Much That Every Woman Desires to Know

About Sanative Antiseptic Cleansing

And About Curing Ulcerative Pains and Weaknesses.

Too much stress cannot be placed on the great value of Cuticura Soap, Ointment and Pills in the antiseptic cleansing of the mucous surfaces and of the blood and circulating fluids, thus affording pure, sweet and economical local and constitutional treatment for weakening discharges, ulcerations, in-flammations, itchings, irritations, relaxflammations, itchings, irritations, relaxations, displacements, pains and irregularities peculiar to females. Hence the Cuticura remedies have a wonderful influence in restoring health, strength and beauty to weary women, who have been prematurely aged and invalided by these distressing allments, as well as such sympathetic afflictions as anemia, chlorosis, hysteria, nervousness and debility.

Women from the very first have fully appreciated the purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent

the certainty of speedy and permanent cure, the absolute safety and great economy which have made the Cuticura Soap, Ointment and Pills the standard skin cures and humour remedies of the

civilized world.

Millions of the world's best people
use Cuticura Soap, assisted by Cuticura Ointment, for preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, in the form of baths for annoying irritations, inflammations and ulcerative weaknesses, and for many sanative, autisantic purposes for many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the tollet, bath and nursery.

Are There Microbes at the Pole? One of the most peculiar arctic expeditions ever planned is that of Dr. J. Charcot, who will sall on May 15 from St. Malo, France, on a specially built ship. The expedition is also to be under the auspices of the Pasteur Insti-tute and the Museum of Natural His-tory of Paris. Dr. Charcot believes that the study of bacteriology may be all, by examinations of the intestines of polar animals for "primary" mi-erobes, which are so abundant in warm or temperate intitudes. A Professor Levin, it seems, disputes the existence of the point microbe, and Dr. Charcot is going up north to find out all about microbes within the frozen zone. A TURK'S LOVE

To those who believe that a Turk who purchases his wife and keeps a harem has no love story and knows nothing of the romance of love the following facts may be instructive. Suffice it to say that all the parties ex-cept the husband of the English girl referred to and Safvet Pasha are still alive, that I know them all personally and that I have simply altered their

names for various reasons; Hussein Bey—for so I shall call himwas a Turk of the Turks, of the bluest blood that ever flowed in the veins of a Moslem. His father was a pasha of great distinction, his mother the wor-thy daughter of a worthy follower of the prophet, and Hussein as a lad five times a day recited the Mohammedan creed with a fervor which left nothing to be desired.

In process of time Hussein developed artistic powers, which his parents were anxious to cultivate. "He must go to Paris," they said, "and learn painting of the giaours, who know more about these matters than the children of the prophet, whom Allah keeps in his eter-So Hussein's name was one day men-

For a couple of years Hussein held his appointment in the Turkish ambassador's suit, painting with such success under the care of a first rate Parisian master that at length his pictures, which were usually from inanimate nature, were accepted and exhibited in the salon, to the delight of Hussein and the satisfaction of the public. Now I should mention that, room be

ing scant in the embassy, Hussein had to find lodgings abroad and that he had taken apartments in the house of an English gentleman who resided in Paris. In that family there was a comedy British maiden-daughter c.' the head of the house-whose long eyelashes, tripping step, silvery laugh and pleas-ant conversation made a great impression upon Hussein Bey. Gradually as the days were on the Moslem youth fell in love with this dainty damsel, got to worship the ground on which she trod, sighed to make her his very own. And I grieve to say that the young lady, who should have discouraged these advances, smiled on his

At last he "popped the question," was accepted and even received by the father of the family with a hearty welcome. All he now had to do was to speak to the ambassador-a good hearted old pasha-and the thing could be arranged forthwith, for Hussein's father had died, leaving him moderately rich, and there need be no delay of the nuptials.

Away went Hussein to his chief,

"Excellency," he said as he bowed low and touched the ground in front of the pasha with the back of his hand, "I love a rare and radiant maiden named Ellen, an English girl. Give me your consent and I will be wed."
"Inshallah!" (Please God!) responded

It is a good plan to keep an old silk handkerchief on hand and after using the towel to rub the hands lightly with the handkerchief. Glycerin diluted with rosewater is the most satisfactory of all balms for the chapped hands. If the hands are badly chapped, the glycerin should be well applied before going to bed. An old pair of white kid gloves should be drawn on, and in the morning the painful roughness will have vanished.
