

**Beautiful Skin
Soft White Hands
Luxuriant Hair**
Produced by

**Cuticura
SOAP**

MILLIONS USE CUTICURA SOAP, assisted by Cuticura Ointment, for beautifying the skin, for cleansing the scalp and the stopping of falling hair, for softening, whitening, and soothing red, rough hands, for baby rashes, itching, and chafing, and for all the purposes of the toilet, bath, and nursery. Millions of women use CUTICURA SOAP in baths for annoying irritations, inflammations, excoriations, or too free or offensive perspiration, in washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women and mothers.

Complete Treatment for Every Humor. CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle, and CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood.

WILLIAM H. SYLVIS.

A Brief Account of the Life and Work of a Pioneer Trade Unionist.

The Iron Molders' union is one of the strongest labor organizations in the country, but it did not attain its present dimensions without a great struggle. The national union was formed in 1859 through the efforts of William H. Sylvis of Philadelphia. Mr. Sylvis and several other molders formed a local union in the Quaker City in 1855. In 1857 the men in his shop were asked to accept a reduction of 12 per cent. They refused to accept the reduction and after a long strike won out. If unity in one city is good, unity in many cities is better. So argued Mr. Sylvis when on April 11 he submitted a proposition directing that correspondence with unions of molders in other cities be opened with a view to the settlement of some basis of co-operation between them. He was secretary of the committee to call a convention, and on July 5, 1859, 23 delegates, representing unions of molders located in Philadelphia, Albany, Troy, Frederick, Utica and Port Chester, N. Y.; Wilmington, Del.; Baltimore, Cincinnati, Providence, Jersey City and St. Louis, met in Philadelphia. After a session Mr. Sylvis, being the treasurer, and an adjutant was elected. His term of service expired, Mr. Sylvis called a convention of molders at Pittsburg, and the national union was restored, he being elected president. He held that position to his death, July 27, 1890. His remains lie in Laurel Hill cemetery, on the banks of the romantic Schuylkill.

William H. Sylvis was born in 1828 in Indiana. When 9 years old, he went to work for a neighboring farmer, who agreed to support him in return for his time and services. The following four winters his master sent him to school, about three months each year. This was all his schooling he ever got. Then he became a helper in a foundry, and when he learned his trade he located in Philadelphia. In one year as national president he traveled 10,000 miles and organized many unions, his total expenses being \$80,000. He early conceived the idea of ultimately centralizing all work among the organizations into one grand body, which he hoped could be made sufficiently powerful to prevent or punish any transgression upon the rights of the tolling millions. He organized the National Labor party in 1863 and was its president when he died. He was spared the pain of seeing the utter failure of the political movement he had long cherished, but the positive work he had done for the Iron Molders' union and the trade movement in general still lives and will live forever.—Grit.

Shaffer Didn't Want a Strike.

I wish to say, and the manufacturers will be forced to bear me out in my statement, that I never wished this strike. I have been president of the Amalgamated association for three years. In that time I have sought to perfect the organization in a business-like manner. For three years our assessments have been coming into the treasury, and because of the universally peaceful course that we pursued nothing has been spent in waging war against the mills.

The Robin and the Robber.

With twigs and strings and other things
The robin build it strong.
And as it placed them into shape
It carol'd a cheerful song.

"Why so busy?" the jaybird asked.
"I suppose," said the robin, "I'm making a nest
For you, you blooming Jay!"

The treasury of the association nas plenty in its coffers and to spare. As soon as the strike was announced I was in receipt of thousands of letters and telegrams offering assistance. The various branch organizations wrote asking to be assessed, but I refused. I tried so hard to avoid this strike! None will know how many sleepless nights I spent over it. I know what long drawn out strikes mean. I have seen women and little children suffering when the fathers and husbands were out on strike. I thought of all the possible suffering that might ensue and after that sat down and wrote out the proposition to the manufacturers. I never thought they would refuse to sign it. It was conservative and fair. I went to the conference on Friday believing in my very heart that my plan would be adopted. To my surprise it was refused. Then the strike followed.—Theodore J. Shaffer.

A Pretty Still Decision.

In the county court at York, Pa., Judge Stewart the other day rendered his opinion in the contempt cases growing out of the molders' strike, in which George W. Test, corresponding representative of the Iron Molders' Union of North America; John P. Frey of Worcester, Mass., fourth vice president of the union, and Howard Wilmer of the local union, were adjudged guilty of contempt of court in violating the court's injunction restraining them from picketing and otherwise interfering with the York Manufacturing company.

Test and Frey were sentenced to pay a fine of \$250 and each was to undergo imprisonment for 30 days, and Wilmer was fined \$25, which he paid, and was released. Test and Frey, being unable to pay, were sent to jail.

Judge Stewart in his opinion said: "Workmen have the right to continue with and work for whom they please upon such terms and conditions and for such pay as they may be willing to accept. These are rights which cannot be questioned or denied. They exist in the very nature of things and are written in the constitution of the state, and any person who undertakes by force, menace or threats, direct or indirect, though cloaked in the softest language, to violate or interrupt them, is guilty of a wrong, and such conduct will and must be restrained by the courts."

Incapacitate.

"For drunkenness and general worthlessness," spoke the magistrate, "I shall sentence you as an old offender to solitary confinement in the county jail for 30 days."

"Solitary confinement!" contemptuously echoed Tuffold Knott as the officer led him away. "Solitary! I wonder if he thinks he's going to separate me from my regular thirst"—Exchange.

He Was Safe.

Wragson Tatters—Yer a disgrace ter der fersh, yer are!

Weary Walker—Gon! Wat fur?

Wragson Tatters—I jst heard yer tellin dat lady yer'd saw some wood fer her if she'd give yer some grub.

Weary Walker—Aw, yer a Jay! Don't yer s'pose I made sure folks dat she didd' have no wood pile?—Philadelphia Press.

Art Criticism.

First Critic—There's that fellow Link's picture. He owes me a dollar.

Second Critic—Yes, he owes me \$2.

I think it's the worst piece of work I've ever seen.—New York Evening Journal.

For you, you blooming Jay!"

CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system.

Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which made life painful and unendurable. I used medicine prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I used S. S. S. It had the desired effect, and cured me after long and fruitless efforts. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS

is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics.

If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

A GREAT INVESTMENT

On the porch of the country store at the Center sat two old and gray bearded men. Around a bend in the road beyond a third old and gray bearded man had just come into sight.

The newcomer stopped before them, his face beaming with smiles, and with an air of conscious pride held out for their inspection what proved to be a highly polished stove lid.

"There she is!" he cried. "The prettiest and cheapest stove polish ever invented. I knowed the minute I'd put that taller and vinegar in the last larch that I'd got it."

"It does look nice," said Isaac, blinking from one to the other.

"Now, Jet," said Uriah, taking an extra chew of fine cut and leaning back in his chair, "as you're the one that has got this thing up, what's your idea of getting it out? How has it got to be made and sold?"

"Well," said Jet, squaring himself back, "my idea is just to make some of the stuff and go out and sell it. I've figured the whole thing out, and it just amounts to this: It will cost I cent a cake to make this stove polish. We sell it for 10 cents. That gives us a profit of \$12,000 a gross. Now, each one of us ought to sell a gross every day, maybe more, but we'll put it at one gross to be on the safe side. Now, say our expenses are \$3 a day. That leaves us \$10 a day profit, all but 4 cents, and that beats farming all hollow."

"Jet, old boy, we're with you!" cried Uriah, slapping the other on the back.

"I tell you, gentlemen, we're bound to make something out of this. Just to think \$10 a day is nearly \$300 a month—more money than we take in a month in a year!"

"That's so," said Isaac, rising slowly to his feet. "Well, it's getting along. I'll have to get back and do chores."

"The other two watched him out of sight."

"Fine fellow, Ike," said Uriah.

"Hardly the man for this kind of business."

"Well, I don't know. Ike's a good fellow."

"Good fellow! Why, of course he is. Nobody thinks more of the than I do. Why, I'd be willing he should go along for company if he didn't do a stroke."

But, then, he is slow—don't catch on to people quick enough. You see, what you want is a man that has some dignity about him and knows how to approach people in the right sort of way. Why, he'd go into a man's parlor just the same as if he was going into a cow stable. Well, sir, that may do around here, but it won't do in the big towns, and that's where you'll make your money. But, then, if you think I won't do, just say so, and I'll drop out at once."

"Oh, I ain't afraid but what you'll do all right," answered Jet, anxious to conciliate. "But I allow I have got my doubts of Ike."

"Of course you have. You're a man of sense and couldn't help but have doubts. I'll have to cut across here. But I think the matter over, Jet; think it over."

"I'll do that," answered Jet emphatically as he started on alone again.

He walked on rapidly until he came to an old barn along the road. The roof of the barn had been blown off and never replaced, and the whole thing looked very dilapidated, but very familiar to Jet, for it was his barn.

A tall, thin and melancholy looking woman was bending over a washtub at the pump. She looked up at him and stopped her work as Jet came up.

He went on into the house and put the stove lid he had been carrying on the stove. Then he came out and sat down near his wife.

"They say there's \$10 a day in it for a sure thing; that's what they say."

"Well, I'm glad if there is," said the woman, sighing softly. "The Lord knows we need it. Is Uriah and Ike going to take hold of it with you?"

"Maybe they are and maybe they ain't. I know them fellers better than to trust either of them. I can make \$2,000 a year out of it and go it alone."

"Can't you get me that wrapper tonight, then? It's only 70 cents."

"Only 70 cents! Confound it, don't you know that it will take every cent I can make and scrape to get the thing started? I'd rather get you a dozen silk dresses two weeks from now than spare a cent tonight."

"I don't see"—she began, when there was a yell from the kitchen, followed by the loud voice of a man:

"Phew! Judas! What the devil's up here anyway? Are you trying to burn the house down?"

Jet made a jump for the door and stopped aghast. The stove lid, so highly polished but a moment before, was now a dull, dirty red, while above it curled a thick, dingy smoke, bearing with it an odor strong enough to knock down a horse.

"Is that the why your polish works, Jet?" asked a younger man coming around the house looking his nose.

Jet gave a snort of disgust. "I suppose you'll have to blast it all over town," he growled and, turning away sulkily, went off to the barn.

"I think it's a good thing I saved eggs enough to get that wrapper," returned the woman as she tried to blow the smoke out of the house with her apron.

Administrator's Notice.

NOTICE IS HEREBY GIVEN TO ALL WHOM IT MAY CONCERN, that I have been appointed by Hon. J. E. Sibley, Judge of Police county, administrator of the estate of Nancy Parker, late of Polk county, deceased. All persons indebted to said estate will please make payment and any one holding a claim against said estate will please present the same to me, daily, within six months from this date.

Dated, Aug. 15, 1901.

CLEVELAND R. PARKER, Administrator
Townsend & Hart, Attorneys for estate.

SUMMOES.

In the circuit court of the state of Oregon for the county of Polk, s. s.—Department 2.

Richardson Scott, plaintiff,
vs.
Elizabeth Scott, defendant.

Summons.

To Elizabeth Scott, defendant:

IN THE SAME OF THE STATE OF OREGON, you are hereby required to appear and answer the complaint filed against you in the above entitled suit within six weeks from the date of the first publication of the service of this summons upon you. And if you fail to answer, for want thereof, the plaintiff will take a default against you, and decree against you the dissolution and annulling of the bonds of matrimony now existing between the plaintiff and defendant, on the charge of desertion, in accordance with the provisions of the order of the Hon. J. E. Sibley, judge of the county court of Polk county and state of Oregon, duly made at chambers on the 16th day of May, 1901.

L. C. ADAMS, Attorney for plaintiff.

"Nerve Waste."

One of the most helpful books on nerve waste ever issued is that entitled "Nerve Waste," by Dr. Sawyer of San Francisco, now in its fifth thousand. This work of an experienced and reputable physician is in agreeable contrast to the vast amount of false teaching which prevails on this interesting subject. It abounds in carefully considered and practical advice, and has the two great merits of wisdom and sincerity. It is endorsed by both the religious and secular press. The Chicago Advance says: "A perusal of the book and the application of its principles will put health, hope and heart into thousands of lives that are now suffering through nervous impairment." The book is \$1.00, 1-y mail, postpaid. One of the most interesting chapters—chapter XX, on Nerves and Nerve Tonics—has been printed separately as a sample chapter, and will be sent to any address for stamp by the publishers, The Pacific Pub. Co., Box 2658, San Francisco.

FRUIT AND FLOWERS

A TAKING NOVELTY.

Another of Japan's Many Quaint and Charming Fancies.

One of the fads of the floral world this season is the Japanese fern ball. Japan supplies us with many beautiful ferns, and the quaint shapes into which they twist the creeping rhizomes of Davallia halimata are characteristic of the unique productions of the country. The hanging ball here represented is one of these singular affairs, but there are others in the shape of triangles, circles, etc., arranged in the same way—i. e., by binding these rhizomes with wire over a center of sphagnum moss, which must always be kept damp. All these Japanese devices can be grown in a room if they are thoroughly soaked in tepid water daily, after which they should be hung up to drain over

THE HANGING FERN BALL.

A tray before placing them in position. The Davallia (hare's foot fern), which is used, is fairly hardy, and it is easier to keep in good condition at a distance from the fire than too near it. In fact, it should be a rule in choosing a position for our room ferns not to expose them to more dry heat than we can avoid, or to direct sunlight.

To buy one of the undeveloped fern balls, a brown, dead looking sphere, and watch the peeping forth and gradual growth of the fronds until the whole is charged into a graceful feathery mass of living green is a pleasure only appreciated through experience.

A Notion For the Amateur Gardener.

The amateur gardener can often adopt modes of culture, favorable to excellence, that would be hardly profitable for the market gardener. In strawberry culture, according to Mechan's Monthly, it is said that much finer and more toothsome berries can be obtained by setting the plants out on ridges than when grown on the level ground. The earth is thrown up into a wedge-like form a foot or so in depth and then flattened to the apex by the back of a spade so as to be only about nine inches high. The plants are set out about a foot apart along this narrow table on the top of this ridge. The result is said to be a surprise to those who are familiar only with the ordinary flat culture.

Kieffer Pear Improving.

"Is It Advisable to Plant More Kieffer Pears Overlards?" was a topic discussed at the recent New Jersey Horticultural society's meeting, and Mr. D. D. Douise said that from the remarks made of this fruit since the last crop was gathered this was a hard question to answer, as we cannot tell what will take place in the future. The quality of the Kieffer is improving each year, and the canners are using it to a greater extent than formerly, and this is largely in its favor. Nevertheless, standing the low prices last fall, his orchard yielded \$100 per acre, clear of all expenses, and while this is the case it will be advisable to continue to plant.

Why not spend the vacation at Yacquina Bay, where can be had excellent food, good fishing, good boating, safe bathing, alluring rides and rambles. The courses and exercises at the summer school of 1901 at Newport, will afford great variety of instruction, diversion and entertainment. No other resort offers equal attractions and advantages."

For Over Fifty Years.

An old and well tried remedy. Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. 25 cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup and take no other kind.

STAGE GLINTS.

Vernona Jarbeau is to revive "Mazepan."

Charles Frohman now controls five London theaters.

Fanny Davenport, a niece of the late Fanny Davenport, has just made her stage debut.

Marie Wainwright has abandoned her plan to star in a revival of "The School for Scandal."

Bethina Girard is to be the principal performer in a forthcoming revival of "The Girl from Paris."

It is stated that Mascagni, Puccini and Leoncavallo have all secured librettos based on "Ben Hur."

William H. Crane, it is expected, will devote all of the coming season to the dramatization of "David Harum."

Sienkiewicz, the noted Polish novelist and playwright, author of "Quo Vadis," is writing a new play for Mino. Modjeska, his countrywoman.

J. M. Barrie and his wife intend to visit America this fall and will reach Washington in time to see Maude Adams' appearance in his new play.

Adolph Zerk, the ill-fated comedian, is spending the summer fishing on the Maine lakes. He recently sent a photograph showing two fish nearly as long as their captor.

ORCHARD AND GARDEN.

It is poor economy to set out trees, shrubs or plants and then leave them to take care of themselves.

Tomatoes trained to stakes give the sweetest fruit, remain in bearing longest, and there is less loss from rot.

It is a good plan after a hard windstorm to go over the young orchard and press the soil firmly around the trees.

While scraping the outer bark of trees is often beneficial, care should be taken not to injure the softer inner bark.

While there is no danger of growing too much fruit of good quality, it is comparatively easy to overstock with poor fruit.

White bellshoe is a specific for the protection of currant bushes from the ravages of the currant worm. It can be applied in the dry powder.

Don't think it a waste of labor to give the orchard attention before it comes into bearing. During the years of growth the most care is needed.
