DEAR SIR:—Will you please be kind
enough to let me know who is your

the winter. Persons accustomed to the pure fresh air during the pleasant mouths are subject to this terrible an noyance at this time of the year. A boon is offered in Krause's Headache Macon, Ga.

For biliousness and headache Simmon's Liver Regulator is the best medi cine the world ever saw.—H. H. Jones, Macon, Ga. Capsules, which is guaranteed to cure any kind of a headache no matter what the cause. Headache caused by over-indulgence in food or drink late at is in the Himalayas, night, can be prevented by taking one capsule h-fore retiring and one in the "A snake in the grass" is all the more

To many people who have the taint of scrofula in their blood. The agonies caused by the dreadful rusning sores and other manifestations of this disease are beyond discription. There is no other remedy equal to Hood's Sarsaparilla for scrofula, salt rheum and every form of blood disease. It is reasonably sure to benefit all who give it a fair trial.

How to Kill Cats Humanely

nickest and easiest way is to m them. Cut the foot of a sock aloreform them. Cut the foot of a sock of and draw it over the cat's head until the toe is well overhernose. Pour about alf a teaspoonful of chloroform on the oe of the sock. This will frighten the at, but soon induces sleep, when more alloroform, enough to kill the animal, is

Bow to Cleanse Wall Paper.

First remove all the grease spots by placing folds of blotting paper over them and ironing with a moderately warm iron, after which brush all the dust from the paper and clean and brighten it with fuller's earth, mixed with water to form a hard paste. It must be hard enough to handle like bread dough. To clean the paper take a small lump of the clay, and commencing at the top of the room wips it lightly downward, about half a yard at each stroke, till the upper part of the paper is clean, then around again with the same sweeping stroke, always commencing just above the end of the stroke above. This carefully done will show no lines and renew the appearance show no lines and renew the appearance of your walls.

How Much the Tables of Stone Weighed. According to the Nedarim, these tables of Moses were 6 ells long, 6 broad and 3 thick, and must have weighed more than 28 tons, taking the estimate given in the Talmud. The Hebrew a'm'h' (cubit or ell), at its lowest estimate, is 18 inches, and each slab would be therefore 9 feet long, 9 feet wide and 4‡ feet thick.

Wet the face at night with a sponge tipped in benzine. This will remove the clackheads that collect on the mouths of the sebaceous glands. Free friction with a towel lessens them, after which bathe the face with a lotion of corrosive subli-

GRATCHED TEN MONTHS. M. H. Wolff, Upper Marlboro, Md.

CALIFORNIA MIDWINTER DYERRA-TIONAL EXPOSITION.—DEPARTMENT OF PUBLICITY AND PROMOTION. [Wookly Circular Letter-No. 4]

F. H. TRUSDELL, Chief of Department. Five rainy days out of seven has been San Francisco, but it has made little or no difference in the progress of work on the buildings of the California Midwinter International Exposition. In the Mechanical Arts building, where the soof was all in place, the work of inte-for decoration was pushed forward without the slightest hindrance, and un-der the half-finished roof of the Manu-factures and Laboral Arts building a times when it rained too hard to pro-ceed with the construction of the roof itself. In the Horticultural and Agricultural building and in the Art building the rain has caused practically no delay whatever, and the carpenters on the Administration building have made just as much architectural hay as if the sun had been shining all the while.

As far as the concessional work is con-cerned, there has been no time lost at all, and it would have to rain pitchforks and sawlogs, literally, to keep these people from pushing forward with their plans, for if they are not in readiness when the Exposition opens on Jan. 1, they will be just so much out of pocket, they will be just so much out of pocket, as it is the clink of the coin that they are looking forward to, and the Exposition management is in no greater hurry to get this part of the coming show in to get this part of the coming show in

cago, and who were in different ways connected with the Columbian Expesition, are continually coming to town; the hotels are filling up; boarding-house keepers are clothed in expansive smiles; the tradespeople all over town are be-ginning to feel the effect of the coming Exposition, and the Exposition fund is feeling a corresponding effect as the tradespeople awake to the fact that the bigger the Exposition is the bigger will be their trade during the period of its

In order to get ahead with the allotment of space in the different buildings, the Exposition management has found it necessary to fix an absolute limit for the reception of applications for space.

That date has been fixed at Dec. 1, so that the hid of the box, so to speak, may now be said to be shut. Enough appli-cations have been received to fill all the buildings comfortably. Some of them will be full to overflowing, but a readjustment of the classification may possibly be resorted to, se that there will not be a great deal of crowding.

There seems to have been a little mis-

derstanding among exhibitors on the

Pacific Coast in regard to the transportation of their exhibits to the Exposition, and it may be well to state in this connection that the transportation of such exhibits to and from the Fair will cost nothing at all. The regulation made by the Southern Pacific company is that shipments originating at stations on the Southern Pacific system west of and including Portland, Ogden, El Paso, Livingston—I didn't know that you Deming, Benson and Mojave, for ex-and Miss Featherspray were so well ac-hibitors at the Fair, shall be way-billed to San Francisco at regular rates consigned to the Exposition, in care of the exhibitor and the charges prepaid, and that after the Fair is over by presenting Nina—We are both sisters to the same a certificate from the officers of the Fair that the property has been on exhibition and has not changed hands, the first payment of freight to San Francisco will refunded and his property will be re-

turned to his home station free of In the same connection and in respons to numerous communications on the subject, the public is respectfully in-formed that the Southern Pacific com-pany has arranged for three classes of tickets in connection with the Exposi-tion, the rates of which are as follows: Class A—Half fare, or one-way rate for round trip with \$2.50 added, from all stations located over 800 miles from

San Francisco.
Class B—One and one-fifth fare for round trip, with \$2 added, from all stations located over 150 miles (not to exceed 300 miles from San Francisco). Class C—One and one-fifth fare for round trip, with \$1.50 added, from all stations located within 150 miles from

San Francisco. The minimum special rate will be \$1. Entrance ticket coupons to the Fair grounds will be sold with the railroad special tickets as follows: For Class A. special tickets as follows: For Class A, five gate coupons: for Class B, four gate coupons: for Class C, three gate coupons.

The Southern Pacific company has recently conceded a fifteen days' stopover privilege on tickets from the East, so Cross PAINFUL Menstruction that visitors to California will have been considered in the parts of the little time to spend in other parts of the state than in the immediate vicinity of the land of the l San Francisco. Other railroads are doing their share in the matter of transportation. A \$65 round trip rate has already been established west of the Missouri river and the chance is good for a \$100 rate from New York and return, while the big cut already made by the Canadian Pacific may result in a better

rate all around. rate all around.

An arrangement has been made during the past week by Director General de Young with the firm who are manufacturing the bronze group of statuary which the late James Lick previded in his will should be erected in front of the New City Hall, that the heroic figure of California which is to surmount this group, shall be placed in the central space under the vaulted roof of the Manufacturers and Liberal Arts Building. This figure stands 18 feet in height and will rest upon a pedestal so that it will tower above everything else in that part of the Exposition. The figure represents Eureka, standing erect with a spear in her hand and a shield by her side, while at her feet is a grizzly bear, typical of

How to Treat Frosted Plants When plants are frosted, do not sprinsince you got your life insured you've kle them with cold water, but remove been awfulle afraid you'd get killed."— them at once to a cool, dark place where the temperature is just above freezing point. Gradually increase the tempera-ture either there or by bringing them by stages into warmer quarters, and the chances are that many of the plants will be saved. Keep them away from light and heat, and if the folinge is wilted after the frost is out of them cut it off.

How to Live Long and Rappy. Aside from the important and control-ling influences of inheritance, of diet and of temperate habits, the points to be learned from the few statistical data attainable are that longevity is promoted by a quiet, peaceful life in a retired and rural community, where there is freedom from nervous strain and worrying and excessively laborious toil. The business man, with increasing cares and responsibilities; the mill operative, toiling hard to keep together the souls and bodies of himself and his family; the politicians, the hardworking profession-al men, are not the chief contributors to
