

A Mother Tells How She Saved Her Little Daughter's Life.

I am the mother of eight children and have had a great deal of experience with medicines. Last summer my little daughter had the dysentery in its worst form. We thought she would die. I tried everything I could think of, but nothing seemed to do her any good. I saw by an advertisement in our paper that Chamberlain's Colic, Cholera and Diarrhoea Remedy was highly recommended and sent and got a bottle at once. It proved to be one of the very best medicines we ever had in the house. It saved my little daughter's life. I am anxious for every mother to know what an excellent medicine it is. Had I known it at first it would have saved me a great deal of anxiety and my little daughter much suffering.—Yours truly, Mrs. Geo. F. BURDICK, Liberty, R. I. For sale by A. K. Wilson.

Oregon Crops.

The cut worms continue very destructive to gardens, potatoes and clover, and they have appeared in some of the hop yards, but have not as yet damaged this crop to any great extent. Harvest work is progressing under favorable conditions, and considerable thrashing has been done. The yields generally fall below expectations. The following were reported this week: Benton county, 5 to 10 bushels; Clackamas county, 4 to 14; Lane county, 3 to 10; Linn county, 2 to 15; Marion county, 8 to 10; Polk county, 7 to 10; Morrow county about 18; Umatilla county, about 25; Gilliam county, 15 to 20. No returns have yet been received from Southern Oregon, but the correspondents report that the crop there will be short. Considerable spring wheat in the Willamette valley has been cut for hay and some has been plowed up, and there is no question but the wheat crop in that section is in very bad condition. The oat crop is also light, but is yielding better than wheat. Hops continue doing well and rice are less numerous than usual. Hay is practically finished, and the crop is large and generally of a good quality, especially that cut within the last two weeks.

Royal is the most economical of all the leavening agents. Greater in leavening strength, a spoonful raises more dough, or goes further. Working uniformly and perfectly, it makes the bread and cake always light and beautiful, and there is never a waste of good flour, sugar, butter and eggs. Finer food; saving of money; saving of the health of the family; the last is the greatest economy of all.

Some baking powder makers claim their powders are cheaper. They can be cheaper only if made from cheaper materials. "Cheaper" means inferior materials always. To cheapen the cost of an article of food at the expense of its healthfulness, as is done in alum baking powders, is a crime.
