

HE does not have gumption till one has been properly cheated. Persons of gumption are using Ivory Soap, women who have trusted themselves too near the precipice of false economy and who can now appreciate the true economy in a soap made of pure vegetable oils and other high-class ingredients, but made in such quantity as to bring the price within the reach of the very poorest family. Indeed it is the very poor who most need it, for they can least afford the extravagance of common soap.

Deafness Cannot be Cured

By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are cured by catarrh, which is nothing but an inflamed coating of the mucous surface. We will give \$100 for any case of deafness, caused by catarrh, that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.—F. J. Cheney & Co., Toledo, Ohio. Sold by druggists at 75 cents. Hall's Family Pills are the best.

OUR STATE FAIR Exhibit.

The Oregonian in speaking of the various county exhibits at the state fair says that as a whole they constitute the best agricultural display ever seen on this coast. Continuing it says: "The county exhibits are first, not because it is believed it stands better chance than the other counties, but because the exhibit was prepared by a woman who has shown great taste in the arrangement of the products she has gathered together. Mrs. F. A. Wolfe, of Falls City, deserves great credit for her successful efforts. Aside from arranging in attractive style the thousands of vegetables, fruits, grains and grasses, she has constructed several neat designs that add novelty to a splendid demonstration of the prolific soil of old Polk County" "neatly framed flowers, at once catches the eye on entrance to this booth. The visitor at once spends several minutes in examination of the display of products to which he is thus so appropriately introduced. Over the entrance to the booth, and just inside the name of the display, hangs a huge ball made of grains and grasses and having a tongue made of a small bundle of wheat in the straw. Back on the farther side of the booth stands a tall ladder made of grain. Standing against the wall, it may represent that the grain growing industry in Oregon has been but a ladder by means of which the West-foot farmer may climb to other things. Were it surmounted with dry products, prunes, hops, etc., the strength of the imagination would be none the less difficult. Mrs. Wolfe has been at the fair before and has learned by experience how to put a display together so as to attract attention. She has 64 varieties of wheat, 22 of oats, 11 of barley, 25 of potatoes, 50 of apples, 20 of cranberries, 1 of cannel fruit, 20 of melons, 20 of squashes and every kind of garden vegetable possible. She had cherries fresh from the tree, and to keep them fresh had stripped the foliage from off where the fruit grew, and then covered the limb with cheese cloth to keep the birds away. She says that stripping off the foliage stops the limb from breathing, and the fruit will keep from cherting. The fair time is the time to settle their accounts at this office as soon as the harvest season is over. This is to remind them and all other delinquents that we greatly desire at least partial payments. Please bring or send what you can now. Do not wait for a more convenient time. All postmasters are authorized to receive and remit subscription, retaining 10 per cent for their trouble.

Mr. J. C. Clark, of Zeuna, reports to the weather bureau as follows: "Threshing is all done and the average yield of winter wheat is safe to say, 22 bushels an acre, spring wheat 15. Oats 35. Hoop picking is about completed—three-fourths of a full crop, but excellent in quality. Evaporators are being crowded to their full capacity. Italian prunes are a full crop, but the berries less than half a crop. The rain of Friday night came too late to benefit potatoes, which will yield less than one-third of a crop in this vicinity. The late apple crop is very light, not being a fourth of a crop. Very little wheat has been sown—waiting for rain."

The Renewal a Strain.

Vacation is over. Again the school bells ring at morning and at noon, again with tens of thousands the hardest kind of work has begun, the renewal of which is a mental and physical strain to all except the most rugged. The little girl that a few days ago had roses in her cheeks and the little boy whose lips were then so red you would have thought they had been "kissed by strawberries," have already lost something of the appearance of health. Now is a time when many children should be given a tonic, which may avert much serious trouble, and we know of no other so highly to be recommended as Hood's Sarsaparilla, which strengthens the nerve, perfects digestion and assimilation, and aids mental development by building up the whole system.

Sprung Valley Crops.

P. F. Clark, of Zeuna, reports to the weather bureau as follows: "Threshing is all done and the average yield of winter wheat is safe to say, 22 bushels an acre, spring wheat 15. Oats 35. Death of Miss Maud Baxter.

After graduating from the McMinnville high school she taught at Enterprise and Pioneer on either side of her Salt Creek home and had the prospect of a bright future. But after a brief illness with quick consumption she passed away last Wednesday. The funeral occurred at the family home yesterday afternoon and she was gently and affectionately laid to rest among loved ones in the Salt Creek cemetery. She was a member of the Christian church and at her request the choir of that church in Dallas, M. D. Ellis, Andrew Holman, Mrs. E. F. Coad and Miss Ella Roy sang at her funeral. The pall bearers were C. L. Starr, W. F. Nichola, Allan Travis, W. H. Gaynor, Alva and Elmer Gilliam.

Special training for those preparing to teach will be a new feature in this department. In order that a full year's study may be credited, it is advisable that those contemplating study begin at once. The director also wishes to announce that if sufficient general interest is manifested, a choral class will be organized and some work of the masters will be studied and rendered at some suitable time; but it is necessary that the interest be general among the musical aspiring population.
