THE SUPERIOR.

It is superior in principle and tested capacity for feeding any and all kinds of material to be threshed by a separator, either loose or bound. By taking off the knives, which will require two or three minutes, it is well adapted to threshing loose stuff as it is for sheaves. I am ready to test its capacity and quality of work in competition with any other appliance for the same purpose. The constant must set a first class threshing outfit within 6 or 8 miles of Dallas and have enough material for half a day or more of test. They are to show their best capacity, quality and quantity of work and the amount of power and time required. Then I will set the Superior on the same outfit and test my \$120 feeder against \$120 cash to be placed in the hands of someone agreed upon. The said cash is to be paid to me if I am successful in the contest, but if I fail then the other party is to get back his money and my feeder. The contest is to be over the quality and quantity and the time and power required. Each of us is to choose a judge and they to select the third judge. The Superior's capacity in average length of straw is about 7-200 sheaves an hour. It does its work without clogging or unusual rattling, retarding grinding sound from the cylinder, thus proving it to be light on the power, and giving greater assurance of threshing and cleaning without waste. To introduce the Superior into the market, I offer it to anyone who has a good machine and a season's threshing engaged, with or without pay for one season's threshing. If not sold before close of the season it could then be purchased. Price made known on application to Thomas Elliott, Clay Street, Dallas, Oregon.

Danger of Colds and Grip. The greatest danger from colds and grip is their resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for these diseases we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that it is a certain preventive of that dangerous disease. Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers. They filter out the waste or impurities in the blood. If they are sick or out of order, they fail to do their work.

Pains, aches and rheumatism come from excess of uric acid in the blood, due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and extraordinary effect of Dr. Kilmor's Swamp-Root, the great kidney remedy, is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits.

Do not make any mistake, but remember this: Many doctors, Dr. Kilmor's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.
