MEN AS THEY PASS.

General Palmer, commander in chief in India, is a physical giant, with iron gray hair and mustache, eloquent eyes and a cheery smile.

The recent death of J. A. Fayerweather leaves General Francis James Lippitt of the class of '30 the oldest living graduate of Brown university.

Lord Salisbury rides his tricycle before breakfast on bright mornings and so slowly that his daughter on her bicycle has some trouble to stay with him.

Ex-Mayor Daniel D. Whitney of Brooklyn, now in his eighty-third year, is president of an insurance company, director of a bank and proprietor of a wholesale grocery store.

It will surprise a good many people to learn that J. Pierpont Morgan at one period of his career was a poet. One of his direct ancestors wrote and recited poetry of no mean order.

President McKinley is planning to make a trip to the northwest early next summer, visiting Washington, Oregon and the northern belt of states, taking in the Yellowstone park, which he has never seen.

Dr. Niels Finson of Copenhagen, the discoverer of the new magnetic rays, is a young man, sky, slender, but full of enthusiasm. He says sunlight will do us good in the end than any adaptation of electricity.

Professor Huxley once wrote in regard to a scientific congress over which he was to preside, "All this week I shall be occupied in hearing one jackass contradict another jackass about questions which are of no importance."

Jacob M. Anshy of York, Pa., has read the Bible from cover to cover 57 times. With his wife he began reading the Scriptures in 1861. Mrs. Austin died in 1857, but he kept on reading and expects to continue his studies as long as he lives.

The unjust practice of punishing pupils by deducting credits for scholarship has been forbidden in the San Francisco schools.

Crozier Theological seminary has a grand old man for president in the Rev. Dr. Henry G. Watson. He is over 80 years of age, but performs all his school duties.

Dr. Albert Hurd of Knox college has held a chair at that institution just half a century and has taught 62 years in all. At the college he has instructed for different classes in science, Latin, English literature, Greek and history. This is a record in length of service and versatility.

Theophile Ribot, professor of experimental psychology at the College de France, the founder of the Revue Philosophique and the inspirer of an entire generation of students and professors of the new psychology not only in France, but all over the world, will retire on a pension at his own request at the beginning of November.

The Wesley Methodist Episcopal church congregation of Marion, O., have introduced free bathrooms into their newly completed church building.

Dr. Ker Gray's speech at 9 o'clock services for the people in evening dress at St. George's chapel, London, continue a great success. Ladies wear their opera diamonds.

Rev. Theodore Cuyler of the Lafayette Presbyterian church, Brooklyn, has refused his consent to the erection of a monument of himself in Cuyler park, Brooklyn.

The Rev. Edward Schnadhorst has been pastor of a London church for 43 years without a salary. He is a man of independent means, who in 1858 dedicated his life work among the poor of the east end of London.

In a public address the other day the archbishop of Canterbury remarked that only three years ago he was an "odd" man who did not indulge in intoxicating liquors, but that public opinion in England was so rapidly changing that it seemed likely before long the "odd" man would be he who did thus indulge.

ARMY AND NAVY.

Under the new French military law organizing the colonial army the marines cease to belong to the department of the marine and are transferred to the minister of war.

Germany's new military uniform will be of grayish brown cloth for coat and trousers and cap. The helmet will be of brown cloth and will have the brass spikes. All shining buttons, buckles and ornaments will be done away with.

Men who are enlisted for service in the navy are not to be assigned to service in submarine boats without their consent, the bureau of navigation will recommend that special service enlistments for these vessels be authorized.

THE MALE SHIRT WAIST.

The shirt waist letter carrier is upon us, but he still delivers the mail in wrappers—Omaha Bee.

If the shirt waist had a tendency to conceal bowlegs, many of the men would look on it with more favor.—Chicago Record-Herald.

The Apple Tree.

Trimming the apple tree is a tough question. What is an excellent rule for the close upright growers would be the reverse for the open straggling ones. Anyway the trimming should be done while the tree is young and never to such an extent as to expose the main trunk to the heat or cold.

It is a question as to the age we should grow an apple tree on account of giving finer fruit, ease of spraying, of cultivating and gathering fruit, the young orchard only pays and that it is cheaper to grow young trees in place of the old ones. On the average year the margin of profit is not large; therefore it is not worth while to use great care to preserve old trees from decay caused by trimming. In fact, it is not necessary to trim off dead wood when the tree is dormant and bark is tight, as no material damage will be done to the tree.

Gathering the fallen fruit is important on account of contagion of fungous diseases, as ripe rot. As to the cooling moth, unless apples are blown off by high wind, he is always gone before the apple falls, so we catch him by spraying.

The borer is said to only work under protection of weeds or litter. If soil is kept clean, there is little danger. However, better keep looking for his work. A little sawdust is evidence. If you see the sawdust, look for the borer and get him out. Have had little experience, but know he kills trees when left to have his way.

The flat headed borer has been more troublesome to us. This borer is sure to attack the tree where the sun strikes trunk or limb. The remedy is to cut him out.

If the tree has a crook, let it be planted so the sun will not strike that portion. Plant young trees and keep them growing. Farm the head low and dense enough to shade.

All leaf eaters are absent when we

Dark Hair

"I have used Ayer's Hair Vigor for a great many years, and although I am past eighty years of age, yet I have not a gray hair in my head."
Geo. Yellott, Towson, Md.

We mean all that rich, dark color your hair used to have. If it's gray now, no matter; for Ayer's Hair Vigor always restores color to gray hair.

Sometimes it makes the hair grow very heavy and long; and it stops falling of the hair, too.

50c a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

PULPIT AND PEW.

The Wesley Methodist Episcopal church congregation of Marion, O., have introduced free bathrooms into their newly completed church building.

Dr. Ker Gray's speech at 9 o'clock services for the people in evening dress at St. George's chapel, London, continue a great success. Ladies wear their opera diamonds.

Rev. Theodore Cuyler of the Lafayette Presbyterian church, Brooklyn, has refused his consent to the erection of a monument of himself in Cuyler park, Brooklyn.

The Rev. Edward Schnadhorst has been pastor of a London church for 43 years without a salary. He is a man of independent means, who in 1858 dedicated his life work among the poor of the east end of London.

In a public address the other day the archbishop of Canterbury remarked that only three years ago he was an "odd" man who did not indulge in intoxicating liquors, but that public opinion in England was so rapidly changing that it seemed likely before long the "odd" man would be he who did thus indulge.

The Apple Tree.

Trimming the apple tree is a tough question. What is an excellent rule for the close upright growers would be the reverse for the open straggling ones. Anyway the trimming should be done while the tree is young and never to such an extent as to expose the main trunk to the heat or cold.

It is a question as to the age we should grow an apple tree on account of giving finer fruit, ease of spraying, of cultivating and gathering fruit, the young orchard only pays and that it is cheaper to grow young trees in place of the old ones. On the average year the margin of profit is not large; therefore it is not worth while to use great care to preserve old trees from decay caused by trimming. In fact, it is not necessary to trim off dead wood when the tree is dormant and bark is tight, as no material damage will be done to the tree.

Gathering the fallen fruit is important on account of contagion of fungous diseases, as ripe rot. As to the cooling moth, unless apples are blown off by high wind, he is always gone before the apple falls, so we catch him by spraying.

The borer is said to only work under protection of weeds or litter. If soil is kept clean, there is little danger. However, better keep looking for his work. A little sawdust is evidence. If you see the sawdust, look for the borer and get him out. Have had little experience, but know he kills trees when left to have his way.

The flat headed borer has been more troublesome to us. This borer is sure to attack the tree where the sun strikes trunk or limb. The remedy is to cut him out.

Take a crocheted stick and remove the bark. Make a ring about 20 inches in diameter out of stout wire—tele-

graph wire is about right. Next take a piece of burlap and sew into bag shape, then sew the wire ring into the mouth of the bag and fasten it into the crocheted stick so it will swivel, and the device is ready for use. It is well to have on hand one or two poles of different lengths and two short straps with which to unite them.

This device will reach a swarm 30 feet from the ground. The great feature of it is its lightness, and no matter at what angle the pole is held the bag is always perpendicular. To have a swarm whose queen is at large with the bees, bring the swarm catcher right up under the cluster and give it a sharp jerk upward and the cluster will drop from the limb right into the mouth of the catcher. Carry to the hive and turn the bag inside out, and the bees will drop in front of the hive and run into it.

A USEFUL ROSE.

Of Almost Constant Worth and Beauty Throughout the Year.

The figure from American Gardening shows a single plant of Rosa multiflora, height, 7 feet 6 inches; diameter, 11 feet. A correspondent says: "I consider this one of the most useful roses grown because of the many places in which it can be used and yet not be rather unsightly some time in the year. In the early spring, of course, like all the other roses, its greenery is beautiful, but more so because of its freedom from the stiffness of most other rose-bushes. In June it is noticeable for the number of flowers."

For August it is still holding its own as a green bush, while the other roses are hardly presentable. A month or so later you may think it not so bad, and as the season slips into winter the slight thousands of bright scarlet berries, above the carpet of snow perchance, makes you speculate at what time of the year—April, June, December or March—Rosa multiflora is at its best.

"It may be very effectively used as a border plant in the semiwild spots in the wood or at a water crossing."

To Clean Brass and Steel.

To clean brasses quickly and economically rub them well with vinegar and salt or oxalic acid. Wash immediately after the rubbing and polish with tripoli and sweet oil. Unless the acid is washed off the thing will tarnish so quickly its last estate will be worse than its first. Copper kettles and saucepans, brass andirons, fenders, candlesticks and trays are best cleaned with vinegar and salt. Cooking vessels in constant use need only to be well washed afterward. Things for show, even pots and pans, need the oil polishing, which gives a deep, rich yellow luster, good for six months. Oxalic acid and salt is the thing for furniture brasses. If it touches the wood around, it only improves the tone. Wipe the brasses well with a wet cloth and polish thoroughly with oil and tripoli. Sometimes powdered rotten stone does better than tripoli. Rub after using either with a dry cloth or leather until there is no trace of oil. No matter what sort of brass is to be cleaned it must be freed completely from grease, caked dirt and grime. Wash with strong ammonia and rinse dry before beginning with the acid and salt.

The best treatment for wrought steel.

Has Seen Many Chances.

Daniel Hancock, a venerable Bostonian, who celebrated his ninetieth birthday the other day in the Hub, is said to be the last survivor of the ancient and long extinct Boston watch.

In the days before Boston had a regular force of police patrolmen Mr. Hancock was one of the men who, wearing a cape of office and armed only with a pike of mediaval design, patrolled the narrow and crooked streets of the city. In the place of a police whistle or other modern device for sounding an alarm he carried a huge rattle, the sound of which could be heard for many blocks. At regular intervals he called the hours and sounded his rattle to wake up the sleepy people of Boston and let them know that all was well. Mr. Hancock declares that the city is much wickeder now than it was. In the days when he carried a pike and wore a cape there was rarely if ever an arrest made.

ROSA MULTIFLORA AS A DECORATIVE PLANT.

FOLDING HAMMOCK AND CHAIR.

no hooks or other attachments, being complete in itself. For those to whom the swinging motion of the hammock gives a feeling of nausea it may be that the different direction of the movement of this new invention will be found more comfortable. When it is desired to use the device as a chair, the supports at the center are loosened to allow the four end braces to tilt nearer together at the top, when the slack in the fabric can be drawn toward one end. As a person sits down the chair will tilt into its proper position and provide a comfortable seat. The patent on this invention has been granted to John E. Bergsten of Chicago.

Joe Meyers & Sons

Ages 4 to 12 years.
By mail postpaid 25c. Send in your orders. Prompt service given

Send us 25 cents for one of these new dipfrontwaist holder and skirt supporter. Thousands now in use.

AGRICULTURAL IMPLEMENTS, WAGONS, BUGGIES, BICYCLES, SEWING MACHINES.

This is my line of goods carried at my new stand at 255-257 Liberty street, Salem. I have the Studebaker line of wagons and buggies and all the other lines of implements that Mr. Croisan, my predecessor carried, and besides this have taken with me my big trade on bicycles and sewing machines.

F. A. WIGGINS,
257 Liberty street, Salem

which has a knack of growing gray, lustless and ill looking, is to first wash it very clean with a stiff brush and ammonia, soap, and rinse well. Dry, by heat if possible, then oil plentifully with sweet oil and dust thickly with powdered quicklime. Let the lime stay on two days, then brush it off with a clean, very stiff brush.

Before wetting any sort of bric-a-brac and especially bronzes remove all the dust possible. The less dust water finds about the fine lines and crannies the less it can leave there. After dusting wash well in strong white soap and ammonia, rinse clean, polish with just a suspicion of oil and rotten stone and rub off afterward every trace of the oil. Never let acid touch bronze.

Chair or Hammock.
Below is to be seen a novelty in a combination chair and hammock which, being capable of numerous adjustments, should prove itself a very comfortable piece of furniture for the porch or lawn. The ordinary hammock has to be suspended from trees or the side of a building, and this sometimes prevents its use, but the new arrangement needs

no hooks or other attachments, being complete in itself. For those to whom the swinging motion of the hammock gives a feeling of nausea it may be that the different direction of the movement of this new invention will be found more comfortable.
