## PEOPLE UNFIT TO GOVERN.

that is the Hamiltonian Idea, and Mark Hanna is of a Like Opinion.

Every once in awhile a Republican spellbinder lays aside the cloak of preense with which the real principles of the Republican party have been cov-sred. When he does so, he says some very startling and alarming thingsthat is, startling to any one not committed to a runaway policy of impecialism and despotism. William Dudstate in which the administration inds its Neelys, has come out in "scare tends" for the polley of the present adninistration both abroad and at home. tir. Foulke swells out his chest and

seclares in a public speech that the statement found in the Declaration of Independence that "all men are created squal" is not true. The statement that 'all governments derive their just powits from the consent of the governed' s not true and never has been. Sentiments like these are, however, now so frequently used in defense of the adstration that they no longer create iny sensation, and yet there are some people who say that imperialism is a bogy and that there are no issues in-colving the very foundation of free povernment at stake in this campaign. Those who attempt to decry the stand of the anti-imperialists base their ideas

upon the Hamiltonian idea of govern nent, which is this-"that the people are unfit to govern." Such is Mark lanna's idea, and it is only necessary 'or the people to sanction that idea to prove the claim.

### ROOSEVELT'S FALL.

### furrenders Unconditionally to the ile of Boss Pintt.

At the New York Republican state convention at Saratoga, held on Sept. I, Mr. Roosevelt surrendered the last restige of his pretensions to individual sonesty and independence. Three nonths ago his dearest wish was to be the condidate of that convention for tovernor of New York on a platform ndorsing all his acts as governor and esserting all the principles for which his administration stood. Chief among these were resistance to the Ramapo water steal (Boss Platt's), resistance to boss rule (Platt's) and championship of he franchise tax bill (opposed by Platt and all monopoly trusts).

At Saratoga, Sept. 4, Mr. Roosevelt was made to appear in public as the ndorser of Platt's candidate, Odell, who has been the chief lobbyist at Albany against the franchise tax for the Ramapo water steal and everlastingly for Boss Platt.

What a fall there was, my country-

I have determined to do what I believe to be for the best interests of my country. I will try to do ny whole duty, and in the performance of that duty I find it necessary performance of that duty I find it necessary not only to oppose the re-election of Presi-dent McKinley, but to emphasize that posi-tion by supporting his antagonist, who, in this election, stands for free government ac-ording to the constitution, --Senator Wel-lington.

The Sorrows of Hanna. Mark Hanna is fast becoming a man "acquainted with grief." His greatest source of discomfiture is found in the ampaign fund, or, rather, in the lack of it. The trusts are acting with some legree of independence this' year. Mark Hanna at first went to them and. lemanding money, assured them that New York Weekly, the election of McKinley was absolutevery we rust magnates: "you have no need of noney then." And Hanna went off in dark room and sat down and thought. After a brief retirement he emerged und, going to the trust magnates, said: "The situation is desperate. We need noney and lots of it. We fear defeat." "Ab, is that so?" replied the trust magintes. "In that case we must refuse to place our money upon a losing e." And Hanna again retired to lark room and sat down and thought.

icids and all the stifling devices that genius and experience could devise, but so far without effect.

In Pennsylvania there are several steadily burning mines, and in one place where the outlet of natural gas is very great the spectacle it affords is of surpassing interest. For miles around a great tower of fire may be seen day and night, and the dense black smoke which it gives off settles upon the surrounding country. How a mine gets afire is easily explained, even though the greatest precautions are taken to prevent it. Coal seams exude a gas varying in quantity according to the pressure and the quality of the deposit, which gas when mixed with air in certain proportions is about as explosive as gunpowder.-New York Post.

Funny Freaks of Yvette Guilbert, Mile. Yvette Guilbert in the heyday of her American success was in sple did spirits. In crossing a certain district on Sunday she was unable to get a bottle of claret.

"If I give it to you, madame," said the waiter. "I shall have to go to jail." "Then go," said Mile. Guilbert cheer-fully, "but first get me my claret." One afternoon in Chicago two blank cards were sent up to her by callers de-siring her autograph. On the one she wrote, "Yvette Guilbert is a very good singer," and on the other, "Yvette Guil-

bert is a very naughty singer." "Now," she said airily as she dropped them on the tray, "let them choose ch is wheech.

Her wisdom was of a worldly description. "For who will give me bread when 1 no longer please by my songs, the dear publeec? No. Therefore I come to America, and I come high."-Saturday Evening Post.

### The Source of Windom. "I wonder how Solomon became the wisest man on earth?"

"That's easily explained," replied the man with the intellectual but worried face. "You see, Solomon had a large number of families, and of course his children asked questions, just as all children do. I have no doubt Solomon was like anybody else and had a certain dislike to exposing his ignorance. When one of the children would ask something he didn't know, he'd make believe he wanted a drink of water and then go out and look in the back of the dictionary. I shouldn't be surprised if he were compelled to do this 50 or 60 times a day. Under such onditions a man couldn't help getting wise."-Washington Star.

### An Awful Loss.

At a fire in Cambridge, Mass., an occupant of the damaged house was bewailing the loss of her purse. Several firemen joined in a search for the missing pocketbook, but after spending some time in their quest were still un-successful. Finally the chief said to woman:

"How much was in the pocketbook?" As she answered, "Fifty cents," the look of disgust on the chief's face was too evident to be mistaken.

### The Masculine View.

Gentleman-My wife has lost her wa-terproof, and she wished me to stop in here and order another sent up at once, as it looks like rain. Dealer-Yes, sir. What sort, sir?

Gentleman-Um-I've forgotten the name, but it's one of those that make a woman look better dressed in wet weather than she is in dry weather .--

### FLORAL WORK.

Some Things For Which September Is the Accepted Time.

The best pansles are grown from seed sown in September. The soil should be very rich and mellow. If it is very dry and warm, keep the ground constantly moist until the seeds germinate. In early winter protect the beds with branches of evergreen, and later throw over them leaves or coarse litter. Plants that have been bedded out

ould be potted the last of this month. Choose a cool damp day, and wet the ground thoroughly; a clod of earth will then adhere to the roots of the plants when they are lifted. Cutting back will be necessary, as the roots will be more or less disturbed and more circumscribed. Give room in the pots for the roots: do not crowd them. Water well and set in the shade until well established, then bring to partial sunlight. They may be kept out of

doors until frosty weather. Sweet william, endytuft, hollybock, sweet alyssum, foxglove and other seeds may be sown this month for next senson's blooming. Cuttings start more freely in September than at any other time of year. Word out at any other time of year. Wooden boxes are preferable to pots. The soll should be about one-third leaf mold and twothirds sand. Snap off the cuttings with the fingers. If the wood bends and

the fingers. If the wood bends and does not snap off readily, the wood is too old. Keep the soil moist and give a sunny situation. September is the month to plan and work for the winter window garden. Begonias rank next to geraniums for winter house culture. The plain leav- legiance, and as many different flags ed varieties are better adapted to the have waved over it, those of France. ordinary condition of a room. The Spain, Mexico, independent Texas, the rubra is of easy culture; has dark United States and the Confederate green waxen leaves and pendant red blossoms.
