SKIN DISEASES

HUMORS IN THE BLOOD

When the blood is pure, fresh and healthy, the skin will be soft, smooth and free from blemishes, but when some acid humor takes root in the circulation its presence is manifested by a skin eruption of disease. These humors get into the blood, generally because of an inactive or sluggish condition of the members of the body whose duty it is to collect and carry off the waste, and refuse matter of the system. This unhealthy matter is left to sour and ferment and soon the circulation becomes charged with the acid poison. The blood begins to throw off the humors and acids through the pores and glands of the skin, producing Eczema, Acne, Tetter, Psoriasis, Salt Rheum and skin eruptions of various kinds. Eczema appears, usually with a slight redness of the skin followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, face, arms and legs, though other parts of the body may be affected. In Tetter the skin dries, cracks and bleeds; the acid in the blood dries up the natural oils of the skin, which are intended to keep it soft and pliant, causing a dry, feverish condition and giving it a hard, leathery appearance. Acne makes its appearance on the face in the form of pimples and black heads, while Psoriasis comes in scaly patches on different parts of the body. One of the worst forms of skin trouble is Salt Rheum; its favorite point of attack is the scalp, sometimes causing baldness. Poison Oak and Ivy are also disagreeable types of skin disease. The humor producing the trouble lies dormant in the blood through the winter to break out and torment the sufferer with the return of Spring. The best treatment for all skin diseases is S. S. S. It neutralizes the acids and removes the humors so that the skin instead of being irritated and diseased, is nourished by a supply of fresh, healthy blood. External applications of salves, washes, lotions, etc., while they soothe the itching caused by skin affections, can never cure the trouble. S. S. S. goes down into the circulation and forces out every particle of foreign matter and restores the blood to its normal, pure condition, thereby permanently curing every form of skin affection. Book on Skin Diseases and any medical advice desired sent free to all who write. S. S. S. is for sale at all first class drug stores.

CURE BY CUTICURA AT CITY MISSION

Young Woman Found in Awful Condition with Scabies—Body a Mass of Sores from Scratching—Tried Many Remedies for Seven Weeks—Result Was Discouraging, But

ITCHING TORTURES YIELDED TO CUTICURA

"While I was doing missionary work in the lower portion of several cities I found it necessary to carry a little of the efficacy of a few medicines and after a while I found that a little knowledge of Cuticura was about all I needed. One of the very bad cases I had to deal with was that of a young woman who had come to us not only broken in spirit but in a most awful condition physically. Our doctor examined her and told us that she had scabies (the itch), impetigo, paries, rheumatism, etc., brought on from exposure and the effects of her ragged-edge life. Her poor body was a mass of sores from scratching and she was not able to eat solid food. We tried many things, a good tonic was prescribed and bought with a rubber stamp. We worked hard for seven weeks and you can imagine how discouraged we were. I saw a little improvement. One day I happened to see an advertisement telling how a little baby had been cured of a bad case of skin eruption, and although I had but a few cents with me, I bought a cake of Cuticura Soap and a bottle of Cuticura Ointment. I washed my face with the soap and I rubbed the ointment on my face and neck. I was not able to look for a position, being strong enough to work and full of ambition. In another month she left the home, and now has a good position in a nice family where she is respected and is strong and well. You may refer any one you wish to me, personally. Laura Jane Bates, 35 Fifth Ave., New York, N. Y., Mar. 11, 1907."

What Do They Cure?
 The above question is often asked concerning Dr. Pierce's Golden Medical Discovery. The answer is that Golden Medical Discovery is a most potent alterative or blood purifier, and tonic or invigorator and acts especially favorably in curing live way upon all the mucous lining surfaces, as of the nasal passages, throat, bronchial tubes, the throat, larynx, bronchia, stomach (as catarrh dyspepsia), bowels (as indigestion, constipation, flatulency or nervousness) even in the chronic or inveterate stages of these affections it is often successful in effecting a cure.

Resigned Too Soon.
 One Missouri lieutenant governor resigned too soon. When Frederick Bates was elected governor, there was chosen for lieutenant governor on the same ticket Jonathan H. Rivers of Howard county. Mr. Rivers held office a few months and resigned. Shortly after his resignation Governor Bates died, and there being no lieutenant governor the succession fell to the president of the state senate, Abraham J. Williams of Boone county, who served for some six months as governor of Missouri. Governor Williams was a preacher, a shoemaker and had one wooden leg—Kansas City Star.

Madrid and Its Climate.
 Along the Mediterranean shore Spain presents a narrow ribbon of fertile, delightful country. The region is often called "the garden of Spain." It is a great contrast to pass from these tropical shores to the wind swept plains of interior Spain. The level country inclosed by the Guadarrama and the Cantabrian mountains forms in the west an extensive wheat growing region. Toward the east as the rainfall decreases pasture encroaches upon arable culture. In New Castle on the south of the Guadarrama and in about the center of Spain, the political capital has been placed. Its level country in which it has been dropped, as if by accident, is for the most part a waterless plain, swept in winter by the piercing winds from the naked mountains of the north, sweltering in summer under the effect of the sun's rays on bare rock and soil.
 The climate of Madrid has been tersely described by its inhabitants as "three months of winter and nine of hades."

What Do They Cure?
 The above question is often asked concerning Dr. Pierce's Golden Medical Discovery. The answer is that Golden Medical Discovery is a most potent alterative or blood purifier, and tonic or invigorator and acts especially favorably in curing live way upon all the mucous lining surfaces, as of the nasal passages, throat, bronchial tubes, the throat, larynx, bronchia, stomach (as catarrh dyspepsia), bowels (as indigestion, constipation, flatulency or nervousness) even in the chronic or inveterate stages of these affections it is often successful in effecting a cure.

Resigned Too Soon.
 One Missouri lieutenant governor resigned too soon. When Frederick Bates was elected governor, there was chosen for lieutenant governor on the same ticket Jonathan H. Rivers of Howard county. Mr. Rivers held office a few months and resigned. Shortly after his resignation Governor Bates died, and there being no lieutenant governor the succession fell to the president of the state senate, Abraham J. Williams of Boone county, who served for some six months as governor of Missouri. Governor Williams was a preacher, a shoemaker and had one wooden leg—Kansas City Star.

Madrid and Its Climate.
 Along the Mediterranean shore Spain presents a narrow ribbon of fertile, delightful country. The region is often called "the garden of Spain." It is a great contrast to pass from these tropical shores to the wind swept plains of interior Spain. The level country inclosed by the Guadarrama and the Cantabrian mountains forms in the west an extensive wheat growing region. Toward the east as the rainfall decreases pasture encroaches upon arable culture. In New Castle on the south of the Guadarrama and in about the center of Spain, the political capital has been placed. Its level country in which it has been dropped, as if by accident, is for the most part a waterless plain, swept in winter by the piercing winds from the naked mountains of the north, sweltering in summer under the effect of the sun's rays on bare rock and soil.
 The climate of Madrid has been tersely described by its inhabitants as "three months of winter and nine of hades."
