He sat upon the deck of the little steamboat, gazing around on the bright waters of the Tombigbee as the sun danced on them, gazing intently and smiling absently to himself.

He was a man of about 30, and his right coat sleeve was empty and pinned upon his heart.

Little Jenuie leaned upon his knee, staring him intently in the face in a way that children have. She pushed her broad brimmed hat back from her eyes so that she might stare the better. The hat was a queerly shaped palmetto structure, for this was in 1863, and clothes were at a premium. She was the child of one of the passengers, and between her and the clerk quite a friendship had sprung up.

"And did you sure enough meet your Julia here on the Tombigbee?" asked the child, stroking the empty sleeve with a pitying touch.

"Yes," said the clerk, roused from his reverle and smiling down on the eager And in a gumtree canoe?"

Felicia Dorothea Hemans

When Felicia Dorothea Hemans was a little girl only 13 years old, she had a volume of poems ready for publication, and very, very excellent poems they were, too, noble of thought and sweetly reverent. What could be sweeter than her way of describing mother love:

There is none
In all this cold and hollow world, no fount
Of deep, strong, deathless love, save that within
A mother's beart.

Some claim that it is quite natural for a hen to remain on the nest for a

long time while laying sometimes for several hours; that it is hard work and they need a long rest after laying. Close observation for two seasons past convinces us that a hen in proper condition wants to leave the nest, get a drink and go to scratching very soon after she lays. When our hens are an hour after entering, we are satisfied they are in good laying condition. If they stay on for one, two or three hours, we believe it is because they are either too fat, constipated or going broody. A good layer seldom wants to stay on the nest longer than a balf bour. She hasn't time. She must get ready for the next day.
