One hundred and twenty five idle men appeared Monday morning at the plant of the Willamette Pulp & Paper Company at Oregon City and asked for work, but there was none for them as the mill has all the laborers required. Over 900 volumes have been received at the office of County School Superintendent Seymour for the libraries of the schools of Polk county. These books will be divided among the various districts in proportion to the number of pupils in attendance. They consist of works of standard authors, reference books, etc., all neatly and durably bound, and they will be a valuable addition to the libraries of the district schools.

Another fake advertising scheme has been worked on the long suffering business man--the rural mail directory. The postoffice department refuses to give out these lists and turned the proposition down cold, but the fakirs go right on working the public. The local newspapers that are lending every nerve and energy for the town and carry big payrolls, and spend every dollar in the city are deprived of support by this means, while the transient fakir puts the money in his pocket and leaves for the next place--Salem Capital Journal.

This office has just published 1,700 county directories for the Independent telephone company, consisting of 32 pages on book paper and a nice cover in three colors. There are some 1500 names in the book, and each alternate page is taken up with ads submitted by Polk county's business men. Mr. C. H. Morris, the owner of the Dallas line, had the work done, and is to be commended on being the first telephone company to get out a directory for our county alone. The work was done in this office, and is probably the biggest job ever turned out by a county printer. We are fixed for doing any kind of work in this shop--nothing is too big for us to tackle, and we do not have to send any part of it to a metropolitan shop.

Do not forget Bargain Day. School supplies of all kinds at the Statin drugstore.

It seems to us that some one with the land and means would go into the florist business here. There is a big country to be made out of it. TRUTH DISCOVERED.

An Important Happening for Polk County's Benefit.

In copying the editorial of last week regarding the raising of fine stock in old Polk, the Portland Journal thus makes comment:

It is a matter of widespread congratulation that this truth has been discovered, and is being acted upon. It may be that other Willamette valley counties are quite equal to Polk, but what is said about that county is true, and important. Fine stock raising is not only a profitable business, when followed according to the unapproved method, but is an agreeable, interesting business, with less drudgery about it than is involved in grain raising. Fine livestock, suit and dairy products will eventually make the Willamette valley one of the richest and most favored regions in the world.
