MONMOUTH.

Coasters are constantly coming and going.

Mr. Saera has bought the Ira Smith residence.

Our bakery is putting an addition to his store.

Crops short but warehouse doing a good business.

Chas. Murphy and Roy Smith are hunting and fishing in the Alsea country.

Mr. Nelson has sold his residence to Mr. Cross, will dispose of his household goods and go back to his former home near the mouth of the Columbia river.

W. H. Easter, a former Dallas butcher, is now running a livery stable at Tillamook.

Sheriff Ford and wife went to Ocean Park, Netarts, Tillamook and Garibaldi during their outing. He noted wonderful changes since he was there forty years ago, with his grandfather Fred, who then surveyed land all through that region. He says the valleys are very rich, produce big crops and much of the land would sell for \$100 an acre. It is a fine dairy country.

It is much easier for a woman to confide in the average man than in the average woman. She knows that the man will respect her confidence and keep them to himself. He is strong, has more experience of the world and can help the woman with wise advice. There is every reason why women should not trust their delicate constitutions in the hands of unskilled persons. It requires a thorough education to appreciate and understand the womanly organism. When a woman has ill and pains that she cannot bear when life seems dark for every woman she should confide her troubles to a physician of standing in the community or one who has a national reputation. Certainly it would not be the part of wisdom to confide in an ignorant person without medical education simply because she was a woman. There is every reason why she should write to some great specialist, one who has made the diseases of women a specialty for a third of a century, like Dr. R. V. Pierce, founder of the Invalide's Hotel and Surgical Institute, of Buffalo, N. Y. All his correspondence is held secretly, confidential, and he gives his advice free and without charge.

So uniformly successful has Dr. Pierce's Favorite Prescription proven in all forms of Female Weakness, Prostration, or Falling of the Uterus and Leucorrhoea, that, after curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels warranted in offering to pay \$500 in cash for any case of these diseases which he cannot cure.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

This falling of your hair! Stop it, or you will soon be bald. Give your hair some Ayer's Hair Vigor. The falling will stop, the hair will grow, and the scalp will be clean and healthy. Why be satisfied with poor hair when you can make it rich?
"My hair nearly all came out. I then tried Ayer's Hair Vigor and it stopped the falling. New hair came in thick and just as thick as my hair."—Mrs. L. M. SMITH, Saratoga, N. Y.

Thick Hair
Sheep Notes.
Overeating of rich foods tends to shorten the life of sheep as well as man.
Rape is not only a good food for stock, but is excellent cooked for the table.
It is wonderful how old and seemingly worn-out sheep will thrive in the rape field.
Why is it the fleece of the sheep assumes a bright new-life when turned to pasture?
There are few farms upon which a few sheep cannot be kept with a certainty of profit.
The shepherd who prevents disease in the flock is more skillful than the veterinarian.—American Sheep Breeder.
Housework Properly Done.
Housework properly done is one of the very best ways in which to develop the body, writes Constance Sidney in Good Housekeeping. The greatest hindrance in the way of many housekeepers is that they do not understand the art and the value of saving energy. In all that they do they expend twice the amount of strength that men would over the same work. Take, as an example, the simple act of lifting a heavy load of coal. A man bends his knees, catches up the load in a quick "snatch lift" with the result that the effort of the lift is distributed to muscles in the thighs rather than in the back. A woman stoops from the waist, knees scarcely bent, and drags the load slowly up. If it is heavy for her the result is a decided feeling of strain and weariness in the back, which makes her tired out for the rest of the day. This is only one instance. If housekeepers would only spend a little time in experimenting as to the simplest and best "energy saving" method of doing the daily work in a very short period of time they would find that truly housekeeping was made easy.

The Use of Soap.
Very few persons realize the importance of care in the selection of soap best suited to the skin of the persons for whose use it is purchased. Some soaps dry the skin, thus causing chapping, frost bites and many kindred troubles. Castile soap is the drying for most skins and should, contrary to the old idea, never be used on the skin of an infant. An old lady who had been taught to believe that castile soap was pure enough for toilet purposes was always troubled during the cold weather with what she called "frost splits." Finally she was prevailed upon to use a tiny grade of oatmeal soap, and immediately the frost splits disappeared and her nose no more. Lardcruff is frequently caused by the use of castile soap in shampooing. For this purpose some soap especially prepared should be used. The old time soap made from wood ash lye is the best for washing hands and for laundry use. This soap may occasionally be bought at old farmhouses, where, dried out from age and mellow and ripe in consequence, it is one of the unappreciated gem treasures of the household.—Table Talk.
