appear not to be doing well, you will notice they invariably are at the end of the flock and feed from what the other sheep have pawed over. It is a good plan to have a small field (called the aursery or hespitab to put those that are seemingly not doing as they ought tion and get them started on the upward road again, says National Stockman. The proper handling of sheep re quires many small lots or fields, so that you may note closely if you wish to reach the highest results, as they do so much better to keep each age to themselves, so that you may not judge yearlings by the side of two-year-olds, or a two-year-old ewe raising a lamb

Cull your flock closely and at shearing time look after the fleece, and all that do not come up to the standard in weight, density, length of staple, quality of wool and evenness of fleece mark so that you may know them when the time comes to sort up for breeding. In order to have an even flock you must form in your mind that type of sheep you consider most desirform constantly before you, getting as near to it as possible, and what you are over for the senson." remedy in the rams.

A Frenk of Nature. Wool Markets and Sheep illustrates freak of nature in the shape of a four horned wether owned by Joseph E. Escalante, Utah, Mr. Griffin writes that the wether is five years old and was bred from common grade sheep. Each of the horns is about fif-

A FOUR HOENED SHEEP,

teen inches long, and the straight ones measure eight luches in circumference at the base. This wether shears ten pounds of worl per year. He runs with the flock owned by Mr. Griffin and takes his changes with the others. This is certainly a very curious departure from the usual course of nature.

Sheep Keep Down Weeds, Not the least of the values of the sheep on a farm is that of cleaning up the weeds on a stubble field after the small grains. They will eat nearly every variety that starts there so closely as to prevent their seeding and practi-cally to prevent their starting another season. There are some who claim that the same results can be obtained by reasons. If the weeds are allowed to 4,000 years before Christ, cench a stage of growth where they ave much value as a green manure pen seeds they have but little ferizing value, and the process must be ented very often. But if the sheep

Will sour the sweetest disposition and transform the most even tempered, lovable nature into a cross-grained and irritable individual. If impatience or fault-finding are ever excusable it is when the body is

tortured by an eating and painful sore. It is truly discouraging to find after months of diligent and faithful use of external remedies that the place remains as defiant, angry and offensive as ever. Every chronic sore, no matter on what part of the body it comes, is an evidence of some previous constitutional or organic trouble, and that the dregs of these diseases remain in the system; or, it may be that some long hidden poison—perhaps Cancer—has come to the surface and begun its destructive work.

The blood must be purified before the sore will fill up with healthy flesh

and the skin regains its natural color. It is and the skin regains its natural color. It is through the circulation that the acrid, corroding fluids are carried to the sore or ulcer and keep it irritated and inflamed. S. S. S. will purify and invigorate the stagnant blood when all sediment or other hurtful materials are washed out, fresh rich blood is carried to the diseased parts, new tissues form, and the decaying flesh begins to have a healthy and natural look; the discharge ceases and the sore heals.

WOMAN AND FASHION

A Beautiful Gown. Vivid and almost startling combine tions are decidedly the vogue today in dressy wear, and be they not too bizarre they are the very height of style. This effect is of a beautiful soft material in a delicate pastel shade. The waist is heavily adorned with road bands of heavy lace and self tucks and is trimmed with a narrow black and white torpedo braid.

FOR AFTERNOON OR EVENING.

yoke is a square Elizabethan effect. and below it the self material is very finely tucked. The front of the waist is a Gibson idea, and the sleeve is a full affair rather on the bishop order. The skirt shows the same wide tucks of self material as the waist, and between these are inserted bands of lace, which same face also trims the skirt on the lower portion in the back.

pastel tinted, fine face cloth it offers most unlimited scope for artistic ingenuity. One it has been my happy fate to meet of late was in a lovely shade of pale blue, fashioned very much on the lines of a full Inverness and most attractively adorned with wide entre deux of guipure Insertion down either front, a collar with long stole ends of black panne adding the always lovely touch of sable, while yet another equally recherche in kind was of white cloth, carrying a six inch border everywhere of Irish crochet lace, a pelerine of the same exquisite dentelle falling over a doublure of rose panne.—New York Mail and Express.

Neck Wraps. Neck wraps have taken on new glory and are in stole shape with long ends that hang nearly to the feet. In many instances the neck portion becomes a small cape and fits the shoulders snugly and perfectly. The ends are from five to six inches wide and quite flat. Some are tinished with tails, but others again are simply broadened slightly at the ends and left plain. Those of squirrel are charming. The gray is soft and becoming, the skin is pliable, and the hars rest caressingly against

the skin. The Ready Made Gown. Once upon a time a ready made gown was the recognized symbol of poverty and unsophistication. Today it is otherwise and to declare yourself a devotee of private makers is to admit being behind the times. Few women of even large fortune can withstand the charms of the models shown by the big stores, each of which strives to outdo the
