We buy goods nearly every day-it is the only way to keep your stock fresh and new. In our grocery department we keep our handsomest clerk and our sweetest goods. But for more value for your money you must buy more expensive things. We excel in spring and summer dress goods—all colors and qualities. Most of them are not mercerized, but they are so slick you would think they were. We have a very nice line of shirt waists—nice in style and cheap. And ladies' neckwear, ties and collars, we lead them all. We have as fine a line of shoes as you will find anywhere, and you will be surprised how cheap they are. We still have a few pairs of ladies and mens' shoes left, \$2 to \$5 values for \$1. In mens hats we have an overstock, nice ones too, and you will miss it if you do not buy of us. In gentlemens' furnishings we are able to give you exceptional values at prices that will make you happy. In clothing if we cannot fit you from the counters, we can take your measure and have a suit made, fit guaranteed, and at prices below them all. See the samples. And so it is all the way through, and a fair deal, one price to all.

BUTLER & COAD: Attorneys for plaintiff,

Feeding cattle for market is a pleasant occupation if one is so situated as is the most essential, the kind of stock and because it originated from a hornor the feeding lot. One thing I do less Shorthorn cow and has been bred know, and that is it is very important | pure in Shorthorn blood. The other that the stock should be kept quiet; that the feed lot be off from the road, Made by human skill is coarse compared with the lining of the bowels.

When this tender mem rane is irriplace to go into in stormy weather, and place to go into in stormy weather, and these shelters should always be provid-P. U. at 7:00. Prayer meeting Wed-nesday evening.—J. R. G. Russell, rhoes and cholera morbus. Whatev-er be the cause of the trouble, take Perry Davis' Painkiller according to should have their bedrooms in a sepathe directions with each bottle. Trav- rate corner, for the steers are apt to elers in all climates carry Painkiller step on and injure them. The cattle in their grip acks. Large bottles 25 should be fed regularly, rain or shine. It is better not to feed cattle too early in the morning, as this breaks them of their rest, nor too late in the evening Never feed more than the cattle will eat up clean at a time and keep the feed trough free from all cobs, etc., which might be left in them. If ear corn is fed, I would break it as often as possible, for the smaller the better for roughness. In my opinion nothing is better than corn fodder with the corn in it. Water is a most important consideration. The tank should be in a nice warm corner and furnish an abundance of clean fresh water. A filthy tank with muddy water is not a fit place for a nice clean steer to drink

from. Princess of Wayne VII.

This fine Holstein-Friesian cow is owned by Henry Stevens & Sons, Laconia, N. Y. In a communication to the Holstein-Friesian register Messrs. Stevens say: "We are sending you cut of Princess of Wayne VII and her calf.

THE PRINCESS AND HER CALF.

The youngster was sired by Beryl Wayne's Paul De Col. On the 2d day of July last, before the Yeomans herd was offered for sale or we had any idea of buying it, we offered Messrs. Yeomans \$1,000 for Princess of Wayne VII. This offer they declined and refused to sell her at any price. At the time we bought the herd this cow was figured to us at \$1,800,"

Price of Texas Feeders. Reports from Wyoming are to the effect that the range owners in that state are having great difficulty in getting feeding cattle from southern sources to eat up the coming supply of grass. is stated that the prices demanded by Texas growers are from \$24 to \$26 per head as against \$21 and \$22 last season. The Wyoming men say that they cannot afford to pay the added cost as the margin, with so much to pay for freight and commissions, is too slight. They say that the additional \$2 to \$5 they must pay if they take the Texas feeders will just knock all the possible profit off the transaction, and it will not pay them to court probable losses without the corresponding chance to make money. Therefore the situation in Wyoming is rather mixed, but it is likely that it will level off after awhile, as it usually does,

CANCEROUS

ULCERS Are in many respects for the sores, and this resemblance often proves fatal. Valuable time is lost in fruitless efforts to heal the sore with washes and salves, because the germs of Cancer that are multiplying in the blood and the new Cancer cells which are constantly developing keep up the irritation and discharge, and at last sharp shooting pains announce the approach of the eating and sloughing stage, and a hideous, sickening cancerous sore begins its

sickening cancerous sore begins its destructive work.

No ulcer or sore can exist without some predisposing internal cause that has poisoned the blood, and the open discharging ulcer, or the festering sore on the lip, cheek or other part of the body will continue to spread and eat derper into the flesh unless the blood is purified and the spread and eat deeper into the flesh unless the blood is purified and the Cancer germs or morbid matter eliminated from the circulation.

S. S. S. cleanses the blood of all decaying effete matter. It has great antidotal and purifying properties that soon destroy the germs and poisons ISS carried to the ulcer or sore the healing process begins, the discharge ceases and the place heals over and new skin forms. S. S. S. is a strictly vegetable blood purifier containing no mercury or minerals of any description. and restore the blood to its natural condition. And when pure blood is

OUR NATIVE PLUMS.

Becoming More Popular Every Year. Growing and Marketing. Native plums are looking up, in the

estimation of the horticulturists. Comof the best varieties of native plums now on the market, grows them:
As the seedling plum trees are planted six feet apart each way for economy of space and after the second year cultivation is impracticable, the orchards have been heavily mulched. So far this has proved highly satisfactory in all respects. Marsh hay has been largely used formulching as well as other coarse material free from weed seed. This method has also been employed in the older orchards. It is necessary to renew the much once a year in or-

der to keep down weeds and grass. A space of about 20 by 100 feet was heavily mulched (about four inches) last spring with cinders. This seems

EFFECT OF THINNING NATIVE PLUMS. conserving moisture and preventing the growth of weeds and grass. It is probable that a mulch of some sort will prove the best plan for the home plum orchard. The native plum scems dean," says Dr. Hole of Rochester, to thrive better under this method of culture than other orchard fruits.

Not Thinned at all.

past. The plums at this stage are seller. I think the last is the best ofusually one-fourth to one-third grown fice of the three." and are thinned so that the remaining fruits are about one inch apart. This is somewhat expensive, especially with derived from thinning.

wholesale, and it is quite certain that the best fruits would have brought \$2 per bushel if that price had been ask-This was considerable more than peaches brought. The plums were picked from the trees while still firm and sorted before being sent to market. This is a paying operation and if carefully done need not injure the fruit. It is surprising how much the appearance of the baskets may be improved by the rejection of a small percentage of inferior fruit. The culls always sell readily for jelly fruit.

Among varieties Wyant, Forest Garden and Quaker still hold their own for size and quality. Hawkeye and Stoddard are large and attractive, but coarse and sour. Surprise, North Star and Brittlewood are all excellent. Beatty, Smith, Etta, Silas Wilson, Keith and Lottie are some of the newer varieties.

Of the various species of the native plum the Americana group is best adapted to the northwestern states.

As regards alring the plants, it is perhaps sufficient to say that what in this respect is healthful for huma lungs will suit the plants. But do not forget that the plants cannot take a walk on a pleasant day; hence fresh air should frequently be admitted to them from the window. In nature all trees and plants have their seasons of growth and of rest, a principle that must be observed in house plant culture. When therefore any plant, after a period of growth and bloom, shows signs of lessening growth, water also should be somewhat withheld. In a state of rest from growth most kinds can get along with lessened light also, and this we may take advantage of by putting such kinds as fuchsias, oleanders, hydran geas and scarlet geraniums in a light ellar while growth is suspended. Almost without exception it is best as the end of the resting season approaches, say in late winter, to shake the old soll from the roots and repot the plants in fresh earth. The Umbrella Plant.

As a window plant for amateurs the ambrella plant, Cyperus alternifolius, offers several advantages. It is nearly as ornamental as a palm, though of much more simple culture and rapid growth. It is comparatively free from insects and will thrive in a sunless vindow. An abundance of root mois ture and the foliage kept free from dust are the prime requisites. roots should never be allowed to be come dry. A very satisfactory method of growing is to pot in rich, alluvial soil and inclose the porous clay pot in a jardialere of water. Thus the necessary moisture is always at hand,

A Renson Worth Thinking About. A little girl from a crowded tenemet house was delightedly telling a frien in the College Settlement about her

enys a correspondent of Mechan's

Monthly.

"She's just a perfect lady, that's what she is," said the child. "Huh! How do you know she's perfect lady?" questioned her friend You've known her only two days." "It's easy enough telling," was the indignant answer. "I know she's a perfect indy because she makes me feel polite all the time."

The largest sum ever paid for a pre scription, changed hands in San Fran-cisco, August 30th, 1901. The trans fer involved in coin and stock \$112,500 and was paid by a party of business men for a specific for Pright's disease and diabetes, hitherto incural le diseases. They commenced the serious investigation of the specific November 15th, 1900. They interviewed scores of the cured and tried it out on its merits by putling over three dozmending them in Rural New Yorker, on cases on the treatment and watch-F. Cranefield of Wisconsin tells how ing them. They also got physicians an Iowa man, who has produced many to name chronic, incurable cases and administered it with the physicians for judges. Up to August 25th, eighty seven per cent of the test cases were either well or progressing favorably. There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address John J. Fulton Company, 420 Montgomery street, San Francisco, California.

The to Public.

Allow me to say a few words in praise of Chamberlain's Cough Remedy. I had a very severe cough and cold and feared that I would get pneumonia, but after taking the secand dose of this medicine I felt better three bottles of it cured my cold and the pains in my chest dissappeared entirely. I am most respectfully yours for health, Ralph S. Myors, 64 Thirty-seventh street, Wheeling, West Virginia. For sale by Adam K.

For Over Sixty Years.

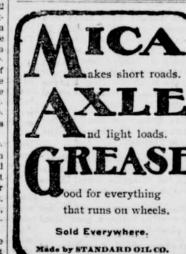

An old and well tried remedy. Mrs. Winslow's Soothing Syrup has been used for over sixty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. 25 cents a bottle. Its value is incalculable. Be sure and to serve the purpose as well as hay ask for Mrs. Winslow's Soothing Syrup and take no other kind.

A Choice of Professions.
