ITCHING HUMOURS

Complete External and Internal Treatment, One Dollar.

CUTICURA

The set, consisting of Cuticura Soap, to cleanse the skin of crusts and scales, and soften the thickened cuticle, Cuticura Ointment, to instantly allay itching, irritation, and inflammation, and soothe and heal, and Cuticura Resolvent Pills, to cool and cleanse the blood, and expel humour germs.

A Single Set, price $1, is often sufficient to cure the most torturing, disfiguring skin, scalp, and blood humours, rashes, itchings, and irritations, with loss of hair, when all else fails.

MILLIONS USE

CUTICURA SOAP, assisted by CUTICURA OINTMENT, the great skin cure, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excoriations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in pocket vials, 60 doses, price, 25c.

Sold throughout the world. SOAP, 25c.; OINTMENT, 50c. POTTER DRUG AND CHEM. CORP., Sole Props., Boston, U. S. A.

Impure Drinking Water

Is always a source of danger. Dysentery and bowel troubles follow its use. Every person should have handy a bottle of Painkiller (Perry Davis), which will quickly cure these distressing ailments. Be careful and see that the storekeeper does not pawn off some worthless substitute upon you as is sometimes done for the sake of a few cents extra profit. Large bottles 25 and 50 cents.

Mating.

The number of hens which should be mated to one male varies with the different breeds. In Barred Plymouth Rocks fifteen females may be mated to one male and 95 per cent of fertile eggs be obtained. Twenty-four Brown Leghorns may be mated to one male and equally good results obtained. All hens should be perfectly healthy and vigorous and should be mated to males equally vigorous and healthy, for in the breeding pens lie the germs of disease liable to sap the life of the young chick or a strong, vigorous constitution that will give him life and new strength with every day he grows older.

Even a Stoic Groans

Under the torment of neuralgia, when every nerve in face or limb throbs and jumps. Philosophy can't endure this agony, but Perry Davis' Painkiller relieves it. Bathe the affected parts freely, keep them warm and do not expose yourself to cold and damp ness. Medical science march s right along, but it has not found the equal of Painkiller in the treatment of neuralgia.

Final Settlement.

NOTICE IS HEREBY GIVEN THAT THE UNdersigned administrator of the estate of Malana Vanderpool, deceased, has filed his final account as such administrator in the county court of Polk county Oregon, and that said court has set the hearing thereof on Saturday, July 5, 1902, at the hour of 10 o'clock in the forenoon of said day, and all persons having objections to the same are notified to present them to said court on or before said time.

Dated, this 5th day of June, 1902.

I. M. SIMPSON,

Townsend & Hart, attorneys.

GEMS IN VERSE.

OLD FAVORITES.

Heaven Alone Is Given Away.

Earth gets its price for what earth gives us.
The beggar is taxed for a corner to die in;
The priest hath his fee who comes and shrives us;
We bargain for the graves we lie in.
At the devil's booth are all things sold;
Each ounce of dross costs its ounce of gold.
For a cap and bells our lives we pay;
Bubbles we buy with a whole soul's tasking.
'Tis heaven alone that is given away;
'Tis only God may be had for the asking.
—Lowell.

Influence of Good Deeds.

A traveler through a dusty road
Strewed acorns on the lea,
And one took root and sprouted up
And grew into a tree.
Love sought its shade at evening time
To breathe its early vows,
And age was pleased in heats of noon
To bask beneath its boughs.
The dormouse loved its dangling twigs,
The birds sweet music bore;
It stood, a glory in its place,
A blessing evermore!

A little spring had lost its way
Amid the grass and fern;
A passing stranger scooped a well,
Where weary men might turn.
He walled it in and hung with care
A ladle at the brink.
He thought not of the deed he did,
But judged that toil might drink.
He passed again, and, lo, the well,
By summers never dried,
Had cooled ten thousand parching tongues
And saved a life beside!

A dreamer dropped a random thought;
'Twas old and yet was new—
A simple fancy of the brain,
But strong in being true.
It shone upon a genial mind,
And, lo, its light became
A lamp of life, a beacon ray,
A monitory flame.
The thought was small, its issue great,
A watchfire on the hill;
It sheds its radiance far adown
And cheers the valley still!

A nameless man amid a crowd
That thronged the daily mart
Let fall a word of hope and love,
Unstudied from the heart.
A whisper on the tumult thrown,
A transitory breath.
It raised a brother from the dust;
It saved a soul from death.
O germ! O font! O word of love!
O thought at random cast!
Ye were but little at the first,
But mighty at the last!
—Charles Mackay.

Nearer Home.

One sweetly solemn thought
Comes to me o'er and o'er—
I'm nearer my home today
Than I have ever been before.

Nearer my Father's house,
Where the many mansions be;
Nearer the great white throne,
Nearer the crystal sea.

Nearer the bond of life,
Where we lay our burdens down;
Nearer leaving the cross,
Nearer gaining the crown!

But the waves of that silent sea
Roll dark before my sight
That brightly the other side
Break on a shore of light.

Oh, if my immortal feet
Have almost gained the brink;
If it be I am nearer home
Even today than I think,

Father, perfect my trust!
Let my spirit feel in death
That her feet are firmly set
On the rock of a living faith!
—Phœbe Cary.

Under the Violets.

Her hands are cold, her face is white;
No more her pulses come and go;
Her eyes are shut to life and light.
Fold the white vesture, snow on snow,
And lay her where the violets blow.

But beneath a graven stone,
To plead for tears with alien eyes,
A slender cross of wood alone
Shall say that here a maiden lies
In peace beneath the peaceful skies,

And gray old trees of hugest limb
Shall wheel their circling shadows round
To make the scorching sunlight dim
That drinks the greenness from the ground
And drop their dead leaves on her mound.

When o'er their boughs the squirrels run
And through their leaves the robins call,
And, ripening in the autumn sun,
The acorns and the chestnuts fall,
Doubt not that she will heed them all.

For her the morning choir shall sing
Its matins from the branches high,
And every minstrel voice of spring
That trills beneath the April sky
Shall greet her with its earliest cry.

When, turning round their dial track,
Eastward the lengthening shadows pass,
Her little mourners, clad in black,
The crickets, sliding through the grass,
Shall pipe for her an evening mass.

At last the rootlets of the trees
Shall find the prison where she lies
And bear the buried dust they seize
In leaves and blossoms to the skies,
So may the soul that warmed it rise!

If any born of kindlier blood
Should ask, What maiden lies below?
Say only this: A tender bud
That tried to blossom in the snow
Lies withered where the violets blow.
—Holmes.

Speak Gently.

Speak gently: it is better far
To rule by love than fear.
Speak gently; let no harsh words mar
The good we might do here.

Speak gently to the little child;
Its love be sure to gain;
Teach it in accents soft and mild;
It may not long remain.

Speak gently to the aged one;
Grieve not the careworn heart;
The sands of life are nearly run;
Let such in peace depart.

Speak gently, kindly to the poor;
Let no harsh tone be heard;
They have enough they must endure
Without an unkind word.

Speak gently to the erring; know
They must have toiled in vain.
Perchance unkindness made them so;
Oh, win them back again!

Speak gently; love doth whisper low
The vows that true hearts bind,
And gently friendship's accents flow,
Affection's voice is kind.

Let them call it mischief;
When it is past and prospered, 'twill be virtue.
—Ben Jonson.

Crop Conditions.

The April report of the statistician of the department of agriculture shows the average condition of winter wheat on April 1 to have been 78.7 against 91.7 on April 1, 1901, 82.1 at the corresponding date in 1900 and 82.4 the mean of the April averages of the last ten years. The averages of the principal states are as follows: Pennsylvania 82, Ohio 77, Michigan, 83, Indiana 81 Illinois 90, Tennessee 60, Texas 72 Kansas 73, Missouri 91, Nebraska and California each 93 and Oklahoma 67.

FARM AND GARDEN

CELERY CULTURE.

Growing the Plants—Insect Enemies of the Young Crop.

Celery seed, like that of parsley, carrot and parsnip, parts with its vitality very quickly and is practically worthless when kept over until the second year. For sowing seed during the early part of the season the plan best suited to the requirements of the farmer or amateur grower of celery is to secure a wooden flat or tray (see the first cut) about sixteen or twenty-four inches deep, with plenty of small holes in the bottom for drainage. After filling with sifted soil stroke off even with the top and either shake down the soil or press it down by means of a board before the seeds are sown. Either sow in drills two inches apart or scatter broadcast and cover by sifting on a mere sprinkling of leaf mold or sand by means of a fine sieve.

This tray can be placed in the window of a moderately warm room in the dwelling, and the soil should be watered by sprinkling very lightly as often as necessary to keep the surface from showing dryness, but the soil should not become waterlogged. The seedlings will appear in from two to three weeks, after which the tray should be turned round once each day to prevent the plants "drawing" toward the light. If early plants are needed on a somewhat larger scale, sow the seeds in like manner in a hotbed or on a greenhouse bench.

Flat or tray for early sowing or for transplanting, with marker for making holes in soil into which the seedlings are set.

For later plants, from which the main crop is to be planted, sow the seeds in a cold frame or in the open ground. Several methods are in vogue for starting celery plants in the open ground, and the one selected should depend entirely upon the scale on which the crop is to be grown. One plan is to sow the seed broadcast in a bed about three feet wide and of any desired length, from which the plants may be transplanted to another similar bed, and again to the open field, or they may be thinned and allowed to remain in the seed bed until the time for setting in the open ground, where they are to mature. Another method is to sow in drills ten or twelve inches apart.

The method now in use by most large growers is to prepare a tract of land by pulverizing with rose tools and then raking by hand, after which the seed is sown broadcast by means of a wheelbarrow grass seed drill. The soil is sometimes pressed down with a plank after the seeds are scattered, but some growers maintain that there is a decided advantage in leaving the soil slightly uneven, as the seeds fall into the shaded places and are protected from the direct rays of the sun. The seed will become sufficiently covered by rains or watering. Should more than 20 per cent of the seed usually sown germinate it will be necessary to thin out to prevent overcrowding, with its attendant injury. To prevent the surface of the soil becoming too dry it may be necessary to partially shade the young plants during the warm days of early summer, but the shading should never be so dense as to cause them to become drawn.

Some species of grasshoppers often prove destructive pests during the early part of the season where the celery is planted near meadows or other habitat of these insects. Where no fowls are allowed to run it is practicable to poison the grasshopper by means of wheat bran to which there have been added molasses and water and enough paris green to give the mixture a slightly green color.

THE CELERY LEAF TIER.

The celery leaf tier often becomes very troublesome, not only because it destroys the leaves by eating them, but by spinning a web and tying the leaves together. As a means of controlling this insect hand picking will be effectual on a small scale, but should they become very numerous it may be necessary to place open lamps in the celery field during the night to destroy the moths as they fly about to lay their eggs.—W. R. Beattie.

Agricultural Notes.

The activity in both the foreign horse and mule trade of the United States continues up to the present time.

English beans are upright, rank, bushy growers and have large, oval, coarse pods. There are not many beans in a pod, and they are usually shelled and eaten as peas. They are rich in flavor.

Massachusetts farmers who have tried it do not give encouraging reports of alfalfa.

Corn should be grown extensively, and the silo is the cheapest method of preserving it.

Indigestion.

When birds begin to mope around, not caring to eat, and their odors are found to be offensive, there is trouble that must be attended to at once or more complicated diseases will set in and many birds may die. The disease is indigestion, caused by feeding too much rich food. As soon as discovered the birds should be put on a plain diet, which should be reduced in quantity as well as quality. While their diet it will be wise to mix a little powdered charcoal or give the birds rhubard pills, a grain to each chick.

Line Breeding Turkeys.

I believe in line breeding for turkeys. With turkeys, the same as any stock or poultry, line breeding is not necessarily inbreeding. If you wish to establish a strain with certain markings you will never do it if you go out of that strain and make direct crosses on other strains. If you breed directly in line, getting new blood from another branch of the same family, you can by careful mating gain one-half to one point on their score. So you are each year getting a little nearer perfection.—Poultry Keeper.

Profits Without Bookkeeping.

A poultry keeper who did not want to be bothered with figures said he put in a box what money was received from the sale of eggs and fowls and took out the amount necessary to buy grain. No account was kept of the eggs and fowls used and eaten, but as the box always had money in it he could easily tell the profit from the fowls.

Kingly Superstitions.

Kingship has been kin to superstition always. James I. of England was superstitious about dates, and there were remarkable coincidences in his life with certain dates of the calendar. The day of the month on which he was born was strangely interwoven with the days of birth and marriage of his wife and some of his children and their wives. But James was an old fool who made love to young Buckingham, who laughed in his face and robbed him of his jewels.

Napoleon was superstitious about the way he put on his stockings. Frederick the Great and the great Peter of Russia were superstitious about dozens of things. Marlborough, both as Jack Churchill and the duke, was superstitious as well as a thief and a traitor. Nearly all the Stuarts were superstitious and double dealers in religion. Henry of Navarre was superstitious, but that never kept him from a thousand infidelities. All the children of Catherine of Medici were scared to death by their superstitions, but they could lie, cheat and murder just as well. If Cromwell was a victim of superstition, he kept it to himself

MALARIA An Invisible Enemy to Health

Means bad air, and whether it comes from the low lands and marshes of the country, or the filthy sewers and drain pipes of the cities and towns, its effect upon the human system is the same.

These atmospheric poisons are breathed into the lungs and taken up by the blood, and the foundation of some long, debilitating illness is laid. Chills and fever, chronic dyspepsia, torpid and enlarged liver, kidney troubles, jaundice and biliousness are frequently due to that invisible foe, Malaria. Noxious gases and unhealthy matter collect in the system because the liver and kidneys fail to act, and are poured into the blood current until it becomes so polluted and sluggish that the poisons literally break through the skin, and carbuncles, boils, abscesses, ulcers and various eruptions of an indolent character appear, depleting the system, and threatening life itself.

The germs and poisons that so oppress and weaken the body and destroy the life-giving properties of the blood, rendering it thin and watery, must be overcome and carried out of the system before the patient can hope to get rid of Malaria and its effects.

SSS

S. S. S. does this and quickly produces an entire change in the blood, reaching every organ and stimulating them to vigorous, healthy action. S. S. S. possesses not only purifying but tonic properties, and the general health improves, and the appetite increases almost from the first dose. There is no Mercury, Potash, Arsenic or other mineral in S. S. S. It is strictly and entirely a vegetable remedy.

Write us about your case, and our physicians will gladly help you by their advice to regain your health. Book on blood and skin diseases sent free.

R·I·P·A·N·S

Ripans Tabules Doctors find A good prescription For mankind.

Ripans Tabules are a common sense, effectual cure for dyspepsia, biliousness, heartburn, headache, constipation, dizziness and all disorders of the stomach, liver and bowels. They are intended for the use of men, women and children everywhere, and have proved beneficial in the majority of cases. It is not claimed that they will perform miracles, but some of the cures which they have effected amount almost to that. Easy to take and prompt in action, they have no rival as the best remedy for the every-day ills of humanity.

A MEDICINE WHICH PROLONGS LIFE.

"I have used Ripans Tabules for a number of years and would not be without them. I was troubled with indigestion and constipation, and have received since I have been using them that I am getting rid of those terrible bilious spells which confined me to bed on account of the dizziness. Of late I have not had any. I had just got over a bad spell of bilious fever and was sitting on the step, when a neighbor came to me and remarked how bad I looked. I told him I had just got over the fever and that I was afraid to eat anything on account of indigestion, from which I had suffered since I was quite young. He advised me to take Ripans Tabules. I said I would try them, and from then I haven't been without them. I can eat anything, providing I finish with a Tabule instead of dessert. I feel very thankful that I have found something that will prolong my life."

GASTRIC TROUBLES.

"I had suffered three years at least from gastric troubles. I could not sleep at night. My head ached and my feet would be cold as ice. My bowels were not regular and I would have such cramps from gases forming on my stomach that I would faint away. I was in such distress that I would have sooner died than live. About three months ago I was suffering and felt as if my body was tied up inwardly. My brother recommended Ripans Tabules to me. My husband obtained some for me from the nearest drug store and I would not now be without them. They relieved me of all the foul gases that formed in my stomach and they move my bowels regularly, for which I had been taking physics all the time. I have no more gases, my bowels move regularly, I have no more headaches and can sleep well; in fact, I feel as light as the air which I breathe, and that is saying a good deal for a woman who weighs 190 pounds. I am sorry that I did not commence using the Tabules a year ago, for they would have saved me a great deal of pain and suffering."

One gives relief

A Ripans Tabule, now and then,
Will benefit the wisest men.
And if dyspepsia's their woe,
Continued, R.I.P.A.N.S make it go.

At druggists.
The Five-Cent packet is enough for ordinary occasion. The family bottle, 60 cents, contains a supply for a year.

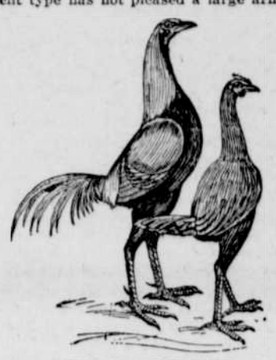
B. B. RED GAMES.

They Lead the Way, and Some of Them Bring Fancy Prices.

The Black Breasted Red games stand at the head of the game birds all over the world. They hardly need description, so well known are they. An important point is what is called station, and with the majority this means length of leg. We see many at our eastern shows that readily poke their heads through the top of the exhibition coop to look about or to crow. When in proper poise, the eye of the male is directly over the line of the shank. The original type was much like our Brown Leghorn males in shape and carriage.

The unnatural carriage of the present type has not pleased a large army



PAIR OF B. B. RED GAMES.

of English fanciers, and the result has been the revival of the Old English game. The recent contention as to the possibility of raising such games as the present type of standard games has had a lively inning in the American Fancier. At the same time real good ones are quite scarce, and we do not see any very large number of them with us in a whole year, but those who are fortunate enough to produce a few of them are able to dispose of them quickly at a better price than is paid for the average cow or horse, and surely they cannot call for equal trouble and expense in the rearing as must go to the bringing of either the cow or the horse to selling age.—Feather.

Animal Matter as Poultry Food.

Prepared foods put on the market are not intended to displace any of the essential materials—grains and vegetables—within the poultryman's easy reach, but rather to supplement these in accordance with the object desired. Prepared foods should be recognized only in proportion as it is desired to supply a deficiency in the foods usually available on the farm. This means that the feeder should have a fair practical knowledge of the essential ingredients of food—protein, fat and carbohydrates—usually recognized by the chemist in determining the comparative value of foods.

Of these three ingredients protein, or flesh forming matter, is the chief from the purchaser's standpoint. The fat and carbohydrates (heat producers) are found more generally in grains and vegetables. The richest and most concentrated sources of protein known are in dried blood and meat meal. The best dried blood should contain about 95 per cent, and meat meal should average at least 60 per cent of protein.

The value of poultry bone will largely depend on its richness in protein and phosphate (bone forming matter). The best green or raw bone should contain at least 30 per cent of protein, and the balance (70 per cent) should be bone forming and essential food mineral matter. This food in combination with either blood meal or meat meal is universally recognized as a valuable supplement in making balanced rations with grains, mill products and vegetables.—W. J. Thompson, B. S. A.

Good Records.

Phenomenal egg records, says Texas Farmer, are occasionally reported, and we should not dispute them, judging from the results we have obtained ourselves, although to obtain average individual records to exceed 200 eggs per hen we feel certain there is more time spent with the fowls than would be practicable from the standpoint of profit. A well bred flock of fowls will produce a few hens which will reach and some may pass the 200 egg mark with ordinary care, but when we read of records of 247 eggs per hen in a year in a recent egg laying contest we feel sure the fowls were provided with extra room, special comforts and closer attention than these same poultry keepers could afford to give them if only working for the profit from the market side. However, these cases should serve as illustrations of the possibilities and spur us on to better care and closer selection for profit.

The Two Hundred Egg Hen.

Does the so called 200 egg hen live, or is she only a myth?

In answer to this query Mr. Van Duser says: Yes, sir; she most certainly does live, and there are a whole lot of them. I saw at the Maine Agricultural college farm a flock of hens, the egg producing functions of which Professor Gowel had so developed that they produced 231 eggs each in one year. I do not recall the number of hens, however. We ourselves have a home record from 950 hens last year of 201 eggs each. They were single comb White Leghorns.—Hoard's Dairyman.

Fishing For Ducks.

In India an ingenious scheme is practiced for taking ducks on a line, which is attached at one end to a flexible stick stuck up in the mud, the other extremity having a double pointed needle of bone attached to it. The latter is baited by stringing upon it some grains of corn. Presently along comes Mr. Duck, swallows the needle and finds himself a captive the moment he tries to fly away. In olden times the Cape Cod fishermen depended largely for bait upon the seafowl they took on their voyages. To catch them they throw out fishing lines with hooks on the end, to which were attached chunks of cod liver. The latter floated because of the oil they contained, and murres, gulls and other birds swallowing them were quickly pulled in, skinned and chopped up.

Bright's Disease.

The largest sum ever paid for a prescription, changed hands in San Francisco, August 30th, 1901. The transfer involved in coin and stock $112,500 and was paid by a party of business men for a specific for Bright's disease and diabetes, hitherto incurable diseases. They commenced the serious investigation of the specific November 15th, 1900. They interviewed scores of the cured and tried it out on its merits by putting over three dozen cases on the treatment and watching them. They also got physicians to name chronic, incurable cases and administered it with the physicians for judges. Up to August 25th, eighty seven per cent of the test cases were either well or progressing favorably. There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address John J. Fulton Company, 420 Montgomery street, San Francisco, California.

The to Public.

Allow me to say a few words in praise of Chamberlain's Cough Remedy. I had a very severe cough and cold and feared that I would get pneumonia, but after taking the second dose of this medicine I felt better three bottles of it cured my cold and the pains in my chest dissappeared entirely. I am most respectfully yours for health, Ralph S. Myers, 64 Thirty-seventh street, Wheeling, West Virginia. For sale by Adam K. Wilson

For Over Sixty Years.

An old and well tried remedy. Mrs. Winslow's Soothing Syrup has been used for over sixty years by millions of mothers for their children while teething, with perfect success. It soothes the child; softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. Is pleasant to the taste. Sold by druggists in every part of the world. 25 cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup and take no other kind.

BEST FOR THE BOWELS

If you haven't a regular, healthy movement of the bowels every day, you're ill or will be. Keep your bowels open, and be well. Force, in the shape of violent physic or pill poison, is dangerous. The smoothest, easiest, most perfect way of keeping the bowels clear and clean is to take
