

TORTURING DISFIGURING

Skin, Scalp and Blood Humours

From Pimples to Scrofula, from Infancy to Age

Speedily Cured by Cuticura when All Else Fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalded head; the facial disfigurements, as in acne and ringworm; the awful suffering of infants and a variety of worn-out parents, as in milk crust, tetter and scabies—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy, have made them the standard skin cures, blood purifiers and humour remedies of the civilized world.

Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent to cool and cleanse the blood. This complete local and constitutional treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning and scaly humours of the skin, scalp and blood, and points to a speedy, permanent and economical cure when all else fails.

Sold throughout the world. Cuticura Resolvent, the only one of its kind, is sold in bottles of 50, 100 and 250 cents. Cuticura Soap, 100 and 250 cent boxes. Cuticura Ointment, 100 and 250 cent tins. Prepared by J. C. Ayer & Co., Lowell, Mass., U.S.A.

CHURCH DIRECTORY.

Preaching hours at 11 and 7.30.

M. E. CHURCH.
Preaching Sunday morning and evening. Sunday school at 9.45. Epworth League at 6.30. Prayer meeting Thursday evening—Jas. Moore, pastor.

BAPTIST CHURCH.
Preaching Sunday morning and evening. Sunday school at 10. B. Y. P. U. at 6.30. Prayer meeting Thursday evening—J. M. Green, pastor.

PRESBYTERIAN CHURCH.
Preaching Sunday morning and evening. Sunday school at 10. Christian Endeavor at 6.30. Prayer meeting Thursday evening—W. T. Wardle, pastor.

CHRISTIAN CHURCH.
Preaching Sunday morning and evening. Bible school at 10. Senior Christian Endeavor at 6.30. Bible class and prayer meeting Thursday evening—L. Green, pastor.

EVANGELICAL CHURCH.
Preaching Sunday morning and evening at the Dallas college chapel. Sunday school at 10. Christian Endeavor at 6.30. Prayer meeting Thursday evening—A. A. Winter, pastor.

Administrator's Notice.

NOTICE IS HEREBY GIVEN THAT THE UNDERSIGNED was appointed administrator of the estate of F. B. Wedder, deceased, by the county court of Polk county, Oregon, and he has taken the oath of office. All persons having claims against the said estate are notified to present the same, duly verified as required by law, to the undersigned in Salem, Oregon, within the term of three months from the date of this notice.

Dated this 10th day of June, 1908.
E. J. ROGGS,
Administrator of the estate of F. B. Wedder, deceased.

Breeding and Fattening Cattle

The practice of deboning animals that are to be put into feed yards has come largely into vogue during the last ten or fifteen years. It is generally conceded that, all things considered, it is much more humane to dehorn than it is to dehorn animals to run in the yards together, says Iowa Homestead. While the practice is commendable, it is the opinion of a number of feeders with whom we have discussed the matter recently that it has been carried a little too far.

When all animals are put into feed yards are deboned the tendency is for them to bunch together to much during dry time. In this way animals become too warm and consequently will not make the gains that they otherwise would if they could be kept scattered. Their object of course in bunching together is to lessen the agony caused by flies. Another disadvantage of close bunching is that it frequently results in tramping out the grass and destroying the soil.

Those who have tried it find that by leaving horns on a few of their best animals will thrive much better. Some prefer one animal in every half dozen to be horned while others claim that one in a dozen or fifteen is plenty to keep them from bunching. There is no question but that there is something in this theory, and we offer it as a suggestion at this time so that those who are raising animals extensively for block may be benefited thereby.

Corvallis is a jumping cow.

Here is a sure cure for the jumping cow, says a correspondent in Rural New Yorker: Take a pole eight or ten feet long, tie a rope around it nearly in the middle, big end at the back, and have the rope fast to a halter on the

HOW IT WORKS.

Fasten the rope to the pole, so when the cow lifts up her head and walks along the back end of the pole will drag on the ground and the forward end will lift up. When she comes to the fence, the end of the pole will run under the fence and hold her head down. She cannot jump.

Dried Blood For Calves.

The Kansas experiment station in reporting upon feeding dried blood as a preventive of scours says: "Dried blood is not only good for a weak calf, but is an excellent remedy for any calf subject to scours. With the scours head of young calves under experiment at the Kansas station during the past year there has not been a single case of scours that dried blood has failed to check.

"In feeding dried blood a teaspoonful at a feed is a great remedy. The blood should be continued until the scours disappear. In case of a weak calf the allowance may be gradually increased to a tablespoonful at a feed."

To prevent the dried blood from setting to the bottom of the pail, where the calf will be unable to get it, it may be stirred in the milk while the calf is drinking, or the milk and blood may be fed immediately after being thoroughly mixed.

"Since dried blood is such a cheap and effective remedy, it will pay any one who raises young calves by hand to have a little available whenever a calf shows signs of disorders in its digestive tract."

Baby Beef Production.

When feeding for baby beef, the feeder can use mixed bred calves that have been raised on ordinary skim milk and whole milk. It is a saving to vacinate the calves early so as to prevent blackleg.

Feed the calves twice daily, morning and evening. Feed in lots in the same order each time and exactly at the same time each day. The hours of feeding should be arranged so that the calves will do all the work of eating in daylight. Feed them what grain and roughage they will eat up clean within three hours after feeding. Mix the grain with the roughage and feed one or two inches in boxes under the sheds where the calves can have free access at all times. The calves can be sheltered with a common board shed, closed on the north and open on the south side.

Water should be supplied in tanks regulated by float valves so that the tanks are kept full and the calves can drink at will. If the weather is cold, it is best to keep a tank heater going in each tank so as to keep the water at a temperature of about 40 degrees—Farm and Home.

Tuberculin Test.

A foreign paper presents statistics to show that out of 47,038 animals imported from Denmark into Germany in 1908 which passed the tuberculin test were found to be diseased when slaughtered. This means that the tuberculin test was totally unreliable, for in over one-third of the cases it failed to detect the disease. Such figures are open to grave doubt, says Stockman and Farmer. In competent hands the test has not shown any such percentage of error in this country. In fact, it has failed in few cases. The chief failure of the test is that it makes no distinction between encysted and harmless bodies of tubercular matter and active and dangerous ones.

Draft Hunter to Edward VII.

There is an individual attached to the court whose calling were it classified in the directory would come under the heading of "draft hunter." His sole duty is to precede the king and search for drafty places in the hall or room in which the ceremony participated in by his majesty is to be held. If, for instance, King Edward attends a banquet, the "draft hunter" visits the room and sees that every precaution is taken for shielding his majesty from the slightest draft.

The Cost of War.

A prominent Frenchman who has given much study to the subject says that were his country to be drawn into a great war in present conditions it must be prepared to meet an expenditure of 30,000,000 francs a day. So stupendous is the absolutely unrelenting outlay when a mighty nation in these days becomes involved in a conflict of the largest proportions that taxpayers are affrighted and appalled at the mere thought of the thunder of the guns.

SELECTIONS

THE SOCIETY SPY.

New Profession For the Idle Man in London's Smart Set.

The out of work man in the smart set who formerly lent himself for a consideration as a "guinea pig" director, "outed" for treatment on commission or sold furniture, country houses or motor cars has found a new profession. It is that of "society spy."

According to a correspondent of Truth who signs himself "A Shopkeeper and a Gentleman," the "society spy" is invaluable. If a west end man in difficulties or his wife has overrated his patience, the "society spy" informs the trade at once.

If a west end man who has been for years on the brink of bankruptcy wins a large sum at the card table, there are intimate friends who profit by making the good fortune known. At a time when there are so many who are rich or appear to be rich, whose names are unfamiliar the shopkeeper might make serious mistakes were it not for the information which is so given.

The tradesman is only too happy to pay for information which enables him to avoid a severe loss.

Tradesmen in former days seldom ventured to ask such questions, and their customers, as a rule, supported each other. Now, says Truth's informant, the difficulty shopkeepers have to contend against is that most of their customers, especially if they are intimate friends, have not a good word to say for each other. Modern English society is today an "association of enemies who profess to be friends."—London Leader.

Wages of English Hangmen.

The many executions taking place these days would give the lie to the story had it not already been contradicted that the hangman suffers poverty. But the court of aldermen really does possess the record of an appeal for increase of the hangman's salary. Jack Ketch wrote that as executioner he could not get any other employment, that he had to keep an assistant, but that hangings were so rare as to make it impossible for him to live. He must have compared his own lot with that of the French hangman in the palmy days of that officer before the guillotine killed his profession. "The post is sacred here," wrote a diarist in Paris, "and approaches the nobles in the right of using a sword and the priesthood in being proscribed entry at all spectacles but that of the profession. If blood unspilled can ennoble, then I know of none so pure, for a French hangman can marry none but a French hangman's daughter." Far different was it from the Ketches of old times, as the following record shows: "Executioner's fees, 7s. 6d. striking the body, 4s. 6d.; use of shell 2s. 6d."—St. James Gazette.

PLAYS AND PLAYERS.

A play entitled "Piff, Puff, Poof" will succeed Virginia Earl at the Coast, New York.

During Richard Mansfield's present New York engagement he will present seven different plays.

Catherine Lewis has arranged for a production in London of her latest play, "Love's Pilgrimage."

George A. Kinsbury has made arrangements to resume the tour of San S. Shubert and Nixon, to popularize Laura Hope Crews in the role of Rosie the laughing house keeper's daughter, in "Merely Mary Ann."

Tyrone Power has been engaged to support Julia Marlowe in "When Knighthood Was in Flower." He will also appear as impersonator in Miss Marlowe's elaborate revival of that play.

MAXIMS FOR THE YOUNG.

If contentment is gone all is gone.
Put the best of yourself into all you do.
Fly from pleasure that bites tomorrow.
If you lose heart you weaken your head.
A wise man can keep silent; a fool cannot.
Prosperity in evil is the greatest misfortune.
A minute may read what an age can not tell.
No office can make a worthless man respectable.
Hurry not only spoils work, but spoils life also.
A noble failure is better than a disreputable success.
A man should have "the will to do the soul to dare."
Share the burden of others, and you will lighten your own.
More harm may come of work ill done than of work undone.—Exchange

HORSES AND HORSEMEN.

Walter Withers, a New Hampshire trainer, has taken charge of the horses at J. F. Howland's stock farm, Paris, Me.

Philadelphia road riders have paid \$20,000 in the last six months for trotting horses to drive on the speed way.

Oscar L. 2589, owned by John Gray, Ashmore, Pa., slipped on the ice recently, breaking a leg, and had to be destroyed.

Emmett Rowan, who has been second trainer for Roy Miller several years, has joined the working staff at Dr. McCoy's Delaware farm.

H. K. Devereux will have Peko, 2114, prepared for the matinee season. She has won more heats than any Cleveland matinee trotter.

Scott Hudson has purchased from Floot Jolly, Tipton, Ind., the gelding Fred McCurz, 21354, by L. W. Ben-

nett, 2191, dam Jennie M., reported price, \$25,000.

EDITORIAL FLINGS.

Russia can never complain that Japan did not take somebody of its size—Washington Star.

The marvels of the N rays and X rays interest scientists. But the world in general is fighting for the \$ rays.—St. Louis Republic.

If you see a jumble of letters in a newspaper just now, do not decide too quickly that it is a "pi" line. It may be the name of a battleship.—Omaha World-Herald.

It isn't strange that a committee room in the national capital caught fire. There is hot stuff packed away in some of these committee rooms.—Macou Telegraph.

That Baltimore newspaper man who relates how he worked at his desk up in the copy paper upon which he was writing blazed up should never dread being fired.—Cleveland Plain Dealer.

CIRCULATION DEPARTMENT

Boils for weeding with afternoon are made in the same manner as the c. m.

Peas shelled up before are much less as training for handsome afternoon and evening gowns.

Threads of gold shimmer through new braids, which are mostly of dark silk, beautifully glossy.

Some new collar and cuff sets are made of the increasingly fashionable eyelid embroidery or English cutwork.

It is really remarkable to note how the trimming is being pushed off the shoulders. It is sagging lower and lower until it finds expression in the sleeves, which are a mass of ruffles around the elbows and the wrists.—Brooklyn Eagle.

PITH AND POINT.

Fortunes may be told by cards, but they are more often lost by them.

Every woman has two friends, one who tells her secrets and one to whom she tells secrets.

There is a considerable difference between a thinking lot of yourself and thinking of yourself a lot.

Many people find themselves in the ranks of the also rans in their efforts to keep up with their running expenses.—From a College Paper.

TAKE YOUR MEDICINE.

Now and then you hear a fellow Make a thinking lot of yourself. But you very seldom hear him Talk about his lack of pith.

Now and then a fellow tells us That the world is down on him. But he never tells us how he Milk-and-mashed his grit and vim.

Every day you hear some loser Say that he was frozen out. But that he was over in it. He expresses not a doubt.

When the world stamps on the kicker You can hear him yell a mile; But who always scowled at others Now is begging for a smile.

When a man is down and out, he Always has some tale to tell. He never tells you that he fell.

And, in sort, it seems the rule to— When a chap is on the shelf— To tell a tale that sounds so good he Nearly thinks it's true himself.

Never squeal if you've been bunked, For nobody's in the dark. Either you passed by the shuffle Or you were an easy mark.

If they caught you in the pantry With your finger in the jam, And you eat a proper licking, Emulate the wise old clam.

A Lucknow Heroine. There died recently in England at the age of seventy-one Lady Inglis, who was one of the heroines of Lucknow. Her husband, Sir John E. W. Inglis, was the commander of the garrison during the famous siege which was raised by General Havelock and Lord Clyde. As if this was not sufficient trial for her, on her way home after the siege she was shipwrecked on the coast of Ceylon.

A Famous Rubens Injured. "La Comtesse," which hangs in the Louvre, was badly injured recently. It had been taken out on a terrace to be photographed. A gust of wind threw it down from the stand on which it was placed, causing some very serious cracks to appear. These have been repaired to a certain extent, but the painting is not what it was.

BOILS

PYRAMIDS OF PAIN

Boils show the blood is in a riotous, feverish condition, or that it has grown too weak and sluggish to throw off the bodily impurities, which then concentrate at some spot, and a carbuncle or boil is the result. To one already enfeebled by disease, boils seem to come with more frequency, causing the intensest pain and greatest danger to the already weak and debilitated sufferer. All skin eruptions, from the sometimes fatal carbuncle to the spiteful little cat-boil, are caused by bad blood, and the only way to avoid or get permanently rid of them is to purify and build up the deteriorated, polluted blood, and counteract the humors and poisons; and nothing will do this so quickly and thoroughly as S. S. S., which is the acknowledged king of blood purifiers and greatest of all tonics. Where the blood has become impoverished and is poor and thin, no medicine acts so promptly in building up and restoring its richness, purity and strength. The time to cure a boil is before it develops, when it is in a state of incubation or formation in the blood; for boils are, after all, only the impurities and poisons bubbling up through the skin, and this will continue in spite of poulticing and lancing till the blood gets rid of its accumulated poison. The way to stop boils is to attack them in the blood, and this is what S. S. S. does. All danger of boils is past when the blood has been thoroughly purified and the system cleansed of all morbid, impure matter. If you are subject to boils, then the same causes that produced them last season will do so this, and the sooner you begin to put your blood and system in good order the better the chance of going through the spring and summer season without boils or other painful and irritating skin eruptions. S. S. S. is guaranteed purely vegetable, and can be taken with perfect safety by old and young, and without harm to the most delicate constitution. It is mild and pleasant in its action, and unequalled as a cure for boils and kindred eruptions. Write us if you would like medical advice or other information.

Mine Workers' Convention.

Delegates from the anthracite districts will attend the national convention of the United Mine Workers in Indianapolis on Jan. 14. Among the matters to be taken up by the convention is the proposed provision of the constitution to meet the objections found by the anthracite strike commission in the suggestions accompanying its awards. It was felt by the commission that a two-thirds vote instead of a majority vote should be required in declaring a strike. This was advised because about 20 per cent of the workers in the mines are boys.

BRIGHT'S DISEASE.

The largest sum ever paid for a prescription changed hands in San Francisco, August 30, 1907. The transfer involved in coin and stock \$112,500, and was paid by a party of business men for a specific for Bright's disease and diabetes, hitherto incurable diseases.

They commenced the serious investigation of the specific November 15, 1900. They interviewed scores of the cured and tried it out on a merits by putting over three dozen cases on the treatment and watching them. They also got physicians to name chronic, incurable cases, and administered it with the physicians for judges. Up to August 25th 87 per cent of the test cases were either well or progressing favorably.

There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address John J. Fulton company, 409 Washington street, San Francisco, California.

H. G. CAMPBELL, Manager.

A REFORMED BREWER

YOUNG LONDONER GIVES FORM TO JOIN TEMPERANCE ARMY.

Cost Off by His Father Because of His Principles, He Begins a Crusade Against His Former Business—Reclaiming Outcasts.

To the Rev. W. S. Rainsford of St. George's church, New York city, is due the conversion to temperance of Frank N. Charrington, son of the late millionaire brewer who was head of the firm of Charrington, Head & Co. of London.

During one of Dr. Rainsford's visits to the continent he met Charrington, who was then actively engaged in the brewing business with his father. The minister and the young brewer became companions during their trip, and as a result of many long talks Charrington became interested in the temperance question.

After their return to England, Charrington accompanied Dr. Rainsford to many of the meetings of the temperance workers in the mission halls of the Whitechapel district. The inner side of the liquor question that was then revealed to him caused Charrington to vow that he would never again be connected in any way with the liquor traffic and that he would do all in his power for the cause of temperance.

The day following this statement Charrington went to his father and told him of his resolve. There was a scene, but despite his father's threats and entreaties the young man remained firm.

Soon after this the elder Charrington died, and it was discovered that he had cut off his son from every share in the \$8,250,000 estate. Had it not been for the fact that the young man's mother had left him a large fortune the future would have been rather dark.

Charrington's first temperance work was to start a crusade for reclaiming the outcasts of the Whitechapel and the Mile End districts. He then built a building within a stone's throw of his father's brewery and carried on his temperance campaign there. The hall was called the Great Assembly hall and cost \$25,000. Among those who assisted Charrington in this venture were the Rev. C. H. Sprague, Lady Henry Somerset, the Rev. F. B. Myer, the Countess of Warwick and the late Earl of Shaftesbury.

Charrington has now started an entirely new scheme which he thinks will eclipse all others in the temperance line. It is the combination of a sanitarium, retreat and home for aristocratic drunkards. With this object in view he purchased the island of Osea, in Blackwater bay, off the Essex coast, for \$20,000. Work is rapidly being pushed on a home for the debilitated, which when completed will be under the management of a competent doctor and will be open to both sexes. There will also be cottages and small houses for those who wish to live by themselves.

DRINKERS NOT WANTED.

Even the Bartender Must Be a Total Abstemious.

Recently there appeared in the Boston papers this advertisement: "Wanted—a bartender who does
