

CAPT. GRAHAM'S GRATITUDE

Suffered from Sores on Face and Back—Doctors Took His Money But Did No Good—Skin Now Looks Clear as a Baby's.

ANOTHER CURE BY CUTICURA REMEDIES

Captain W. S. Graham, 1321 Eoff St., Wheeling, W. Va., writes June 14, 1911: "I am so grateful I want to thank God that a friend recommended Cuticura Soap and Ointment to me. I suffered for a long time with sores on my face and back. Some doctors said I had blood poison, and others that I had barbers' itch. None of them did me any good, but they all took my money. My friends tell me my skin now looks as clear as a baby's, and I tell them all that Cuticura Soap and Ointment did it."

STILL ANOTHER CURE

Neck Covered With Sores, Hair Fell Out, Wild With Itching

Mr. H. J. Spalding of 104 W. 104th St., New York City, says: "For two years my neck was covered with sores, which fell out, leaving an unsightly bald spot, and the sores, inflammation, and itching made me wild. After a few applications of Cuticura the sores subsided, the sores disappeared, and my hair grew thick and healthy as ever."

AND STILL ANOTHER

"For over thirty years I suffered from painful ulcers and an eruption from my knees to my feet, and could find neither doctor nor medicine to help me, until I took Cuticura which cured me in six months." (signed) M. C. Moss, Gainesville, Tex.

CHURCH DIRECTORY.

Preaching hours at 11 and 7:30.

M. E. CHURCH.
Preaching Sunday morning and evening. Sunday school at 9:45. Epworth League at 6:30. Prayer meeting Thursday evening.—Jas. Moore, pastor.

BAPTIST CHURCH.
Preaching Sunday morning and evening. Sunday school at 10. B. Y. P. U. at 6:30. Prayer meeting Wednesday evening.—J. B. Thompson, pastor.

PRESBYTERIAN CHURCH.
Preaching Sunday morning and evening. Sunday school at 10. Christian Endeavor at 6:30. Prayer meeting Thursday evening.—, pastor.

CHRISTIAN CHURCH.
Preaching Sunday morning and evening. Bible school at 10. Senior Christian Endeavor at 6:30. Bible class and prayer meeting Thursday evening.—, pastor.

EVANGELICAL CHURCH.
Preaching Sunday morning and evening at the Dallas college chapel. Sunday school at 10. Christian Endeavor at 6:30. Prayer meeting Thursday evening.—D. M. Metzger, pastor.

H. H. Cronise, agent, Corvallis.

VALUE OF SEPARATORS.

Setting Milk in Shallow Pans is a Wasteful Practice.

The old-fashioned way of setting milk in the ordinary six quart shallow pans has nothing to commend it except the cheapness of the outfit, says American Cultivator. The pans take up a great deal of room in the dairy and make a great deal of work in being washed, although the new pans pressed out of one piece of tinware are not so hard to wash as the old ones that were made out of four or five pieces and had a seam around the bottom and two or three up the sides.

Leading out of consideration the large amount of room that forty or fifty pans take up in a dairy, which is a big item on many farms, we find other strong objections in that pans last but a few years, they cause lots of mess from spilling and leaking, and the milk sours and thickens before the cream has time to rise. This last point is the greatest objection, and a very serious one, to the use of shallow pans in dairies of half a dozen cows or more.

Just how much butter fat or cream is lost in the milk the average farmer does not know. He thinks that it is only a little and that it does not amount to much. But really it amounts to a good deal and may be the whole of the profit.

The following experience shows the loss through setting milk in open pans: A herd of fourteen cows was in milk and giving about 250 pounds of milk a day. The pans were set in a cool room and allowed to stand for thirty-six to forty-eight hours. The skim milk was tested, and it showed that nearly all the cream rose in the first twelve hours, no difference being shown between that set twelve hours and that set thirty-six hours. But the amount of butter fat which was lost was something appalling, amounting as it did to eight-tenths of 1 per cent, or about one-sixth of the whole amount of the butter in the milk. This loss is not surprising to one who has opportunity to make such tests, and it is going on every day on hundreds of farms in this country. In this case it amounted to two pounds of butter per day, and nearly all of this could have been saved by the use of a separator.

Asked Odders.

After all has been said concerning treatment of caked or inflamed udders I doubt if any single application will be more effective than gentle rubbing and working with the hands, not for a few minutes, but for a half hour at a time, writes H. E. Cook in National Stockman. Turpentine and lard, hot water, vasoline and care good. But just test the effectiveness of each with and without manipulation.

Causes of Abortion.

Dr. H. M. Reynolds of the Minnesota experiment station has collected a great deal of information on the causes of abortion. He divides the general causes of abortion into the following groups: Bacterial infection, objectionable feeding stuffs or material in drinking water, poor physical condition of the animal and injuries.

Size of Dairy Cows.

The Wisconsin station, after studying the milk production for over four years, came to the conclusion that the larger type of cows is better suited to average farm conditions than the smaller type, or what is known as the extreme dairy type.

The Silo and Silage

The average height of silos is increasing. There is a decreasing tendency

The Leading Paper of the Pacific Coast

The San Francisco Chronicle

The Weekly Chronicle published in the entire West.

\$1.50 a Year

Including postage to any part of the United States, Canada and Mexico.

It is best because, besides printing all the news of the world each week in an interesting way and fully illustrating many articles, it has special departments devoted to:

AGRICULTURE
POULTRY
LIVE STOCK
MINING
LITERATURE
FASHIONS
and SPORTS

These are presided over by editors having a thorough knowledge of their specialties. The pages devoted to Agriculture, Horticulture, Poultry and Live Stock are well illustrated and filled with matter of the greatest interest to all engaged in these industries, every line being written by those who are in close touch with conditions prevailing on this coast.

SEND FOR SAMPLE COPY. It will be sent free.

Do you want the Chronicle?

Reversible Map?

Showing the United States, Dominion of Canada and Northern Mexico on one side, MAP OF THE WORLD, presenting to view in one continuous map, with all areas in true proportion, the entire surface of the Earth on the other side.

CIRCULATION DEPARTMENT

making the langur work in that manner.

The fan is a movable frame, covered with canvas and suspended from the ceiling. The motion is caused by pulling a cord. The officer tied the hands of the langur to one of the cords and then by means of another cord put the machine in motion. Of course the monkey's hand went up and down, and the animal wondered what sort of a game was being played. Then the officer patted its head and fed it with candy till soon the langur thought it fun to work the punks. The experiment was successful, and now thousands of monkeys are in harness.

Value Culture.

Baby heard Lela say that one of the girls in the choir had strained her voice. A few days afterward Lela went into the kitchen, and there on the floor sat baby, holding the tea strainer to her lips and singing through it. "Oh, baby, you're a real singer," she said, "put up the tea strainer."

But baby answered, "No! I'm straining my voice."—Little Chronicle.

DAMES AND DAUGHTERS.

Mrs. C. P. Morrison of Addison, Vt., who is an octogenarian, celebrated Arbor day by planting a peach tree which she raised from the seed.

Mrs. Leticia Tyler Sample, "first lady of the land" during the administration of President Tyler, recently celebrated her eighty-fourth birthday.

Mrs. Howard Gould has presented St. Peter of Alcantara's church at Port Washington, N. Y., with a rare bronze chandelier, a reproduction of the one in the Church of St. Anthony of Padua, Italy, designed by Donatelli.

Rev. Antoinette Brown Blackwell of Elizabeth, N. J., the first ordained woman minister in the United States and probably in the world, celebrated her eightieth birthday May 23. She means to attend the coming national woman suffrage convention at Portland, Ore.

The first American missionary to Alaska was Mrs. A. H. McFarland of Olaya, Okla. She went there some thirty odd years ago as a representative of the Presbyterian church. It is also thought that she was the first American woman to go there in any capacity.

Mrs. Deborah Chase, residing at Chase Lake, Me., is eighty-four years of age, in excellent health and has ten living children, the youngest being forty-five years old. The only death in her family for a period of fifty years was that of Mr. Chase about thirty years ago.

Mrs. Amada Diaz de la Torre, the eldest daughter of President Diaz, is one of the most graceful figures in the high society of the Mexican capital. She is the wife of Congressman Ignacio de la Torre, a wealthy hacendado. At their town home they often discuss elegant and truly cosmopolitan hospitality.

CHURCH AND CLERGY.

The Rev. M. M. Mangasarian of Chicago has gone to Europe. He will be the only American delegate to the next international liberal congress, to be held in Paris Sept. 4 to 8.

Rev. George Thomas McCarthy was appointed by Archbishop Quigley, president of the St. Mary's Training School for Boys at Fochville, Ill., to be only thirty years old.

Bishop Vincent preached at St. Paul's Memorial church, South Bend, Ind., recently on the anniversary of the birth of the late Mr. Clem Studebaker. This church was erected by the Studebaker family.

Rev. Earle Whitley, pastor of the British church, Crawfordsville, Ind., is one of the most eloquent ministers in his state. Up to within a few years ago he was an actor and at one time was a member of the Booth and Barrett company.

The Rev. Edmund Dowse, who died the other day at Sherborn, Mass., aged ninety-two, was known as the oldest Congregationalist minister. He was the oldest graduate of Amherst college. During the civil war he was with the Army of the Cumberland as chairman of the Christian commission.

THE ROYAL BOX.

King Christian of Denmark, who recently entered his eighty-eighth year, is the oldest king in Europe.

The empress of Germany's private wedding present to her relations at long consists of a very plain traveling clock, for she values chiefly among all other things the punctuality.

The czar of Russia, it is said, has \$25,000,000 invested in English securities, and it is also declared that he would in an extreme crisis fly and live in England, as one of his troubled monarchs have done before him. Then he has a second string to his bow in the \$2,000,000 invested in American rails, iron and coal.

Brussels collar and cuff sets are competing with Irish crochet.

The newest lingerie hat is a heavy linen sailor, the linen stretched over a straw foundation.

Aligrettes are much used on summer hats. They point in all directions as well as being placed upright.

The black and white checks are not usually dressy, yet some extremely handsome gowns are made of this popular material.

The gown most frequently seen on the street is the coat and skirt, worn over the thinnest of lingerie blouses. Despite the warm weather the coat is as often long as short.

The surplice waist is the waist of the season, and next to this in popularity comes the draped bodice. The

THE ART OF WAR.

A noiseless electro magnetic gun has been successfully tested in Norway. The bayonet of our new army rifle is to be four inches longer than this one now in use.

The new British ocean going torpedo boat destroyers are to be fitted for oil fuel, and they will be sufficiently armed to act as small cruisers.

A French artilleryman has made an advance upon smokeless powder by inventing an apparatus concealing the flash, thus making the battery also lately invisible.

Pure Blood in The Beef Herd

The value of improving farm animals by the introduction of pure blood has come to be generally recognized by the leading stock raisers of this country. This fact is indisputably true. The Tennessee experiment station has demonstrated it conclusively, says J. W. Young in Breeder's Gazette. It has been by a series of experiments, the results of which have been from time to time published, shown the advantage of improved breeds and the methods by which stock may be most profitably handled and fed.

Several years ago experiments were begun in feeding native steers. The

first lot was extremely "average." The second year a better grade of stock was secured. The third year a still better quality. One object was to show the difference in profit in feeding good and poorly bred steers. The difference, needless to say, was marked. The facts were brought home to the farmer in a way that was irresistible. It has affected the sentiment among farmers in favor of improved breeds in a very powerful way.

One of the greatest Shorthorn bull dogs whose picture is here reproduced from the Gazette was first prize two-year-old champion show at Chicago. He was shown by Purdue University of Indiana.

Dehorning Cattle.

Wherever possible the horns should be removed during the first two or three weeks of the animal's life by the caustic potash method, but if this has been neglected then the dehorner cannot be used. When this is used (never use saw) it should be a good sharp one in the hands of an experienced man. Bleeding may be diminished by applying a stout cord around the base of the horns, drawing it very tight and tying, allowing it to remain for five or six hours after the operation.—Farm Journal.

Polishing the Wool.

Sheep are apt to suffer from irritation of the skin at this time of the year, says American Sheep Breeder. The irritation is due to the dry feeding and is very often to overclose herding in the pens, by which sweating is caused and the feverish condition of the skin results. It is mostly confined to the Merino sheep, as the heavy yolk has the effect of preventing the circulation of the air through the wool, and any crowding of the sheep in the pens or yards overheats them. This is to be prevented by providing ample shed room for this kind of sheep and avoid-

Sires and Sons.

James H. Hyde, storm center of the Lupton fight in New York, is said to have the finest stables in America.

Prince Nicholas Engelhardt, a member of the Russian nobility, is to become a stockbroker, opening a branch in Chicago of a big New York brokerage and commission house.

Eugene F. James, a former Pennsylvanian, has been elected mayor of Missouri Valley, Ia. He is a big hearted, hard to hand sort of campaigner and never makes a political speech.

Eugene Wate, former commissioner of pensions, declines to provide a portrait of himself to be hung in the office of the commissioner of pensions, as his predecessors have done of themselves.

General Thomas T. Eckert, General Thomas W. Vincent of Washington and Henry Ulke, a portrait painter, are the survivors of the twenty-eight persons who were present at the death of President Lincoln.

Samuel H. Van Sant, ex-governor of Minnesota, has shaved off the heavy black mustache which once adorned his face. His appearance is so changed that intimate acquaintances pass without recognizing him.

Frank Bosworth Brantledge, who has been elected in Connecticut to succeed the late G. H. Platt in the United States senate, can trace his ancestry back to the Mayflower. He is a Yale graduate of the class of 1883 and was quite an athlete while at college, rowing in the crew.

Boston Corbett, the man who is credited with having shot Wilkes Booth, the assassin of Lincoln, owns a farm in Cloud county, Kan., but resides in Texas and refuses to enter the former state. At one time he was confined there in an asylum for the insane, but escaped, and now refuses to return, fearing to be put under restraint again.

TRADE AND INDUSTRY.

Raisin growers at Fresno, Cal., have formed a co-operative growers' company with a representation of 35,000 acres of raisin vineyards.

This country's exports of manufactures for the calendar year 1904 were worth probably a little over \$500,000,000. This is about three times the aggregate in 1894.

France is now this country's only rival in silk manufacture. We make over 70 per cent of the silk we consume, whereas in 1893 we imported all but 15 per cent of our silk.

The Swiss-Spanish commercial treaty expires Aug. 31, 1905. If it is not renewed American cheap watches, alarm clocks and similar products may win back the leading place they formerly held in the Barcelona market.

Cold storage of fruit in the United States has grown to enormous proportions, nearly 3,000,000 barrels of apples having been stored last year. It is found that if properly packed and handled the fruit does not much deteriorate.

COLLEGE AND SCHOOL.

The state of education in Russia may be judged from the fact that there is only one village school for every 12,000 persons.

Dr. C. A. Chant of the University of Toronto will soon visit this country to study astronomical observatories, their plans and methods. The government of Ontario is to establish a teaching observatory at Toronto.

The chair of dramatic literature in the University of California has been offered to Ben Greer, the actor-manager who brought "Everyman" to America. This is probably the first time in history that an actor has been honored in this particular way.

Paul O. Stenland, the Norwegian banker of Chicago, has presented to the Scandinavian section of Chicago a valuable collection of 1,250 volumes of old Norse literature, formerly a part of the library of the noted historian Von Maurer.

Old Bones.

The bones of very aged persons are said to have a greater proportion of lime than those of young people.

DREAD OF HUMANITY

I am compelled by a sense of gratitude to tell you the great good your remedy has done me in a case of Contagious Blood Poison. Among other symptoms I was severely afflicted with Rheumatism, and got almost pined with the disease. I lost weight, was run down, had sore throats, eruptions, spots and other evidences of the disease. I was truly in a bad shape when I began the use of S. S. S., but my persistent use of it brought me out of my trouble safe and sound, and I have the courage to publicly testify to the virtues of your great blood remedy, S. S. S., and to recommend it to all blood-poison sufferers, sincerely believing if it is taken according to directions, and given a fair trial, it will thoroughly eliminate every particle of the virus. JAMES CERRAN, Stark Hotel, Greensburg, Pa.

Painful swellings in the groins, red eruptions upon the skin, sores in the mouth and loss of hair and eyebrows, are some of the symptoms of this vile disease. S. S. S. is an antidote for the awful virus that attacks and destroys even the bones. S. S. S. contains no Mercury, Potash or other mineral ingredient. We offer \$1.00 for proof that it is not absolutely vegetable. Home treatment of the symptoms and other interesting and valuable information about this disease, mailed free. Our physicians advise free to those who write us.
