

A VERITABLE CRIME.

CHILDREN SHOULD NOT BE ALLOWED TO DRINK LIQUOR.

Slow Poison For Men and Women. It Quickly Kills the Young—Warning Sent Out by Paris Hospital Doctors.

As a result of the paper read before the Medical Society of Paris Hospitals an intemperance in hospital patients by Dr. Jaquet, it was proposed to give every patient leaving the hospital a leaflet setting forth plainly the dangers of intemperance. Drs. Gendreau and Triboulet drew up the following as about meeting the requirements:

"IMPORTANT NOTICE FOR MEN.

"The greater part of the diseases cured for in the hospitals are caused and aggravated by the use of alcoholic drinks.

"All these drinks are dangerous. The most harmful are those that contain arsenic, the 'vulgar', the pretend aperients, the bitters and, above all, absinthe, which is never helpful and which is the worst of poisons.

"Alcoholic drinks are still more dangerous if one takes them in the morning on an empty stomach or between meals.

"One becomes certainly alcoholic—that is, slowly poisoned by alcohol—even without ever having been drunk, when one drinks alcohol every day or aperients, liquors or too much wine (over one liter a day). Moreover, it is absolutely false that wine gives strength.

"Alcohol is a poison of which the habitual use destroys more or less quickly, but inevitably, the organs most essential to life—the stomach, the liver, the kidneys, the heart and the brain.

"Alcohol causes also trembling, nightmares and often leads to madness.

"Alcohol excites, but does not strengthen.

"When one drinks alcohol often or too much wine (one liter a day), one is more liable to disease. Diseases and wounds are always more serious. They are often complicated with fatal delirium.

"Alcohol very often causes phthisis by weakening the lungs. Every year we see patients who come first to the hospital for alcoholism and who come back a few months later stricken with phthisis.

"Alcoholic parents often have children who are born deformed or idiots or who die in convulsions.

"IMPORTANT NOTICE FOR WOMEN.

"Alcoholism—that is the slow poisoning by the habitual use of alcoholic drinks—does not exist solely among men. Physicians observe it too often also among women and even in children. One gets alcoholic not only by the abuse of wine, but by brandy ('the drop'), cognac, rum, but by liquors of all kinds, by 'vulgar', mint water, which is, in reality, an alcoholic, brandied fruit, by too frequent use of medicated wines (wines of quinquina), or by pretended digestive liquors.

"One thinks to tone oneself up strengthening oneself in taking them. In reality, one destroys, little by little, one's stomach, intestines, liver and brain.

"Alcoholic drinks are so much the more dangerous for women that she is sedentary and lives confined in the bad air of a workshop, restaurant or cafe.

"Trades exposed to great heat or to gases from coal, such as those of laundresses and cooks, favor alcoholism in provoking thirst.

"If a man working at a hard trade can drink without too much inconvenience a liter of wine a day, there is danger for a woman to drink more than half a liter, the more so that nowadays wine is too often adulterated or surcharged with alcohol.

"Wives should make every effort to keep husbands from drinking to excess. They are the first victims of alcoholism, for alcohol, and especially absinthe, transforms a good man into a dangerous madman, who mistrusts and may even kill his wife and children.

"An alcoholic is a detestable father. He engenders sickly children, who are born deformed, or by convulsions, or become, growing up, vicious, having an almost irresistible desire to drink alcohol, and end criminals. These children thus expiate cruelly the vices of their father or their mother, of whom they are the innocent victims.

"When pregnant women or nurses drink alcoholic liquors or too much wine, they injure their children, who may be aborted, deformed, or their nurslings, who may have convulsions.

"One should not let children drink wine, and at no age should they drink wine pure.

"To allow children to drink liquors or alcohol is a veritable crime."

Recommendations of some minor features of hospital regulation, the report closes thus:

"The antialcoholic rumor is beginning. Soon, if we wish it, it will become a clamor. Soon also our statesmen, when, following a famous injunction, they 'drawn up their districts,' will hear around us from them, drawing the attention of the politicians, the complaints of the poisoned, their victims.

"The right to poison will finally cease to be sacred to them. We shall then have the laws necessary to fix solidly the moral reform accomplished, and this people, torn from 'slavery to alcohol,' will regain the whole of its first vigor and of its bright genius."

The Drunkard.

That the drunkard should destroy his own body and consume it in the fires of alcohol is a fact enough, but the cruellest side of the picture is the suffering he causes other and innocent persons. Heartbroken fathers and weeping mothers and wives whose lives are one protracted tragedy could alone adequately describe the needless misery.

All About a Sinner.

Tellers and clerks of savings banks have a rare opportunity to study human nature. All sorts of people, with many strange notions of the methods and purposes of banks, come before them. A teller of a Boston savings bank tells a true story of a good Irish woman who came to the bank to open an account.

"Please write your name on that line," said the official, pushing toward the woman a book and a pen.

"Do you want me first name?" she asked, faking the pen in her hand.

"Yes, your full name and middle initial if you have any."

"Do you want me husband's name?"

"Yes, his last name, but your own first name."

"Oh, me name before I was married?"

"No, your given name—Ellen or Bridget?"

"Sure, then, me name is neither 'Ellen' nor 'Bridget'."

"Well, what is it then?"

"Sure, it's Mary."

"Very well. There are others waiting for you, so please hurry and write your name."

DRINK LAKE OF BEER.

Enormous Quantity Consumed in Philadelphia.

One and one-half barrels, 600 glasses, of beer for every man, woman and child in Philadelphia for the year just past, with an outlay on the part of each person of \$32.80 during that time, says the Philadelphia Bulletin.

"This is not a temperance argument, merely a plain statement of fact based upon the sworn statements made and upon a liberal present day estimate of the city's population.

Brewers in making application for renewal of their licenses from year to year are compelled by law to file in the quarter sessions court a sworn affidavit stating the exact output of the brewery for 12 months past.

These sworn statements were filed in the aforesaid court, and they show that the total output of the local breweries from February, 1890, to the corresponding month of the present year was, in round numbers, 2,600,000 barrels of beer.

The output of the largest local establishment was alone 170,000 barrels, of another 154,000 barrels, while five others exceeded the 100,000 mark. The statement of these figures alone, however, gives no adequate idea of the actual consumption of beer in this city, for it can be safely asserted that fully three-fourths of the actual product of the local breweries is locally consumed.

A careful estimate of the population of Philadelphia at the beginning of last year was 1,350,000, and it certainly does not exceed the million and a half mark now. The 2,600,000 barrels of beer put out during the past year would therefore allow of one and one-third barrels during the year for every resident, regardless of age, sex or predilection for the beverage.

Bringing this down to lesser quantities, every person in the city either personally or by proxy consumed 41 gallons, 104 quarts or 436 glasses of beer for the year and expended for the same \$32.80. Following the same rules of reduction by multiplication, the entire output of 2,600,000 barrels provided the city with 62,000,000 glasses, 248,000 quarts or 992,000 glasses, and entailed a purchasing expenditure on the part of the people of \$84,800,000.

In studying these stupendous figures it must be borne in mind that minor children and the other nondrinking classes form almost if not wholly one-half of the total population of the city, so that the individual consumption and expenditure must be largely increased.

An idea of the value of the bulk of the beer consumed here last year in addition to its cost may be gained from the following comparisons:

It would fill to overflowing the largest reservoir which the city can boast, Barreled and with the barrels filled end to end in a continuous line they would reach by land from New York to New Orleans or by water from this city to Havana, while piled up they would form a solid platform as high and extensive as the city hall.

THE WAY TO PERDITION.

Time Table of the Railroad.

Which the Drunkard Follows.

This time table appeared in the Star of Hope, a weekly paper published by the convicts in Sing Sing prison:

THE BLACK VALLEY RAILROAD.

Standard Gauge, International Line, Chartered Under the New York State Laws.

Over Checks. No Return Trains.

MATRON AND MAID.

Florence Nightingale has completed her eightieth year. She is an invalid and confined to her room.

Mrs. Franklin McVeagh of Chicago has the rarest of English service ever brought to the United States.

A woman is alive in Vienna who sang in the chorus at the first performance of Beethoven's Choral symphony. Her name is Frau Grebner, and she is 91 years old.

Mrs. Mand Wiley Towne, wife of the Populist candidate for the vice presidency, is a graduate of an eastern women's college and an accomplished musician and French scholar.

Miss Ruth Cordis Long, a niece of Secretary Long of the navy department, has decided to become a gospel singer, emulating Mrs. D. Rankin, whose vocation she says she feels is also hers.

Miss Sarah Whalen, teacher for the blind at the Utah State School for the Deaf and Blind, expects to deliver an address at the National Educational association meeting in July at Charleston.

Mrs. Letitia Tyler Temple of Washington, a daughter of President Tyler, has sent to the city council of Lynchburg, Va., a large and beautiful set of United States. It was made by her own hands and is of delicate silk exquisitely colored.

Miss Mary Thorne, M. D., lecturer on the theory and practice of vaccination at the New York School of Medicine for Women, has been appointed teacher of vaccination at the New York School of Medicine for Women, and is expected to give certificates of proficiency to qualified pupils.

Mrs. Julia Ward Howe, poet, philanthropist and philosopher, whose eighty-first birthday occurred on May 27, was married by the New England Women's club, of which she has been president for more than 20 years, which tendered her a banquet and reception at the Hotel Vendome, in Boston.

Mrs. Marie de Rouze Huis, Guernsey, is 105 years old. She was brought up at Bristol at a school kept by the sister of Byron's Amos Cottle and, unlike most centenarians, was acquainted with many celebrated people, including Hannah More, Sir Humphrey Davy and General Dumouriez. When 90 years old, she made a journey to Cracow to visit Kosciusko's tomb.

THE FLOWER BED.

There are 798 distinct species of roses known.

Lilies, either the common purple or the Persian, become white during the process of forcing.

Poppies should be planted where they are to grow and then thinned out so each will have six or eight inches of room.

In a sunny, rich soil, with all the water they want, poppies of all varieties are to be grown and they will give a happy culture. They are oriental beauties.

Very few annuals will make such a fine display of bloom during the summer and fall and furnish so many flowers for cutting as the poppy. It is without doubt our finest bedding plant. It has not the slightest objection to blooming right along up to hard frosts and freezing weather.

A Record in Blood.

The record of blood's ancestry is literally written in the blood of millions of people to whom it has been good to live. It is all the time curving in the stomach, nerves, kidneys and blood and it goes on every day to thousands who are taking it for poor health, tired feeling and general debility. It is the best medicine money can buy.

Hill's pills are non-irritating and the price is 25 cents.

THE PEDAGOGUE.

Provision must be made annually in the Boston public schools for 2,500 additional pupils.

President Eliot of Harvard is to make another tour of the west this summer. He will again be the guest at dinner of the various Harvard alumni clubs in different cities.

Frederick Washington Atkinson, principal of the high school at Springfield, Mass., is studying the methods of the industrial schools of the south preparatory to taking his new duties as the first American superintendent of public instruction in the Philippines.

At Harvard university there is promise of an increased attendance in the regular departments of the summer school. The number will probably be near 900, besides the Cuban teachers, or a total of about 2,300 students. The session will begin on July 5 and close on Aug. 15.

PERT PERSONALS.

The sultan has started a famine fund. There are very few long shots that escape Abdul, and he takes the newspapers—New York Press.

Julian Ralph describes himself as a physical wreck, but he will wage a still drawn a good plump salary as a war correspondent—Boston Traveler.

If you want to get a good idea of the difference between poetry and verse compare Alfred Austin's latest effort with Tennyson's "Balaklava"—Boston Globe.

Professor Owen Channing, who jarred the mothers' tongues by declaring that man's love for woman is never the real thing, has a long explanation to make at home—New York World.

And some day we will see a complaint bitterly because a New York artist painted him "with few like cannibals." He probably feared his friends would think he was on the water wagon—St. Louis Republic.

It isn't necessary to revert to ancient history for heroic types. Young Mr. Plaw of the University of California, who hurls the 16 pound hammer 170 feet or so after dinner, is good enough a Hercules or an Ajax for present consideration—Boston Journal.

JEWELRY JOTTINGS.

Neck ornaments of every kind are this year in the front rank of jewelers' wares.

The fine gold neck chain with a handsome pendant jewel, either diamond, cut glass, or pearl, emerald or other colored stone, is one of the established styles of the season.

Old ideas in regard to the use of jewels have passed out of vogue. The most fashionable and best dressed do not scruple to wear strings of pearls or jeweled necklaces with the street costume.

Curious and unusual cuttings in costly stones are very much in evidence for rings and more especially for pendants.

One diamond set in a marquise, oval or heart shape, emeralds assume the pear or drop form, turquoises are fashioned into scarabs, etc.

The great growing popularity of the emerald quite disproves the old saying that "all things green are unlucky."

On the contrary, the new and revised legend credits this beautiful gem with smoothing out all the rough angles of life and makes it the earnest of bridal gifts.

—Jewelry Circular-Weekly.

Still More Counterfeiting.

The Secret Service has unearthed and secured a large quantity of bogus bills which are so cleverly executed that the average person would never suspect them of being spurious.

Things of great value are always selected by counterfeiters for imitation, notably the celebrated Hostetter's Stomach Bitters, which has many imitators but no equals for indigestion, dyspepsia, constipation, nervousness and general debility. The Bitters sets things right in the stomach, and when the stomach is in good order it makes good blood and plenty of it. In this manner the Bitters get at the seat of strength and vitality, and restore vigor to the weak and debilitated. Be ware of counterfeiters when buying.

The most renowned ruby in the world is in the crown of the czar of Russia. In shape it resembles a bishop's mitre, and on its crest is a cross composed of six superb diamonds.

The German emperor is a believer in luck attending horsebores, never passes one by and was once seen walking home through the streets of Berlin carrying a huge shoe in his left hand.

There were no white inhabitants in Kansas in 1854. In 1856 there were less than 10,000, and in 1890 but 107,000. At the last enumeration, March, 1900, the population was 1,407,110.

For Over Fifty Years.

An old and well tried remedy, Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. 25 cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup and take no other kind.
