1:30 p.m.

M. M. KELLY, R. E. WILLIAMS,
President, Cashier,
DALLAS CITY BANK
OF DALLAS, OREGON.
Transacts a general banking business in all its branches; buys and sells exchange on principal points in the United States; makes collections on all points in the Pacific Northwest; loans money and discounts paper at the best rates; allows interest on time deposits.

VISIT DR. JORDAN'S GREAT MUSEUM OF ANATOMY
101 MARKET ST., ASTORIA, OREGON.
The Largest Anatomical Museum in the World. Contains every conceivable dissection of the human body. Dr. Jordan—DISEASES OF MEN
SPECIALTIES: Thoroughly equipped with every modern instrument. Treatments given by an Expert. Made to order for Physicians, Surgeons and Students. Also for the general public. Call on Dr. Jordan at his office, 101 Market St., Astoria, Oreg.

F. H. MUSCOTT,
TRUCKMAN,
Dallas, Oregon

A fair share of patronage solicited and all orders promptly filled.

Dallas Foundry!
—ALL KINDS OF—
IRON WORK TO ORDER.
Repairing Promptly Done.
ED. BIDDLE, PROP.

How to Stew Breast of Veal.
Take about five pounds of breast of veal, trim it to shape and brown on both sides in a saucepan with a little butter or dripping. Add enough water or stock to half cover the meat, two carrots cut in slices, two turnips, a bunch of savory herbs, an onion and sufficient pepper and salt to season rather highly. Let all simmer very slowly for nearly two hours; then remove the meat to a hot platter, surround it with the vegetables, strain the gravy, remove the fat, thicken it and pour around it.

I GEVURTZ,
THE HOME FURNISHER,
Furniture, Carpets, Stoves
GREAT CARPET SALE.

Our buyers have just returned from the east, having purchased the largest and prettiest stock of carpets and linoleum ever brought to this coast. The colorings and patterns are the prettiest ever shown. These prices are for carpets cut, sewed, and lined with best padded paper. Save money and send us your order. Send us a deposit and we will ship you the goods subject to examination, and if satisfactory you can accept and pay for same.

Union Ingrains, extra heavy, 25 cents.
Wool ingrain, cotton chain, 40 cents.
All wool ingrain carpet, 50 cents.
Best grade all wool extra heavy ingrain, 65 cents.
Tapestry Brussels, 50c; Smith's Brussels, 60c.
Higgin's Brussels, 75c; Higgin's Best Brussels, 85c.
Saxony Axminster, \$1; Smith's Royal velvet, \$1.
Floor oil cloth, 20 cents.
Lace curtains, beautiful patterns, 35c, 75c, \$1, \$2, \$3 a pair.

E Grade linoleum, 6 feet wide, 40 cents.
D Grade linoleum, 12 feet wide, 60 cents.
Inlaid linoleum, \$145. I. GEVURTZ, The Home Furnisher, 173, 175 First, & 219, 221, 228 Yamhill St., Portland

J. PERRY CALDWELL
—DEALER IN—
VEHICLES AND AGRICULTURAL IMPLEMENTS.
Buggies, wagons, binders, mowers, rakes, garden cultivators, disc and spring harrows.
DALLAS, OREGON.

Thurston Lumber Company
THURSTON BROS., PROPRIETORS, DALLAS, OREGON.
—DEALERS IN ALL KINDS OF—
LUMBER
Both rough and dressed material on hand and orders of any size promptly filled.

A MINT OF MONEY.
IS NOT NECESSARY
When you trade with us for we believe in the Quick Sale Method of small profits. It is better to sell a large quantity than a small one. There is some satisfaction in doing business. If you know a value when you see it, you will admit that we have them. Cast your eye over the prices we quote opposite. Are they too high? We think not. Our competitors will tell you they are right. Everything we sell is sold right. Figure with us on your outfits.

Treasure	\$2.50
Others as low as	\$2

All wool carpet.....50c
Union carpet.....30c
Window shades.....75c
Lace curtains.....75c
Satin Russia couch.....\$4
Parlor set, five pieces.....\$20

Buren & Hamilton
HOUSE FURNISHERS
SALEM OREGON

UPPER SALT CREEK SAW MILL
MARTIN BROS., PROPRIETORS.
All kinds of rough and dressed lumber on hands or cut to order.
200,000 Feet in Stock.
Slab wood for cook stoves or harvest engines at 50 cents a load.

Summer Resorts.
To the mountains our people in increasing numbers yearly look for those days of relaxation and recreation necessary to maintain the human machine in fair working condition. The languorous sloth of the seashore proves very seductive while it lasts, but many have decided that the annual outing should provide not only radical change of air and surroundings, but also such stimulation of flagging energies as will provide brawn and vigor for the return to labor. For this they urge the mountain climb and ramble, the balms of the mountain pine and the clear unadulterated mountain air. In this direction the Shasta route now affords a wealth of attractions. The entire line of road from Ashland to Redding is studded with charming and accessible hotels and camps, where are cheer and comfort and healing at reasonable cost, where you can hunt, fish, ride, loaf, or play with equal facility. Or if you look for healing waters, none better can be found, hot or cold, than the springs at Ashland, Coltrin, Anderson, Bartlett, Byron and Paso Robles. Before visiting Europe, the people of the northwest should see the glories of Yosemite valley, and the wondrous groves of Mariposa and Calaveras; the Parkians are likely to make inquiries concerning these attractive resorts. Send to C. H. Markham, general passenger agent, Portland, for new booklets on Castle Crags, Shasta, springs, McCloud river, Yosemite and excursion rates thereto.

SELECTIONS
THE HARDY MICROBES.
Exposure to Liquid Air For Twenty Hours Fails to Kill Them.
The researches of Professor Dewar in liquid air are familiar to all who take an interest in the progress of scientific research at large. At a recent Royal Society meeting an interesting communication was made on behalf of Dr. A. Macfadyen and Mr. S. Rowland on the effect of the terribly low temperature of liquid air on bacteria. The aim of the investigation was that of ascertaining whether the germs could survive cold of a degree ranging from 183 degrees to 192 centigrade.

It is of course known that many species of microbes can survive being packed in ice, and even higher organisms flourish in the arctic circle. Indeed, the extremes of temperature for low forms of life are widely separated, and so it becomes a matter of very practical public interest, as I shall show, to determine what are the limits of vitality in this respect. The very low temperature of liquid air offered a supreme chance to see how microbes comport themselves under exposure thereto, and so our investigators seized on the opportunity presented them.

Exposed for 20 hours in the liquid air temperature, no injury was apparently sustained by the microbes. But in the recent experiments such germs as those of typhoid fever, diphtheria, anthrax, cholera and other ailments, along with nondescript producing species, were submitted to the liquid air test for seven days. In addition to the extremely low temperature, I must add, the microbes in this experiment were subjected to a tremendous mechanical strain.

Then came the question of the effects of both conditions on the vitality of the germs. These results may be summed up in the word "kill." Under the microscope they showed no signs of mechanical injury or distortion, and they were as lively—if that term may be applied to denote a condition of vitality—as they were previous to their chilling and cooling experiences.

I have referred to the public interest which attaches to these investigations. To know the limits of germ life is an essential item in the knowledge of the sanitarian when he undertakes to show how infectious diseases caused by microbe action can be destroyed and prevented from attacking us.

It has long been known that we cannot trust to cold as a disinfecting and germ killing agency. Cold will check germ growth certainly, a fact we see illustrated by every cargo of Australian mutton that is landed at the docks, but it cannot destroy the microscopic living things that are responsible for inducing disease and for causing decomposition, putrefaction and a goodly number of other conditions.

FALLING
Does this illustrate your experience? And are you worried for your hair?
HAIR
are soon to be bald?
Then cease worrying, for help is at hand. You need something that will put new life into the hair bulbs.
You need a hair food, such as—
AYER'S HAIR VIGOR

It brings health to the hair, and the falling ceases. It always restores color to gray hair. You need not look at thirty as if you were fifty, for your gray hair may have again all the dark, rich color of youth.
\$1.00 a bottle. All druggists.

"I am a barber by trade and have had a great deal to do with your Hair Vigor. I have found that it will do everything that you claim for it. It has given me the most complete satisfaction in my business."
HENRY J. GONICK,
March 22, 1899, Kansas City, Mo.

Write the Doctor.
If you do not obtain all the benefits expected from the use of the Vigor, write the Doctor about it. Address, Dr. J. C. Ayer, Lowell, Mass.

A Long Job.
A Lepale composer named Kruger, who has just celebrated his fiftieth year of service, has been occupied with one book for nearly all that time. He has set with his own hand almost all of Grimm's great German dictionary that has appeared since Jakob Grimm turned in the first batch of manuscript in December, 1851. Though 32,000 pages of the Worterbuch have been printed, the first is not half done yet, and Herr Kruger will have to live to be 100 years old to see it finished.

Lighting Store Windows.
The lighting of store and shop windows by incandescent lamps is by no means a novelty, and yet it is the exception rather than the rule to see such work properly done. The lamps should always be concealed from the street side of the window, and the surrounding reflectors should be so placed that no shadows are cast on the goods in the window. A suffused glow of soft light is what should be striven for, and the best effect is accomplished the better will be the effect produced.

A Memorable Eclipse.
A curious historical parallel in connection with the recent total eclipse of the sun is the fact that on the same date, May 28, in the year B. C. 585, the most memorable eclipse in history took place. It was during the progress of a fierce battle between the Medes and Lydians. The light of the sun suddenly became darkened. The incident was taken by the contending armies as a warning from heaven, and hostilities ceased, resulting in an immediate peace.—Baltimore News.

A Strange Malady.
In hunting for a name for a strange new malady recently discovered in California the doctors coined the word "topsytyrtylopia." The case baffles explanation. Mary Terry, a 7-year-old daughter of a Portuguese rancher in the southern part of the state, was born with some defect of the optical structure which caused her to see everything reversed, precisely as mortals with normal vision see things in a mirror.

How to Make Orange Sauce.
Mix a tablespoonful of flour with a little cold water, add a teaspoonful of boiling water in which orange peel has been steeped, stir until the sauce is smooth, season to taste and pour into a small saucepan. Cook for five minutes, and while stirring add gradually half the juice with the grated peel of an orange. Beat the white of an egg to a very stiff froth, and just before serving add it to the sauce.

Grafting and Budding Trees.
The proper season for grafting or budding trees when the buds begin to open upon the stock to be grafted, but it is better that they should not have started on the scions, which is the reason for cutting the scions in winter and keeping them in a cool place until wanted to retard their growth. We have successfully set scions cut the same day, says The American Cultivator, but they were from trees not so far advanced as the stock, either by reason of being a later variety or growing in colder soil, but, as a rule, would have scions cut in winter, but when not frozen.

As so many trees have been injured by the weather the past winter, many may desire to graft seedling trees to set in place of those killed or to convert old trees of undesirable varieties into better sorts. They may be grafted at almost any age after 1 year old, and for young trees where the scion and the stock are nearly of the same size splice or whip grafting is the best method. After the stock is two inches through, and upon limbs of that size in old trees, cleft grafting is usually done. We have seen limbs much larger cleft into two or more sections, in taking pains, of course, to match the bark of the scion with that of the stock or branch in which it is set. In such cases usually all are cut away the next spring but the most thrifty one, though sometimes two are left to form a crotch in the tree. But such crotches are more liable to be weak and split down than one formed naturally by a branching limb.

In grafting branches of old trees do not cut away more than one-third of the old limbs in one year, as the loss of so much foliage may injure it. If it is desired to change the character of the whole tree, it is better to take three or four years for the work.

Plum Growing.
A timely bulletin by the Iowa agricultural experiment station says: We are informed upon excellent authority that the plum is the only one of the large or tree fruits whose numbers have not decreased in this state during the past ten years. There is a good reason for this. It is because the plum is native to the state, therefore well adapted to our soil and climate conditions. The varieties of cultivated plums have been wonderfully improved and greatly increased in numbers in recent years. This is partly due to nature's beneficent workings and partly to the enlightened efforts of the horticulturists of the state. We are glad to see by a recent bulletin entitled "Plum Growing in Iowa," issued by Professor Craig, horticulturist of the Iowa agricultural experiment station, that an interesting review has been made of the industry. This contains in addition to a large amount of information on the various problems and difficulties connected with plum growing the tabulated experience of the best plum growers of the state, together with descriptive notes of varieties and directions for the culture and management of plum orchards. The bulletin is free of charge, and will be sent to those who will send a stamped address to the Iowa Agricultural Experiment Station, Ames, Iowa.

Helping It Along.
"Going to put your dog in the dog show?"
"No, but my wife expects to visit it in her new spring hat."—Cleveland Plain Dealer.

Most Assuredly.
"Shelpanedol, petrooolrjug" is the Flemish word for automobile. Wouldn't that make you stick to the old reliable horse?—Washington Post.

His Wife Insisted
And he thought he'd humor her, no doubt. The result shows that a man rarely loses by following his wife's advice. Those who suffer from obstinate cough, bronchitis, weak lungs and ailments in general, which tend to consumption, will find speedy relief and perfect cure in the use of Dr. Pierce's Golden Medical Discovery. It cures ninety-eight per cent. of those who give it a fair and faithful trial. It purifies the blood, heals the lungs and builds up the body with firm flesh instead of flabby fat. The "Discovery" contains no alcohol, neither opium, cocaine, nor other narcotics.

"Only for Dr. Pierce's Golden Medical Discovery I think I would be in my grave today," writes Mr. Moses Miles of Millard, Utah Co., Wyoming. "I had asthma so bad I could not sleep at night and was compelled to give up all the time, both day and night. My friends all thought I had consumption. My wife had heard of Dr. Pierce's Discovery, and she had helped her so much she insisted on my trying his Golden Medical Discovery. I would like you to print this testimony as it may help some other poor sufferer."

Dr. Pierce's Medical Adviser, in paper binding, free on receipt of 21 one-cent stamps to pay expense of mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

Pianos, Organs,
Sewing Machines,
icycles and Sundries.

We sell for cash or easy payments we take your old instrument in trade, we rent new machines, we pair and clean machines and will sell good goods at lowest possible price.

F. A. WIGGINS, Salem.
307 Commercial street.

The Fortune Teller

There were nine of us—four couples and an odd one—gathered in Mary Brown's pleasant parlor. We had all come together quite by accident. "Well, I declare!" said Ned. "We're just time to go over to the woods and have our fortunes told before sunset. What do you say?" "Oh, let's go!" cried Alice and I in a breath. "It will be such fun!" And so we coupled off—Mary and Carl, John and Nellie, Peter and Alice, Jack and I, and Ned, the odd one, as guide. After much stumbling over underbrush and a few torn dresses we reached the place and presented ourselves before the shly—a wild, dark and sufficiently hideous old hag to satisfy us all that she was the veritable gypsy who told dreadful truths to heroes and heroines in novels.

"Draw out your dime," said Ned in a whisper, and then aloud to the gypsy, "Madam, having heard of your wonderful skill in reading the future, we humbly present ourselves before you, hoping to profit by the words of wisdom that fall from your respected tongue."

"Aye, I can read the future, as ye say, my laddie," said the woman. "Will ye give me yer hand?" "I'll give place to my bettern," said Ned, pushing Carl Owen forward.

The shly pocketed the proffered coin, and then took the young man's hand and examined it intently.

"A bright and glowing future, lad—a bright and glowing future I read for ye; wealth and honor and distinction. Men shall bow before ye, and a world shall sing yer praise. And all this is near to ye. I can tell no more. Go."

"A very good beginning, old lady," whispered Ned. "Now, Mary, ye have taken yer place. And Mary held out her palm for inspection. The shly shook her unkempt locks.

"A sad life and a lonely one, my lassie! Ye will never wed, yer life will be a many crosses and yer eyes shed many tears, and men will woo, but ye will never be a bride!" She dropped her hand, and Carl drew Mary back by his side with a contemptuous grimace to the gypsy. Alice came next.

"Ah, ye will wed, my lady," cried the gypsy. A fair young lord, with eyes like sleeping lakes and hair like spun gold, is on his way even now. And he will woo, and my lady will not say nay, but will lie of him to a palace home."

"Not if I can help it!" I heard Peter whisper as she stepped forward.

"The line of life is long. Yer days are many. But ye will meet with sorrow. Ye will win a fair laddie, and she will die and leave ye all forlorn to wander o'er the world." And Peter's hand was dropped and John's taken.

"Ye will wed the maid of yer heart. Ye will be happy in her love, but no children will ever bless yer life. This will be the only sorrow of yer life."

"And ye," taking Nellie's soft hand, "ye will be a childless wife, I ween. Many will be yer tears."

It was Jack's turn now.

"Ye will wed a great princess and ride in a chariot of gold, but life will be a burden for all that. And yer princess will turn all the sunshine of yer life to darkness. Go." And Jack went and I came.

The shly sighed.

"The lines of life are short. Yer days are few, my lassie, for those red cheeks. A worn gnaws at yer heart, and ye will fade and die ere three moons."

I turned away shuddering.

"And now, young man, ye are the last," she said, taking Ned's hand. "A bright future awaits ye. Ye will go through much of poverty, mayhap, and sorrow, but will sit in the president's chair at last. Long life and happiness are at last thine."

And then she vanished into the hut, and we all went home, sadder and, oh, how vastly wiser!

That was ten years ago, and let us see how the gypsy's prophecies terminated.

I waited three months, and, being still alive, Jack insisted upon my becoming Mrs. Brown.

"If ye don't, I shall go and marry that princess," he threatened.

"Then I shall surely die," I said, and a month afterward prevented the possibility of such a thing.

At my wedding I heard Peter pleading the question with Alice.

"But, Peter, I have got to marry a girl with golden hair and eyes like lakes, and you are dark and not a lord," answered Alice.

"But you must really marry me."

"Well, if he doesn't come in a month I will."

As he did not she married Peter.

Mary is the happy wife of Farmer Carl, who hasn't found her life without him. And as for John and Nellie, you have only to go within hearing distance of their home, and the sounds you hear will convince you that the gypsy faltered there too.

Ned Wilder is at present, I believe, in the jockey business. But he says there are dark days, and he is expecting the nomination for the presidency. I hope he'll get it, for the gypsy's sake.—New York News.
