There is an old allegorical picture of a girl seated at a grass-hopper, but in the act of heedlessly treading on a snake. This is paralleled by the man who spends a large sum of money building a cyclone cellar, but neglects to provide his family with a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy as a safe guard against bowel complaint, whose victims outnumber those of the cyclone a hundred to one. The State Fair. No time in the history of the Oregon state fair has there been such a good feeling among the agricultural classes towards the success of the fair as exists at the present time. Every section of the state seems to be taking an interest in the fair and promises to give its hearty support. Eastern Oregon for the first time has promised one or two county exhibits, consisting of agricultural products, while the southern portion of the state will also be represented by a comprehensive exhibit of its agricultural products. Live stock from all over the state is being prepared for this year's fair. There are reasons for this awakening of the people to the support of the fair. One is the management has worked hard and faithfully to make the fair as broad as the state itself. The transportation companies have come to their assistance and made very liberal rates on hauling exhibits of all kinds. Another is, the people are beginning to realize that it is time to let the outside world know of the wonderful resources of our state and believe that the state fair is the proper place to meet the better class of homeseekers. This will make the fair doubly valuable. It will give those who are looking for homes on the Pacific coast an opportunity to see in a body what our state can produce, and where it is produced, without traveling all over the state at great expense. It will also give the exhibitor the best possible opportunity of showing his products, whether it be grain, grasses, fruits, vegetables or live stock.
