A Sustaining Diet. These are the curvating days when as somebody has said, men drop by the roadside as if the Day of Fire had dawned. They are fraught with danger to people whose systems are poorly sustained; and this leads us to say, in the interest of the less robust of our readers, that the fall effect of Hood's Sarsaparilla is such as to suggest the propriety of calling this medicine something besides a blood purifier and tonic—say, a sustaining diet. It makes it much easier to bear the heat, restores refreshing sleep, and will without any doubt avert much sickness at this time of year.

Most all their associates of early days are under the sod. She is a sister of Mrs. Thompson, of Oakdale, and J. W. Lewis, of Oak Grove, and he is a brother of Uncle Jack Gilliam and Robert Gilliam who lived so long in the Bridgeport region. They are now visiting her sister at Newton Woodward's in the Pioneer settlement and will soon come to spend some time here.

While we were principal of the Visalia, California, public school from 1875 to 1878 Elder Gilliam was preaching for the Cumberland Presbyterian church in that county and often came to our boarding house kept by a devout member of his church.

It Dazzles the World. No discovery in medicine has ever created one quarter of the excitement that has been caused by Dr. King's New Discovery for Consumption. It's severest tests have been on hopeless victims of consumption, pneumonia, hemorrhage, pleurisy and bronchitis, thousands of whom it has restored to perfect health. For coughs, colic, asthma, croup, hay fever, hoarseness and whooping cough it is the quickest, sure cure in the world. It is sold by all druggists, who guarantee satisfaction or refund money. Large bottles 50c and \$1. Trial bottles free.

ANTIOCH AND BEYOND. Tuesday we made a little round out south and gleaned as follows: J. B. Nunn, H. S. Butz and E. H. Hibbard, near the southern edge of town, all have fine crops of prunes and berries. They have had a big sale of raspberries and will soon begin on black berries. Mr. Hibbard is erecting a new dryer of a pattern different from any other in the county. He has fifteen acres of his own and will cure the ten acre crop of H. G. Campbell. James Elliot, not far away, is also erecting a large fruit dryer. T. D. Phillips is painting and otherwise improving his home, and Elijah Miller and wife occupy the Henry Campbell house, while Mark Embree lives on the Kimball fruit farm and A. Burkhalter on the former Corley place. Taking the ridge road through the timber five miles brought us down into Cooper Hollow. W. H. Mack has gone to help build a new court house at Fossil in Eastern Oregon and Mrs. Mack was out on the farm caring for their hay. Of course she will again cook for the Lawrence threshing outfit. farm, was assisting Clarence McCaleb to save his crop of hay and there is a new baby at the McCaleb home. John Holman has a good lot of hay and was cutting his wheat with a binder. Chas. Osborn lives at the old home- stead and the Breslers on the old Cooper site. The Davis boys from Yamhill county occupy what is known as the Dave Burns place. Nearly all crops look well and considerable stock was seen. Mr. Jack lives where the Cooper Hollow road empties into that leading from Bridgeport to Mor mouth. Going east we were soon at the residence of Allen Towns, who has some alfalfa, besides 110 acres in grain. He keeps over 300 goats and half as many sheep. C. C. Sloan on the old Riddell & Rae place is well pleased with his new western home and thinks he made no mistake in coming to Oregon. He has 40 acres of clover which after being pastured late made two tons of hay to the acre and has 30 acres of rape look fairly well. He feels sure that stock raising will pay here and will gradually bring his farm to support twice his present number of animals. He will build several silos as soon as he can get around to it. He has 11 Jersey cows and when a route is established will help to supply a creamery. He has a fine patch of arbutus, which besides resting the ground makes superior feed. Among other improvements he has made a mile of plank fencing. His neighbor, L. S. Fuller, is getting things in good shape around him, and Frank Morris, who abides where his father lived so long, has erected a good feed and stock barn. The Remington and Thurston prune orchards look quite well but we did not examine into the fullness of their crops. Some trees in each have died after having borne well for several years. Between here and there is a body of small oak trees which will gradually be turned into firewood and then the land will make first class fruit orchards. We should have said at the beginning that Antioch is the name of the school house in the south end of Cooper Hollow.
