

Pure and Sweet as the Skin, Scalp, and Hair of Infants Purified and Beautified by Cuticura Soap.

MILLIONS USE CUTICURA SOAP as the best and most reliable for preserving, purifying, and beautifying the skin, for cleansing the scalp, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in baths for soothing irritations, inflammations, and excoriations, for too free or offensive perspiration, and for many sensitive, antiseptic purposes which readily suggest themselves to women, especially mothers. CUTICURA SOAP combines in ONE SOAP the BEST SKIN and COMPLEXION SOAP, and the BEST TOILET and BABY SOAP in the world. Complete Treatment for Every Member. CUTICURA SOAP to cleanse the skin of crusts and scales and soften the thickened cuticle. CUTICURA OINTMENT to instantly soothe itching, inflammation, and irritation, and soothe and heal, and CUTICURA LINDSAY, to cool and cleanse the blood.

ICE CREAM RECIPE.

How to Make This Always Delicious and Delicately Sweet.

Ice cream may always be bought, but the process of making it is really so simple and the cost so much less than the ice cream freezer should become an established household fixture. This recipe if carefully followed is sure to give satisfaction: Separate four eggs and beat the yolks with one cupful of sugar and a small pinch of salt till quite stiff, and pour slowly over them two cupfuls of hot milk. Now put this mixture in the double boiler and cook until it begins to coat the spoon. Have the whites of the eggs beaten thoroughly and add to them the flavoring of whatever kind you wish and add to the milk and eggs, which you have removed from the fire.

The next thing is to beat the whole mixture steadily until it is cold, when one-half pint of cream well whipped goes in, and the freezing may begin. This cream may be varied by the addition of chopped almonds browned in sirup, sugar, about one cupful of the almonds being the right proportion. It may be turned into coffee ice cream by omitting the almonds and adding one-half cupful of strong coffee just before freezing, or again, a little sherry, vanilla and almond may be used for flavoring, and some dry and powdered macarons may be added before freezing.

If maple sugar melted and hot is used in place of the sugar in the recipe and cooked in with the milk, the cream becomes maple ice cream. In this case, after the freezing, the cream should be covered with browned and chopped almonds.

How to Treat Inflammation.

A point to remember in connection with cleaning is that when linoleum is used as a floor covering scrubbing should rarely be indulged in. When dampness gets underneath the linoleum, the way has been found for its speedy rotting. If well swept, wiped over with a merely moist cloth to remove all stains and polished every once in awhile with turpentine and beeswax, good linoleum has no wear out to it, and, furthermore, it looks well as long as it lasts. It is a good plan to wipe it over with milk and water or with linseed oil once every week or so.

How to Make Indian Pudding.

Put one pint of milk in a iron kettle over the fire. Add good half pint of molasses, piece of butter size of an egg, one teaspoonful of salt, one heaping teaspoonful of cinnamon, one-quarter teaspoonful of cloves and one-half teaspoonful of allspice. Then stir in gradually one-half pint of cornmeal. Cook slowly until it thickens. Beat an egg and stir it in a little cold milk. Take a kettle off stove and add milk and eggs. Beat well, then pour in a buttered dish and bake slowly three hours.

How to Be Beautiful.

If you want to have a good complexion, avoid greasy foods, cakes, pastry and sweets, as well as all lightly seasoned dishes. Don't eat between meals. Eat plenty of fruit, fresh and stewed, and green vegetables, underdone beef and mutton, white fish and milk puddings. Give up strong tea and coffee, and if you find that any special food disagrees with you give it up at once. The stomach quickly reacts on the skin and takes its revenge by giving it a muddy look.

How to Make Waldorf Core Bread.

Beat the yolks of five eggs very light, then add two cups of milk. Sift one

Cuticura Soap

ICE CREAM RECIPE.

cup of meal, one cup of white flour, one tablespoonful of sugar and two rounded teaspoonfuls of baking powder together and stir into the beaten eggs and milk. Melt two tablespoonfuls of butter and stir into the batter. Beat the whites to a stiff froth; fold into the batter. Grease a shallow pan, turn in the batter and bake in a moderate oven 35 or 40 minutes.

How to Tell Good Olives.

Excellent physicians prescribe olives largely for all sorts of nervous diseases, for indigestion and gastritis. They warn only against poor olives, which are far from healthful. A perfect olive is of a yellowish green tinge, hard, and when bitten the mouthful is entire, not sandy or spongy. The stone should have a pinkish color, and the small ought to be fresh and agreeable, says Good Housekeeping.

How to Roast Clams.

The New England style of roasting soft clams is to remove them from the shells, rinse them from sand, wash the shells and after dipping the clam in melted butter, return it to the deeper half of each shell. Sprinkle with salt, paprika and chopped bacon. Put the shells in a dripping pan and roast until golden brown. Serve with quarters of lemon.

How to Make Sweet Pudding.

Four cups flour, one cup suet, chopped fine; one cup seedless raisins, one cup good molasses, one teaspoon baking powder, one cup of milk and salt and spices to taste. After mixing ingredients together put into cups and steam for three hours. Fill the cups three-quarters full. This recipe makes from six to eight large puddings.

How to Make Luncheon Toast.

Prepare slices of nicely browned toast, butter them and lay on lettuce leaves. Take large, thin slices of cold boiled ham, broil them over a clear fire, lay a slice on each piece of toast and pour hot melted cheese over each. Serve immediately.

How to Remove Nasal Obstruction.

When a child pushes a button or some other hard substance into its nostril, put one finger on opposite nostril to close it and blow in the mouth, when the obstruction will be expelled.

THE LAMBING SEASON.

Points For Novices on Management of Young Ewes.

Every sound principle of physiology goes to show that the ewe, like every other domestic animal, should be suffered to remain as quiet as possible for some time after parturition. There should be no hasty interference with a newly born lamb if it appears to be doing well. But, if, on making the usual efforts, it fails to obtain a supply of milk the ewe should at once be examined. The natural flow of milk does not always, particularly in young ewes, commence immediately after lambing, though in a few hours it may be abundant. In this case the lamb should be fed in the meantime artificially. Sometimes, too, when a ewe has a full udder of milk the openings of the teats are so firmly closed that the lamb cannot suck them open. The pressure of the human fingers, lubricated with a little moisture, will usually overcome the difficulty. The sucking of the lamb will generally keep the orifice open afterward, but it may require a little looking after.

A young ewe, owing partly perhaps to the novelty of her situation and partly sometimes either to her excessive fondness for or indifference toward her lamb, will not stand for it to suck as soon as it makes the attempt, but will turn about to evade it or will step a little away. In cold weather she may thus interpose a dangerous delay to its feeding. If she is caught and held by the neck until the udder is once well drawn out, she will generally require no further attention.

It will sometimes be found that a ewe which refuses to stand to be suckled by her lamb will be found to have a hot, hard, inflamed udder, particularly if she is in high condition and lambs in the season. In this case the udder should be fomented for some time with hot water containing a weak infusion of opium. The oftener the fomentation is repeated the sooner the inflammation will subside and the proper flow of milk ensue. If a ewe has lost her lamb and from neglect the udder has become swollen and indurations have formed in it, iodine ointment is one of the best applications.

Polison Oak
Polison Ivy

are among the best known of the many dangerous wild plants and shrubs. They are so quickly produced swelling and inflammation with intense itching and burning of the skin. The eruption soon disappears, but the sufferer hopes forever; but almost as soon as the little blisters and pustules appeared the poison had reached the blood, and will break out at regular intervals and each time in a more aggravated form. This poison will linger in the system for years, and every atom of it must be forced out of the blood before you can expect a perfect, permanent cure.

SSS Nature's Antidote
FOR
SSS Nature's Poisons,

is the only cure for Poison Oak, Poison Ivy, and all noxious plants. It is composed exclusively of roots and herbs. Now is the time to get the poison out of your system, as delay makes your condition worse. Don't experiment longer with salves, washes and soaps—they never cure. Mr. S. M. Marshall, bookkeeper of the Atlanta (Ga.) Gas Light Co., was poisoned with Poison Oak. He took SSS Nature's Antidote and various other drugs, and applied externally numerous ointments and salves with no benefit. At times the swelling and inflammation was so severe he was almost blind. For eight years the poison would break out every winter. He had been improved after taking one bottle of S. S. S., and a few bottles cleared his blood of the poison, and all evidences of the disease disappeared.

People are often poisoned without knowing when or how. Explain your case fully to our physicians, and they will cheerfully give such information and advice as you require, without charge, and we will send at the same time an interesting book on Blood and Skin Diseases.

CASTORIA.

Bears the Signature of *Dr. J. C. Ayer*

FOR THE LITTLE ONES.

Some Pretty Stories That We Are Told About the Summer Stars.

Perhaps you will remember, dear children, the story about the Great Dipper, said to be Calisto, and the Little Dipper, with the Pole star in it being her son Arcas. Let me tell you another pretty legend about these stars which the Indians tell. They spend so much time on the open plains that they cannot help noticing the stars, and they tell many strange legends about them. The Iroquois Indians tell the following story about the Great Bear, of which group, as you may know, the Great Dipper forms a part: "Once upon a time a party of hunters were in pursuit of a bear who was suddenly attacked by three monster stone giants, who destroyed all but three of them. These, together with the bear, were carried up to the sky by invisible hands. The bear is still being pursued by the first hunter with his bow, the second hunter carries a kettle, and the third is carrying sticks wherewith to light a fire when the bear is killed. Only in the autumn does the hunter pierce the bear with an arrow, and it is said that it is the dripping blood that tinges the autumn foliage."

The Fox Indians of Louisiana tell another story about the Great Bear's origin, which may amuse you. In the days of long ago the Indians believed that the trees were able to walk about at night and talk to each other. One dark night, as a bear was wandering homeward through a lonely wood, he was very much surprised to see the trees walking about, nodding their heads and whispering to each other. At first Mr. Bear thought it was only the wind, but when he saw a mighty oak before him, the next moment it was far behind him or on the other side of the road. Presently he happened to run against a tree. It was the oak, the lord of trees. The oak was angry and reached out one of its long branches and grabbed the bear by the tail. The bear struggled all night long to get away, and at last the oak, losing all patience, gave his tail a final twist and hurled him up into the sky.—Mary Proctor (Adapted by Louise Hogan).

Never Give Up.

If you cannot do all you would like to do, do the best you can. If your parents cannot afford to give you a thorough education and you are not able to work your way for yourself, don't give up and sit down to a life of ignorance. There are many ways in which you may do much to educate yourself, and if you will you may yet fit yourself for a high position in the world. Make the best use of the means that come in your reach, and whatever you learn make it thoroughly yours. Never be discouraged because you cannot climb to the mountain top all at once. Half way up the steep side you would have a much better view than if you remain where you are—down in the valley. Climb as high as you can, but be sure that you see the needs of the poor and destitute and your heart yearns to relieve their wants, be sure that you do something. A little may do a great way with one who is hungry and cold.

Scratch's Revenge.

Scratch was a big tabby cat, very sensible, but he strongly objected to being punished for his misdoings. This had to be done sometimes, however, and one day the parlor maid, finding him up on the dining room sideboard, whipped him well. Next day she laid the table for dinner, as usual; but, to her amazement, when she went into the room the tablecloth were all reposing on the floor.

Puss was nowhere to be seen, but there was very little doubt that this was his method of taking his revenge.

A Costly Doll.

The Grand Duchess Olga Nikolaevna, the White Czar's 5-year-old daughter, possesses a doll whose dress is ornamented with priceless emeralds. It is said, by the way, that every pin used to fasten her garments is made of pure gold. But such is the quaintness of children that it is quite likely that the little grand duchess would be just as pleased, if not more so, if the doll was an ordinary rag one that she could whack about as much as she pleased.

Spoon Faces.

When they're bright and shining,
Like the summer moon,
Two queer faces look at you
From the silver spoon.
One is very long and one
Is broad as it can be,
And both of them are greasy things
As ever you did see.

Then careful be, young people,
And not eat of those
Last some day you discover
Your chin's growing down.
Now mind you giggle all the time
As though you were not loony;
We want no children's faces
Like those in silver spoons.

Queer Grafting.

A French horticulturist claims to have successfully grafted the maple upon the blue, the kidney bean upon the castor oil bean and the cabbage upon the tomato, a proceeding in contradiction to the accepted opinion that only plants of the same botanical family can thus be treated.

Administrator's Notice.

NOTICE IS HEREBY GIVEN TO ALL WHOM IT MAY CONCERN, that I have been appointed by the Hon. J. E. Sibley, judge of Polk county, administrator of the estate of J. C. Sawyer, deceased. All persons indebted to said estate will make payment, and any one holding a claim against said estate will present the same to me, duly verified, within six months from this date.

Dated, Aug. 15, 1901.
CLEVELAND F. PARKER,
Administrator.

Townsend & Hart, attorneys for estate.

Summons.

In the circuit court of the state of Oregon for the county of Polk, s. s.—Department 2.
Yardeman Scott, plaintiff,
vs.
Elizabeth Scott, defendant.
Summons.

IN THE NAME OF THE STATE OF OREGON, you are hereby required to appear and answer the complaint filed against you in the above entitled suit within six weeks from the date of the first publication of the service of this summons upon you. And if you fail to answer, for want thereof, the plaintiff will petition the court for an order of dissolution and annulling the bonds of matrimony now existing between the plaintiff and defendant on the ground of desertion as prayed for in his complaint and that plaintiff pay the cost of this suit. The date of the first publication of this summons is August 15, 1901. This summons is published by the order of the Hon. J. E. Sibley, judge of the county court of Polk county and state of Oregon, duly made at chambers on the 15th day of May, 1901.
J. C. ADAMS,
Attorney for plaintiff.

"Nerve Waste."

One of the most helpful books on nerve waste ever issued is that entitled "Nerve Waste," by Dr. Sawyer of San Francisco, in its fifth thousand. This work of an experienced and reputable physician is in agreeable contrast to the vast sum of false teaching which prevails on this interesting subject. It abounds in carefully considered and practical advice, and has the two great merits of wisdom and sincerity. It is endorsed by both the religious and secular press. The Chicago Advance says: "A perusal of the book and the application of its principles will put health, hope and heart into thousands of lives that are now suffering through nervous impairment." The book is \$1.00, by mail, postpaid. One of the most interesting chapters—chapter xx, on Nerves and Nerve Tonics, has been translated separately as a pamphlet chapter, and will be sent to any address for stamp by the publishers, The Pacific Pub. Co., Box 2658, San Francisco.

The Chinese began to write books before they migrated from the region south of the Caspian sea. Two of their greatest literary productions are a dictionary in 5,020 volumes and an encyclopedia in 22,937 volumes.

WEANING PIGS.

The Main Thing is to Keep Them Growing Steadily.

As soon as pigs are old enough to begin to eat food other than that which they receive from their mother a small pen should be so constructed as to admit pigs, but exclude the mother, and a number of pigs in a pen should be placed with a little shelled corn, so that the pigs can eat at pleasure without being disturbed by their mother, says an Ohio grower in National Stockman and Farm. By this means the young pig soon learns to rely less upon its dam for nourishment and more upon that which it gets for itself.

Besides, when weaning time comes the dams may be taken away from the pigs, and neither will experience any inconvenience from the change. Certainly, if care is taken the pigs will be checked in growth the least particle, but will keep on growing just the same. Last year we weaned 52 head, and under such treatment as outlined above they weighed an average of 100 pounds at 4½ months old. This was not an extraordinary growth, and yet it was very satisfactory when we consider there were 52 of them.

The main idea is to keep the young pig growing steadily from birth, as any check it may receive at this time will give place to the young pig to develop it than it otherwise would. It is just as easy and decidedly more profitable to the grower to provide such food and conditions as will keep a steady, healthy growth in the pig from start to finish as it is to let them go on the "rout hog or die" plan and have them not only unequal in size, but stunted in appearance and requiring more time and feed to bring them out than are necessary.

Modern Meatmaking.

The great heavy bullocks and thick sided porkers that were once such favorites are now not desirable, says a writer in American Agriculturist. They have given place to the young, quick legged animals. In order to avoid an excess of fat an animal must be continuously grown. If it is reduced to a mere shadow during the winter months and then the following season allowed its freedom on the rich range grass of the west, it will lay on too much fat and not enough meat. Fatness is not what is wanted; it is meat that the present generation desires. The eastern feeders are fully aware of that fact, for they never allow an animal to stop growing from birth until it reaches the slaughter house. They will cultivate the taste of the meat eaters to such a degree that it will force them to eat no meat except sufficient to keep their animals in good flesh through the winter to sell them at weaning time.

Holstein-Friesians For Beef.

Here on the range I have Short-horns, Herefords and Holsteins, not pure breeds, but high grades, says a Montana man. A butcher usually one or two weeks a week and find that the Holstein will average with the other breeds. In fact, the heaviest, fattest animal I have butchered was a Holstein cow that reared a calf the following winter and dressed out nearly 800 pounds of good beef last September. This was all done on the range grass. She was never fed a pound of anything but salt.

Make fat cattle as comfortable as possible in every way, and for your pains the weight of beef made will amply repay you when you sell them to the butcher.

Why not spend the vacation at Yaquina Bay, where can be had excellent fare, good fishing, good boating, safe bathing, alluring rides and rambles. The courses and exercises at the summer school of 1901 at Newport, will afford great variety of instruction, diversions and entertainment. No other resort offers equal attractions and advantages.

Will Cure Stomachache in Five Minutes.

This is just what Pain Killer will do. Have a bottle in the house for instant use, as it will save you hours of suffering. Watch out that the dealer does not sell you an imitation, as the great reputation of Pain Killer (Ferry Davis), has induced many people to try to make something to sell, said to be "just as good as the original."

For Over Fifty Years.

An old and well tried remedy. Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. 25 cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup and take no other kind.

Like Daisies Before the Scythe.

Baby livers are destroyed in summer by cholera infantum. The attack of the disease is sudden, its progress is sometimes terribly rapid. Mothers who have given their children Perry Davis' Pain Killer in water, with a few drops of water added, can tell how this treatment has checked the diarrhoea and vomiting, and put the little patient out of danger. 25 and 30 cents.

Tests of Culture.

The chemist Liebig proposed to measure the standard of civilization by the consumption of soap, a criterion which would put the inhabitants of north Holland at the head of all civilized nations. As a more reliable test Edmund Abbott suggested the frequency of newspaper, and will be sent to any address for stamp by the publishers, The Pacific Pub. Co., Box 2658, San Francisco.

Telegraphing With Cannons.

When the first vessel completed the passage of the then new Erie canal in 1825, there being no such thing as a telegraph in those days, the news was communicated to New York and Buffalo by cannons placed within bearing of each other all the way along from Albany to each of the other cities. The signal was passed along in this way from Albany to New York city and back again to Albany in 58 minutes. The experiment was a costly one, but was a success in every particular.

Her Sentiments.

They were looking over the paper together. "Oh, my, how funny!" said she.

"What is it?" he asked.

"Why, here's an advertisement that says, 'No reasonable offer refused.'"

"What is there odd about that?"

"Nothing, nothing," she replied, trying to blush; "only those are my sentiments."

Another wedding shortly.

Holland Customs.

Holland has some peculiar customs. In many towns bulletins are affixed to the doors of houses in which persons are sick in order that their friends may be apprised of the state of their health without knocking or ringing, and in Haarlem the birth of a child is announced by means of a small placard adorned with red silk and lace.

A Reasonable Conductor.

Pigs—and just because you had lost your nickel the conductor made you get off the car and walk all the way home.

"Blessy—Oh, no. He only put me off. I could have sat by the roadside all night if I had wanted to.—Baltimore World.

Sheriff's Sale.

NOTICE IS HEREBY GIVEN THAT by virtue of an execution and order of sale duly issued out of the circuit court of the state of Oregon for the county of Polk, bearing date the 21st day of August, 1901, upon a decree duly made, dissolved and docketed in said court on the 19th day of August, 1901, in a certain suit therein pending, wherein Charles H. Holstein, plaintiff, and D. J. Bunyard, and Alice Bunyard, his wife, are defendants, and directed to me, commanding me to sell the hereinafter described premises to satisfy the amounts specified in said execution and decree, to-wit: \$242.50, with interest thereon at the rate of 6 per cent per annum from August 19, 1901, together with costs and disbursements taxed and allowed at \$20.50, and the costs of this sale, I will on

Saturday, October 5,
1901, at the hour of 1 o'clock, p. m., of said day at the west door of the county court house in Dallas, Polk county, Or., sell at public auction to the highest bidder for cash in hand on day of sale all the right, title interest and estate in and to the premises hereinafter described, to-wit: Lots No. 1 and 2 in block C in Damon & Haley's addition to the town of Monmouth, Polk county, Oregon, together with the tenements, hereditaments and appurtenances thereto, belonging or in any wise appertaining.

Dated Dallas, Oregon, this 3rd day of Sept., 1901.
J. G. VAN ORSDIEL,
Sheriff of Polk county, Oregon.

Final Settlement.

NOTICE IS HEREBY GIVEN THAT the undersigned executor of the final estate of Daniel Van Buren, deceased, has filed his final account as such executor in the county court of Polk county, Oregon, and that said court has set the hearing thereon on Monday, Oct. 7, 1901, at 10 o'clock, A. M., in the afternoon of said day, and all persons having objections to the same are notified to present them said court on or before said time.

Dated, this 15th day of Sept., 1901.
J. L. COLLINS, executor.
