If waterworks are put in the grounds will be otherwise beautified by cement walks, fountains, shrubs, rustic seats, etcetera. Our county court is up to date and will keep fully up with the town of Dallas in the way of progression.

It has been undeniably shown during the last two months that we need a sewer down Main and Mill streets, and need it badly, the ground being so polluted from adjacent closets that it is impossible to dig wells and get water fit to drink. This sewerage question should be taken up at once by our city council and no recess taken in the matter until these two sewers, at least, are built. Dallas is becoming too large a town and the center of too much trade to continue to enact the role of a little back woods village. Let us keep up with the procession.

Throughout Oregon farmers are changing from all grain to diversified cropping. The area of wheat is becoming less and that of grass greater. The increase of dairying has helped the price of grain by calling for more bran and shorts thus calling for more wheat being ground and better prices. In times past wheat growers were at the mercy of wheat buyers but now the farmers can be more independent and demand better prices. Flouring mill warehouses now get a big percent of wheat that used to be sent to rail-road warehouses for foreign shipment. It generally comes out most profitable to store in a local warehouse. The more nearly a farmer can avoid storage fees and sack rent and keep his grain under personal control the more he will make out of it.

He has refused none who have come to him needing his services and he has been perfectly frank in telling each one the true condition of his or her case, and just what might be expected as the result of treatment, or whether any treatment would do good.

Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhoea Remedy and as a last resort prescribed it. The most wonderful result was effected.
