

Tired and Nervous

It is easy to tell when your nerve-force and vital power are slipping away from you. When your day's work leaves you weary and exhausted; when you are so nervous, irritable and sleepless that your nights are passed in restless tossing; when you get up in the morning with no appetite for breakfast, and go around all day with a headache; you may be sure your nervous strength is being used up faster than it is being renewed.

"I was troubled a great deal with nervousness and headache. The least exertion would cause a dreadful pain in the head and when I became excited I would lose entire control of my nerves. I lived in that misery for ten years, failing to get relief until I began using Dr. Miles' Nervine. Within a week my friends were remarking how much better I looked, and soon after I found my health restored."
Mrs. LOUIS ELG, Idaho Falls, Idaho.

Dr. Miles' Nervine

Gives the tortured nerves a rest, helps them regain their tone and steadiness, and is a speedy remedy for nervous troubles of every kind.

All boys and girls like to do something and have something on their own account, and here is a suggestion to parents. Give one child a setting hen with the agreement that he is to care for the chickens and sell them for his own benefit. Give another a plot of ground to be cultivated by himself and its products to be turned into money for his own use. Some girl might make it profitable to grow and sell flowers, sage, rhubarb, horse radish or other things. Please show this article to industrious and ambitious boys and girls, some of whom would jump at a chance to do the things suggested.

NEVER before was so much interest being taken in the school libraries of this county. Many schools are by one means and another raising funds to augment their number of library books and several are introducing libraries for the first time. Encouraging and training boys and girls to read good books will have a tendency to lead them in laudable directions. Every school should have a good library case in charge of some careful and faithful person, and it should be kept locked so that no book can get out of or into it except through the hands of the librarian. If conducted in any other manner the books will soon be scattered and lost.

For the fourth time John H. Mitchell has been chosen United States senator, having already served in that capacity for eighteen years. It occurred at midnight of Saturday and he had barely enough votes to get in, 46, 11 of them being democrats. It seems that everybody, except the bitterest of the Corbett partisans, are satisfied with the result. There is not a more capable man in the state and his years of service there will give him an

initial prestige which could not have been gained under several years' by a new man. When in the senate he ranked among its most influential members. Such a team as he and Simon will cause many a good thing to come to pass for Oregon. In the deal which made Mitchell senator the democrats secured control of the fire and police departments in Portland and many a worthy man who was kicked out at the end of the Penoyer administration will get back.

Following is the report of the Oak Grove school for the month ending February 22nd: Enrolled, 21; visits by county school superintendent, 1; visits by the board of directors, 2; visits by others, 15; not absent nor tardy, Blanche Fawk, Maud Simmons, Nellie Williamson, Ben, Carl and Jay Smith.—H. C. Seymour, teacher.

General Butler can point to the present conditions in South Africa to corroborate his declaration that he had a bad time down there.—Indianapolis News.

Every once in awhile something happens which causes one to wonder why emotional persons do not pass resolutions sympathizing with the British rather than the Boers.—Chicago Record.

A revolt on the part of the Cape Dutch at the present time would be a more serious matter to England than it had occurred a year ago. Have Kitchener's methods brought on this danger?—Pittsburg Dispatch.

In distance and direction it is as if De Wet had moved from Buffalo to the Shenandoah valley, in Virginia, and was now headed for Harrisburg after escaping his foes on the Potomac at Harper's Ferry.—Philadelphia Press.

Lord Salisbury says the war in South Africa must continue until the burghers are whipped. Mr. Kruger says it must continue until his people get their rights. Both sides being willing, there is no apparent reason why the fight should not go on.—Louisville Dispatch.

There is a Class of People who are injured by the use of coffee. Recently there has been placed in all the grocery stores a new preparation called Grain-O, made of pure grains, that takes the place of coffee. The most delicate stomach receives it with out distress, and but few can tell it from coffee. It does not cost over one-fourth as much. Children may drink it with great benefit. Fifteen cents and 25 cents per package. Try it. Ask for Grain-O.

SMITHFIELD.

Sunday school will hereafter meet at 2:30.

Grain crops are still unharmed in this vicinity and spring seeding will begin as soon as the ground is sufficiently dry.

A large crowd attended our literary meeting Saturday night to hear the debate on the question "Resolved, that present conditions indicate the overthrow of the American government." Both sides of the question were ably discussed, but as truth is mighty and will prevail, the decision was in the affirmative.

By the exercise of his inventive genius Frank Gilliam succeeded in producing a substance that is entirely different from anything hitherto discovered, in either the vegetable or mineral kingdom. The substance is the result of an experiment in chemistry and was produced by compounding bicarbonate of soda, tartrate of potassa, and the chloride of sodium with common wheat flour, and the addition of a small quantity of pure adipoceric, with sufficient acidulated lactical fluid to facilitate thorough incorporation, after which the mass was subjected to low heat for two hours. The substance has a polished surface, and the exterior coloring is an intense black; in density it closely resembles granite, and compares favorably with lead in weight. Frank denies that this substance is the result of an attempt to make bread, but the other members of the family had been absent for several days, just what he was trying to make will probably never be known.
