# **CURED BY CUTICURA**

Now Six Years Old with Thick Hair and Clean Scalp. Cure Permanent.

"My baby was six weeks old when the top of her head became covered with thick scales, which would peel and come off, taking the hair with it. It would soon form again and be as bad as before. My doctor said it was Eczema, and prescribed an ointment, which did no good. I then tried Cuticura Soap and Ointment. I washed her head in warm water and Cuticura Soap and gently combed the scales off. They did not come back and her hair grew out fine and thick. She is now a year and a half old, and has no trace of Eczema."

MRS. C. W. BURGES, Iranistan

### CURE PERMANENT

Mrs. Burges writes Feb. 28, 1003 : Mrs. Burges writes Feb. 28, 1903:
"My baby, who had Eczema very
badly on her head, as I told you before,
after using the Cutleura Remedies was
cured. She is now six years old, and
has thick hair and a clean scalp."

Instant relief and refreshing sleep
for skin-tortured babies and rest for
tired, worried mothers in warm baths
with Cuticura Soap, and gentle anoint-

with Cuticura Soap, and gentle anoint-ings with Cuticura Ointment, purest of emollients and greatest of skin cures. emollients and greatest of skin cures. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply skin and scalp humours, with loss of hair, of infants and children, as well as adults, and is sure to succeed when all other remesure to succeed when all other reme-dies and the best physicians fail.

CAUGHT RED HANDED Christmas Young Mr. and Mrs. Russell Ewing

married for love. There was no money to Mr. Ewing's aurt, a spinster of for ty, who possessed a large fortune. This lady had made several wills, at last making one leaving all her property to in the family except such as belonged her nephew. Russell. But, the testator being a healthy woman, there was little hope that the young couple world inherit the fortune, at least not for long while. Meanwhile by pinching they managed to get along.

One summer after a great deal of hard work - servant's werk - Mrs. Ewing found it necessary to recuperate

She soon tired of the farm, and, without notifying her husband, whom she knew would object, she packed her traps and took a train. She reached the city and her home shortly before

There was a rattling in the keyhole the door opened and in walked the husband. He stood gaping at the two women, but not for long. His wife turned

Who is this creature whom you have to meet you when you come home from

"Indeed, my dear, I don't know. What brought you home so suddenly?" "Russell Ewing, do you think to im pose upon me by such a denial? But of erse-how can I expect-neither wil admit anything. I want you both to un derstand that before this shameless wo nan leaves this house I'll know who she is. Oh, Russell, how could you? "Ask her." said the husband, "if she ever saw me before."

There was no need to ask. The wom an turned away, hiding her face, plainly showing that she was not entirely shameless.

"She admits her and your guilt," moaned the wife. "Oh, Russell!"
"Well, I'll be hanged!" exclaimed the usband in real or feigned astonish

Before he could stop his wife she had gone to the telephone and called for a policeman. The stranger made a move to get out of the front door, but Mr Ewing stopped her. Then there was wrangling between the husband and wife, which was interrupted by the

coming of the policeman.
"Take that woman to the station." said Mrs. Ewing, "and hold her till she agrees to tell who she is; then send for

The officer agreed to hold the woman on a charge of trespass if Mrs. Ewing would promise to appear against her. The promise was made, and the wom-

an was led away. The next hour at the Ewing home was one of keenest misery. Mrs. Ewing locked herself in her room, and her lamentations could be heard all over the house. Mr. Ewing paced between the sitting and dining rooms with a rueful face. During his wife's absence he had been used to going out soon ifter his arrival at home and getting his dinner. Now he had no appetite and did not go. Finally he took an evening namer from his pocket and tried to

DAIRY BRED STEERS.

He read it again and again, then rushed | Little Profit In Feeding Them For Atter experimenting with beef bred it had been rided. Rus' hig town dit. and dairy bred (Jersey and Holstein) he thrust his hand into a certain pigeon- steets the lowa experiment station reaches the following conclusions, in every point just what practical experience has taught feeders and slaughterers of cattle:

Dairy type steers show a considerably higher percentage of offal and a Ely's Cream Balm

Dairy type steers carry higher percentage of fat on internal organs, thereby increasing the total weight of cheap parts.

Ecef steers carry higher percentage of valuable cuts.

Beef type steers furnish heavier, thicker cuts. They are more evenly and neatly covered with outside fat

Galloway Characteristics As grazers the Galloways have but

few equals, and, being protected by heavy coats, they are able to rustle for themselves in the worst kind of weather, says Farmers Advocate. range, under the hardest kind of con-citions, the Galloway bulls are niways found to be active and unusually prolific, another point which is doing much to bring them late general favor. Perhaps the most valuable characteristic of the breed, however, is their comparative freedom from most of the common bovine diseases. It is a recog-nized fact among English veterinarians that among Galloways examined for export a case of tuberculosis is the rare exception. Among many of the other breeds as many as 40 per cent of certain herds have been known to react to the tuberculin test. The Texas fever tick is also said to have a hard time burrowing through the coat of a good healthy Galloway.

A good way to fatten lambs and now in common practice in some localities is to sow rape in corn and then turn in the lambs and let them eat rape and corn both. No combination involving so little expense and labor will produce greater growth in sheep and

Peeding Young Pigs. If young pigs shortly after weaning or immediately after weaning are fed an excess of corn they will make rapid development for a short time and will become fat, but the growth will eventually be hindered so that when the ual age is reached for marketing such pigs they will not be nearly as large as if they had been fed more protein during the months immediatey following weaning.

Another great evil resulting from excessive corn feeding is found in the deteriorating influence which it exerts on constitution. Being deficient in protein, the tendency is eventually to reduce size; being deficient in ash, it tends to reduce too much the size of bene. It also results in a general weakening of the pig's system and makes the animal fall an easier prey

Nasal GATARRM

Cream Balm is placed into the nostrils, spreads over the membrane and is absorbed. Relief is im-mediate and a cure follows. It is not drying-does not produce sneezing. Large Size, 50 cents at Druggists or by mail; Trial Size, 10 cents by mail. ELY BROTHERS, 53 Warren Street, New York
