ELECTRICITY IS LIFE. (Salem Journal) Electricity is life. Lack of electricity is death. Electricity constitutes the chief element of the vital force of the brain and waste a large proportion of deaths are caused by heart failure, or a slow electrical state. Sickness indicates that the body is lacking in vitality or electricity, and the proper and natural remedy, therefore, is to supply the deficiency. The wonderful recuperative powers of electricity are clearly shown in the fact that when persons are at a stage where life has nearly gone, as in cases of drowning, poisoning, etc., electricity is applied as the surest and most powerful remedy. It succeeds where all else fails. Dr. Darrin has effected some marvelous cures by means of this wonderful force. The following list of those whom he has cured will doubtless prove interesting. B. Baxter, 178 Ferry street, Salem, Or., tumor cured. Mrs. L. G. Jaeger, of 136 south Thirtieth street, Tacoma, writes she is cured of an aggravated case of stomach liver trouble and sick headache. T. Austin's wife, 206 N 18th st., Portland, confined, to her room nine months with a affliction called "nervous abhorrence of light," accompanied with inflammation, cured by electricity. Truman Butler, The Dalles, Or., chronic rheumatism and contracted joints and impoverished blood, all of years' standing, given up by all treatments, cured by Dr. Darrin cured total deafness in one ear, cured in ten minutes. Also, a Pterygium, or fleshy growth, was removed from the eye which had nearly rendered him blind. Dr. Darrin gives free examination to all, and when necessary gives medicine in connection with electricity. The poor treated free from 10 o'clock daily, except medicines. At Panama, Columbia, by Chamberlain's Colic Cholera and Diarrhoea Remedy. Dr. Chas. H. Utter, a prominent physician, of Panama, Columbia, in a recent letter states: "Last March I had as a patient a young lady sixteen years of age, who had a very bad attack of dysentery. Everything I prescribed for her proved ineffective and she was growing more and more feeble. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhoea Remedy and as a last resort prescribed it. Within eight hours she was feeling much better; inside of three days she was upon her feet and at the end of one week was entirely well. For sale by A. K. Wilson. Very Dark. Quite a number of farmers living in the Waldo Hills have pooled 150,000 bushels of wheat and oats. Last year they thus received from 4 to 5 cents more per bushel than if they had sold in the open market. The King of England is still improving and his coronation is expected to take place August 9th, but there is so much uncertainty about it that it will probably be a tame affair.

His wife is a sister of Mrs. J. L. Collins. The question of what is to be paid for hop picking is being agitated and there are two sides to it. Those who may sell at 20 cents or more could well afford to pay 50 cents, but a big percent of the crop has been contracted at from 9 to 11 cents, and such growers cannot afford to pay 50 cents for picking. Therefore if a uniform price prevails it should be less than that figure. The other day we saw some little boys taking some light freight into a store. They got a nickel apiece and when the job was done were off in search of another. When asked what they were going to do with their money they replied, save it. The wheat harvest going on in Umattila county shows that the recent windstorm did great damage to grain. It is believed that the reduction from that cause will be nearly 1,000,000 bushels. Quite a discussion has arisen over the propriety of having the divinity school, a sectarian institution, in connection with the state university. Many prominent educators and ministers have expressed themselves very positively for or against. But the people at large will be indifferent, until it is shown that the university in some way suffers because of its relation to the divinity school or that it is a financial burden to the state. In different parts of the county many binders are changing teams and running nearly all night. Most farmers are getting to do more and better work and reaping greater results. Work is now in progress on a 15 mile railway at Cook Bay. It is expected to be the western terminus of the Great Eastern railway through to Salt Lake City. Most of it would be through a practically undeveloped country.

Mrs. Smith, the milliner, has rented her corner property to Mrs. Beck, of Salem, and will occupy the two rooms adjoining her millinery room over the store of Brown & Ellis. The July issue of The Outlook is an educational one and all who are concerned about that subject would find it of great interest. Almost every day an extra freight train loaded with lumber goes over the west side road via Corvallis and Albany to California. The present lumber prices at Corvallis are, rough \$9, flooring and rustic \$12 to \$20, sized \$10, shiplap \$11. The demand there for lumber greatly exceeds the supply, building operations being much delayed. There is to be a prune shortage all over the world, and already 500 tons is being offered for the best quality of the coming crop. G. W. Myer, of Smithfield, says threshing will begin around there in about a week and that the crop is an average one. He, S. T. Smith and others have sown some clover and will continue to raise it.
