

SLEEP FOR BABY AND REST FOR MOTHERS

Sleep for Skin Tired Babies and Rest for Tired Mothers, in a Warm Bath with

Cuticura SOAP

And a single application of Cuticura Ointment, purest of emollients and greatest of skin cures. This is the most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply skin and scalp humors with loss of hair of infants and children, known.

MILLIONS OF PEOPLE USE CUTICURA SOAP, assisted by CUTICURA OINTMENT, for beautifying the skin, for cleansing the scalp, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, and for all the purposes of the toilet, bath, and nursery. Millions of women use CUTICURA SOAP in baths for annoying irritations, inflammations, and chafings, too free or excessive perspiration, in washes for ulcerative weaknesses, and for many antiseptic purposes which readily suggest themselves.

Complete Treatment for Every Humour. CUTICURA SOAP, to cleanse the skin of crusts and scales, CUTICURA OINTMENT, to instantly relieve itching, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood.

Sold throughout the world. British Depot: F. Newbery & Sons, 27-29, Charterhouse St., London. Foreign Agents: See List, page 50, Vol. 1.

MATRON AND MAID.

Mme. Patti includes billiard playing among the good exercises for singers. Florence Miller, aged 6, keeps books for her father, a real estate operator in Bloomington, Ill.

Franklin Thurlow, a lady physician in Berlin, has celebrated the twenty-fifth anniversary of her entrance into the medical profession. She was the first lady doctor in Berlin and started her practice in 1876.

The widow of Vice President Breckinridge of Kentucky will under a recent grant receive a pension of \$8 per month and a back payment of \$1,350 cash. She is 76 years old. Her husband was a major in the Mexican war.

The Countess of Warwick has the most charming garden in England, filled not so much with the fashionable flowers of today as with the old-fashioned favorites of long ago, that are allowed to grow in untrammelled luxuriance.

Fraulein Greta Baldauf, a new German poetess, was a waitress last summer at the restaurant Zum Krokodil at Baden-Baden. Admirers of her talent have found her a more agreeable situation. Her book is called "Lieder eines Madchens aus dem Volk."

The Countess of Minto has suggested to the people of the Dominion of Canada that she a fitting memorial of the late Queen Victoria they establish cottage hospitals for the sick and injured in the remote districts of the provinces. She has already received an anonymous gift of \$2,000 for this laudable purpose.

The position of law clerk of the treasury department at Washington will after July 1 be held by Miss Clara Greenock of Michigan, the first woman to hold the position in the history of the department. Miss Greenock had no political influence and won her promotion by sheer ability and fitness for the position.

At the recent Colorado elections Mrs. Margaret Robins was unanimously chosen city treasurer of Idaho Springs. At Aspen Mrs. E. A. Keeney was re-elected to the same office by a large majority. Mrs. Jennie Gale was elected city treasurer at New Castle, Mrs. Emma C. Palmer in Greeley, Mrs. Clara A. Clark at Alma, Mrs. Mary Shanks at Ouray, Miss Nellie E. Donahue at Victor and Mrs. A. N. Frowine at Manhattan.

LAW POINTS.

Payment by the principal of part of the contract price is a ratification of the agent's act in making the contract. (40 Ill. Rep., 398.)

Where a person procures another to write a letter for him he is presumed to know its contents whether he did or not when the person to whom it is sent acted upon it. (32 N. W. Rep., 75.)

A contract may be enforced against one person shown to have been the real principal, although it purports to be the individual contract of the agent by whom it was made. (101 Fed. Rep., 591.)

It is immaterial whether a contract was authorized prior to its execution or subsequently ratified. If a contracting party could authorize it in the first instance, he could ratify it subsequently. (86 Ill. App. Ct. Rep., 219.)

The burden is upon him who seeks to avail himself of the acts of an agent, in order to charge the principal, to prove the authority under which the agent acted, to establish the agency and the extent of same. (13 P. S. Ct. Rep., 143.)

CASTORIA

For Infants and Children. The Kind You Have Always Bought Bears the Signature of

Warranted Pure and Free from any Castor Oil. Sold by all Druggists.

THE HORSE SHOW.

There is a fast green horse in California by Robin, 2:22, out of Myrtle, 2:13, by Anteo, 2:10.

Good Morning, 2:15, foaled a chestnut filly March 4 by Baron Dillon, 2:12, the first foal of that horse for 1901.

The North Side Driving club of Chicago, a new organization, will hold regular weekly matinees over the half mile track at Ravenswood.

At the matinees of the Pittsburg Driving club during the past two years 2.5 heats have been trotted and paced with an average of 2:20 to 2:40.

The fast Missouri pacing mare Corlette, 2:12, by Free Colono, 2:14, has been sent to Douglas Thomas, Paris, Ky., to be trained and raced.

Harry B. pacer, 2:10, has been sold to J. M. Roach, president of the Union Traction company, Chicago, who will drive him double with Joyce, trial in 2:10.

Lon McDonald has the Bayard Wilkes trotter Glen Wilkes, 2:28, in his stable at Mystic. This trotter has shown better than 2:20 on a half mile track.

Lady of the Manor, 2:04, the fastest pacing mare in the world, has foaled at Village farm a chestnut colt by Direct Hal, son of James Butler's famous trotting and pacing stallion Direct, 2:05.

Rowellan (3), by Abdell (1), 2:23, dam Louwena (2), 2:17, by Azmoor, 2:20, is showing Trainer Houser at Palo Alto that he is one of the most sensational colt trotters ever bred there. He recently trotted a quarter in 32 seconds, last eighth in 15, seconds.

Lottie Lorraine, 2:05, has foaled a bay filly by Star Pointer, 1:59, by this Captain B. H. Tutbill is the possessor of a filly with the fastest speed inheritance in the world. The sire is the champion harness horse, and the dam is the ex-queen of pacing mares.

TOWN TOPICS.

The police of St. Louis will have to make the best of summer without shirt waists. So decides Chief Kieley.

London is 12 miles broad one way and 17 the other, and every year sees about 20 miles of new streets added to it.

The census returns of Glasgow, just issued, show a total of 703,329 population, an increase in a decade of 184,615.

A tree is almost the only thing that should be allowed to remain standing in a city street. It is almost the only obstruction that is not allowed in New York city.—New York World.

There is more than one way to call names, as is shown by the action of the committee of fifteen, when, upon Commissioner Murphy said, "There are no post-offices open in New York," promptly raised seven of them.—Boston Herald.

There is great public excitement in Philadelphia. It is necessary to decide what style and texture of shirt waist will best become the letter carriers. Philadelphia is becoming so strenuous that it is almost impossible for a retiring disposition to find peace and serenity there.—New York Press.

BILL OF THE PLAY.

Gillette has, it is said, earned \$40,000 this season.

Miss Horton Barter, a Frisco blind girl, is to go on the stage.

The latest biograph pictures show the decapitation of a number of Boxers in China.

An American company will play "Way Down East" and "Lovers' Lane" in Australia.

Wilson Barrett charges for his autograph \$1.02. Mrs. Langtry exacts 62 cents for every signature.

It is said that Emile Poulson, a Danish actor, will make a professional tour of America next season.

Sarah Bernhardt has invited Elsie De Wolfe to occupy her theater in Paris, and the American actress has accepted.

An opera of Sullivan's utterly unknown here, entitled "The Beauty Stone," has been accepted for performance at the Central theater, Berlin.

When Ada Rehan learned recently that her pet dog would not be admitted to the hotel at Waterbury, Conn., she chartered a special train and slept at Hartford.

Rheumatism

Rheumatic pains are the cries of protest and distress from tortured muscles, aching joints and excited nerves. The blood has been poisoned by the accumulation of waste matter in the system, and can no longer supply the pure and health sustaining food they require. The whole system feels the effect of this acid poison, and until the blood has been purified and brought back to a healthy condition will the aches and pains cease.

Mrs. James Keel, of 707 Ninth street, N. E., Washington, D. C., writes as follows: "A few months ago I had an attack of Scurvy Rheumatism in its worst form. The pain was so intense that I became completely prostrated. The attack was an unusually severe one, and my condition was regarded as being very dangerous. I was attended by one of the most able doctors in Washington, who also a member of the faculty of a leading medical college here. He told me to continue his prescriptions and I would get well. After having filled twelve times without receiving the slightest benefit, I decided to continue his treatment any longer. Having heard of S. S. S. (specific) recommended for Rheumatism, I decided, almost in despair, to give the medicine a trial, and after I had taken a few bottles I was able to get about on crutches, and very soon thereafter had no use for them at all. S. S. S. has cured me and well. All the distressing pains have left me, my appetite has returned, and I am happy to be again restored to perfect health."

S. S. S. is the great vegetable purifier and tonic, is the ideal remedy in all rheumatic troubles. There are no opiates or minerals in it to disturb the digestion and lead to ruinous habits.

We have prepared a special book on Rheumatism which every sufferer from this painful disease should read. It is the most complete and interesting book of the kind in existence. It will be sent free to any one desiring it. Write our physicians fully and freely about your case. We make no charge for medical advice.

THE SWEET SPECIFIC CO., ATLANTA, GA.

School of agriculture of Minnesota

University. Mrs. Meredith has herself conducted a successful stock farm for many years, and she believes thoroughly in the farm life for young people.

"The farm home," she said, "is to my mind the ideal home, and I am glad to say that the thought in our school is always to educate the girl for the life she will have to live."

"At first we had only boys in the school, but when these, noticing that their sisters and sweethearts needed to learn just what they were learning, begged us to take girls, too, we did so, and now for four years we have been training farmers' daughters to make happy farm homes."

"Our girls study side by side with the boys the different breeds of live stock and the various developments of plant life. A farmer's wife needs to know how to tell a Shorthorn from a long horn and what season is best for planting corn."

"We have been hearing in the past much about the man's desire to get away from the farm. The reason for his restlessness lies in the dissatisfaction of his women folk with farm life. They needed to be taught that it was interesting to make a farm home."

"We give our girls special work adapted to women in the home, such as cooking, which extends through the three years; dairy chemistry and plant life. Butter making is not droptery to the girl who understands the why of it, and sewing is rapidly ceasing to become a lost art now that the girls see that patterns are comprehensible things and not Chinese puzzles."

"The girl is taught, too, about textiles, a most interesting subject from the farmer's viewpoint, and she attends lectures on household art in which suitability is shown to be the desideratum of a purchase of furniture."

"The application made in our school of mechanical drawings—that of designing model farmhouses—will have a great influence on the coming farm home of Minnesota. When the present generation builds houses, they will be convenient ones."—Boston Globe.

A Dress Made of Glass.

One of the most curious objects at the interesting Palais de Costume at the Paris exposition was a dress of glass.

This fabric closely resembles rich silk, is quite comfortable to wear, strong and durable. It consists of threads of glass, which when spun out to great fineness, lose their brittleness.

The dress, which is said to be the only one of its kind, was bought from the exhibitors in Paris by Miss Helen Jaqua, a young American concert singer, who now wears it at her public appearances. The glass from which the threads were originally made was plain white, but the fabric when made up has a curious green tint in daylight. At night it has a strange iridescence, its colors changing with every movement of the wearer and of the beholder's eye. The makers of the dress received \$1,000 for it.

The gown contains millions of extremely fine and delicate strands of pure spun glass made and woven into glass cloth by hand in Dresden, Germany. The cloth was brought to Paris by a prominent French dressmaker and made into the dress. It required five months and two days to complete it for the exhibit.

The dress was cut in the latest Parisian fashion. The skirt is a demi-mermaid and hangs with the softness of brocade, cut in simple fashion, with full gathers at the back, outlining the figure in graceful folds.

It took over 14 yards of extra wide glass cloth, 35 yards of spun glass braid and 25 yards of glass fringe, making in all 74 yards, to make up this garment.

Law Violated.

The continued violation of the alien contract labor law and the unjust decisions that have been rendered in the courts are attracting the attention of labor organizations. Something must be done to remedy the defects of the law and also to bring to justice the violators of the law in the different states. At the Louisville convention of the American Federation of Labor a resolution was adopted instructing the executive committee to investigate the matter and have the law amended, and the federation will no doubt take the matter up for consideration when it meets in Washington in its annual convention.

Women's Exchanges.

In looking up the women's exchanges in America, Good Housekeeping finds that since 1890 more than 25 per cent of these institutions have closed their doors. Others have developed into profitable lunchrooms, giving up their department of fancy work or sewed materials. When asked the reason for the decline in number of many of these once successful businesses, a woman who had once been manager of an exchange in New Jersey gave this explanation, which is interesting:

"These exchanges," she said, "began their existence some 20 or 30 years ago, when the field for a woman's work was circumscribed. Year by year opened up new professions for women until today there are few callings that feminine hands are not fitted for. Schools for manual training, domestic science and all the studies that girls are coeducational are training girls for what they are best adapted. Young women are preparing themselves from the time they leave high school for a profession. If they marry and do not require to use their knowledge, it generally makes them no less fit for domestic life. The women to whom the women's exchange was a boon were those into whose lives vicissitudes came or penniless old maids. Today the widow turns to some profession in which she was skilled in young womanhood."—London Globe.

Would Know Later.

Patient—Now, doctor, what's the matter with me, anyway?
The Head Consulting Physician—My dear sir, do you suppose that if we knew what was the matter with you we would have decided to hold a post-mortem?—Harper's Bazar.

Bears the Signature of

Warranted Pure and Free from any Castor Oil. Sold by all Druggists.

"Nerve Waste."

One of the most helpful books on nerve waste ever issued is that entitled "Nerve Waste," by Dr. Sawyer of San Francisco, now in its fifth thousand. This work of an experienced and reputable physician is in agreeable contrast to the vast sum of false teaching which prevails on this interesting subject. It abounds in carefully considered and practical advice, and has the two great merits of wisdom and sincerity. It is endorsed by both the religious and secular press. The Chicago Advance says: "A perusal of the book and the application of its principles will put health, hope and heart into thousands of lives that are now suffering through nervous impairment." The book is \$1.00, by mail, postpaid. One of the most interesting chapters—chapter XX, on Nerves and Nerve Tonics—has been printed separately as a sample chapter, and will be sent to any address for stamp by the publishers, The Pacific Pub. Co., Box 2658, San Francisco.

"Why not spend the vacation at Yacovina Bay, where can be had excellent fare, good fishing, good boating, safe bathing, alluring rides and rambles. The courses and exercises at the summer school of 1901 at Newport, will afford great variety of instructions, diversion and entertainment. No other resort offers equal attractions and advantages."

For Over Fifty Years.

An old and well tried remedy, Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. 25 cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup and take no other kind.

FLOWER AND TREE.

Sugar exists in the sap of leaves of nearly 200 different kinds of trees. Palms never live more than 250 years. Ivy has been known to live 450, chestnut 800, oak 1,600 and yew 2,880 years.

The surest way of getting water where it is needed—close to the roots of plants—is to sink a tin can with perforations in the bottom by the side of the plant and fill with water. This puts the life giving fluid where it is needed most.

The largest tree in the state of New Jersey is a white oak, situated three miles north of Mickleton, Gloucester county. Its dimensions are: Height, 35 feet; diameter of trunk three feet above the ground, 7 feet 10 inches; spread of branches, 118 feet. This tree antedates the settlement of the colony.

THE COOKBOOK.

Greasing the inside, round the top, of the basin or saucepan in which you are boiling sugar or molasses for candy, frosting, etc., will prevent it from boiling over.

Cold meat sliced can be made very acceptable by dipping in beaten egg, then in fine cracker crumbs and fried in hot fat. The covering prevents the meat from drying up.

A variation of the old fashioned baked apple is to pare and core one dozen large apples, fill with sugar and a little butter and nutmeg, put in the oven, and when done remove to a flat dish, let top and sides with cake icing and stand away to get cold.

STATE LINES.

Iowa claims to have more banks and larger bank deposits than ever before in her history.

Tennessee by a new law forbids the employment of children under 14 years in mines, factories and workshops.

A new inheritance tax law in Minnesota avoids the unconstitutional features of the old law by providing for a tax on both real and personal property. The rate is 5 per cent on collateral and 1 per cent on direct inheritances, with an exemption of \$5,000.

The Pretty Garden Forgetmenot.

One of our loveliest flowers is the garden forgetmenot (Myosotis palustris), but there are very few gardens where it will flourish for more than a season. Plant it in a moist, shady place, and it is said that in Germany and other parts of Europe it grows along every stream, and apparently it needs very little encouragement to do the same in New England, says a writer in an exchange.

Knowing of two cases where beds of it are established in the fields, I set out two or three slips (rooted in water) last summer, and already these have increased to a thirty mat of budded shoots as large as a handkerchief. It begins to blossom about the 1st of June and continues in flower until frost, seeding freely as well as spreading rapidly by its creeping stems, and is a perennial, perfectly hardy under favoring conditions. Nothing is prettier for indoor decoration than big bowls of forgetmenots, which will last for a fortnight, the sky blue blossoms and rosy buds growing a little paler, however, as they open in the house.

Picking Strawberries.

The less berries are handled before marketing the better condition they will be in. For this reason they should be picked, graded and crated with one handling. This can be done where the picker understands grading. A handy device is a carrier made to hold four of the quart crates. This is made of board about 10 by 10 inches long, with a handle nailed through the middle.

CRATE FOR HOLDING BERRY BOXES.

Two boxes will sit each side of the handle, and strips of thin boards three inches wide nailed across the ends and sides will prevent them from slipping off. The picker grades as he picks, putting each size in its proper box. With one of these in each hand a person can carry eight boxes after picking, saving time and needless trips to the crating room.—Ohio Farmer.

Spraying Peach Trees.

Bordeaux mixture containing three pounds of bluestone to a barrel of water applied the last of May is likely to injure peach foliage somewhat, but in our experience the injury is not enough to do any serious harm. The same is also true of bordeaux containing two pounds of bluestone applied the last of June.

Black spot was almost entirely prevented and the texture and size of the fruit were decidedly improved by two and three applications.

The spraying should be continued well up to the time of ripening of the fruit.—Maryland Station.

Those having farms to rent would,

by giving notice in this paper, soon have numerous applicants from whom to select.

Mr. Kipling's return to England calls attention to the fact that the name of the once worshipped author has at present a smaller circulation than it has had since "Plain Tales From the Hills" crawled to popularity, and the only one responsible for this deterioration is Mr. Kipling himself.—Boston Journal.

THE JEWEL CASKET.

Women are taking amazingly to the watch fob in its most masculine aspect. Some of the latest gilt buckles achieve a color so high that it is almost an orange red, a result more unique perhaps than essentially attractive.

An Indian arrowhead clipped out of turquoise matrix and mounted with gold is one of the most taking bits of originality in the way of a pendant.

Watch fobs of half a dozen colored stones, each one encircled by a rose gold serpent and all closely linked together, strike a popular note in color and design.

An open face watch of dark green enamel edged with small white pearls is attached to a winged heart brooch of the same enamel, surmounted by a crown of pearls.—Jewelers' Circular Weekly.

Dirty white silk may be cleaned by rubbing with hot flour on a piece of new flannel. As the flour gets dry, shake it off and use more till the silk is clean.

Rub soap on the outside of your brass kettle before putting it over the fire and the black will easily wash off and the kettle be as bright on the outside as on the inside. So says an exchange.

It is said that the right way to launder black goods is to dissolve the starch in water as usual, then add boiling coffee instead of clear water. Let dry, then dampen and iron on the wring side.

HOUSEHOLD HINTS.

Dirty white silk may be cleaned by rubbing with hot flour on a piece of new flannel. As the flour gets dry, shake it off and use more till the silk is clean.
