before teams can pass from the earth roadway on to the plank flooring of the bridge.

"New good digestion wait on appetite, and health on both."

To assure both the above ends, good, wholesome, palatable food is demanded. It is next to impossible to present a sufficient variety of appetizing bits of fare for our meals without a liberal allowance of pastry and other food in which shortening is required. How to make crisp, healthful, digestible pastry has puzzled the cooks. A difficulty in all good cooking in the past has been, larly, Always thick, never uniform, most unwholesome—lard has always been the basis of the work and the obstacle to "good digestion."

COTTOLENE

comes now into popular favor—better than even the best of lard with none of its objectionable qualities. And

For Over Fifty Years.

An old and well-tried remedy—Mrs. W. Wood's Suffering from indigestion, and the various ailments of the stomach, she tried many remedies, but all failed. She then tried Wood's Great Peppermint Cure, and in a few days she was cured. She writes: "I have used it in every part of the world, and it has cured me of all my ailments. It is a simple vegetable compound, and it forces the poison to the surface and eliminates it from the blood."

Keep everything about the poultry house clean, with plenty of fresh air and sunlight. Feed in a cleanly way with a good variety of food; and with early pullets and hens that have not early there will be little trouble in having a good supply of eggs.

Pimples, blotches, sores, and their cause, removed by Simmon's Liver Regulator.

As the weather gets cooler give the chickens a good feed of whole grain which will keep them from getting hungry and also help to keep them warm.

Affections of the bowels, so prevalent in children, cured by Simmon's Liver Regulator.

But one-third of the bodies examined by a New York company last year were natives of America. Half of the number were Germans.

A dose of Simmon's Liver Regulator, taken daily, will relieve and prevent indigestion.

For 200 years the paper from which Bank of England notes are made has been manufactured at Laverstock in Hampshire.

Belching at any time is due to indigestion—both are cured by Simmon's Liver Regulator.
