HOW TO CARE FOR SHOES

Economy In Numbers.

If you would have your shoes retain their pristine freshness longer than a week, do not treat them with polishes and dressings, each one of which claims to be the best and least injurious. As soon as you come in from a walk dust them carefully with a soft fiannel kept for that purpose. Let them air, as you do your underclothes, and when they are dry stuff them with soft tissue paper. Button or lace them over this. In this way they will keep their shape for a long time.

When they are so worn that they must be brightened, rub them with a flaunel cloth and a little vaseline. Apply the grease carefully, not merely smearing it over the surface of the leather, but rubbing it in. When it is completely absorbed, rub briskly with fresh flaunel.

The not wear your walking boots in Do not wear your walking boots in the house and do not walk in your slipthe house and do not walk in your slip-pers. Keep a pair of shoes suitable for each occasion. In this way, though you may seem to have an extravagant sup-ply, you will really be displaying an economical spirit. Shoes worn indoors and out not only soon lose their bright ness and neatness, but last only about one-third as long as if they were occa-sionally relieved.

THE HISTORIAN.

Pocahontas did not save the life of John Smith. It has been ascertained that this worthy man was the most ablebodied prevarientor of his century. The Bridge of Sighs at Venice has no ro-
