YOURS FOR BUSINESS

Campbell&Hollister

DALLAS, OREGON

Portland Business College

"THE SCHOOL OF QUALITY"

Tenth and Morrison, Portland, Oregon A. P. Armstrong, LL.B., Principal

We occupy two floors 65 by 100 feet, have a $20,000 equipment, employ a large faculty, give individual instruction, receive more calls for office help than we can meet. Our school admittedly leads all others in quality of instruction. It pays to attend such an institution.

Said a Business Man: "Keep hammering away everlastingly on thorough work. It will win out in the end." **Said an Educator:** "The quality of instruction given in your school makes it the standard of its kind in the Northwest."

Open all the year. Students admitted at any time. Catalogue free.

References: Any bank, any newspaper, any business man in Portland.

BUILDERS, ATTENTION!

In connection with our lumber and shingle trade, we are now handling lime, plaster, cement, brick and sand. Lowest possible prices on all building material

THE CHAS. K. SPAULDING LOGGING COMPANY

To our customers, $1.25. Hides tanned into beautiful Robes. Our Narcotic Bait and Decoy attracts animals to traps, $1.00 per bottle. Ship your Hides and Furs to us and get highest prices. Anderson Bros., Dept. 71 Minneapolis, Minn.

Installment Plan

5, 10, 15 Acre Tracts

I will offer for sale just as soon as I can survey and plat all of my farm just outside the city limits. This will be known as the Garden Home Tract. A fine body of rich, black bottom land.

H. G. CAMPBELL

Caution.

Imitations have been placed upon the market so closely resembling Allcock's Plasters in general appearance as to be well calculated to deceive. It is, however, in general appearance only that they compare with Allcock's, for they are not only lacking in the best elements which have made Allcock's so efficient, but are often harmful in their effects. Remember that Allcock's are the original and only genuine porous plasters—the best external remedy known—and when purchasing plasters the only safe way is to always insist upon having Allcock's.

Hon. Charles V. Galloway will address the citizens of Sheridan and vicinity on next Saturday evening, October 31st. The Sheridan band has been engaged to furnish music for the occasion. Other noted speakers will also be present.

Card of Thanks.

Mrs. John W. Townsend and family wish to express thanks to all who so kindly assisted during the sickness and death of their husband and father.

NEW SUBSCRIBERS THIS WEEK.

Chas. Lipp, Jefferson, Oklahoma.
Mrs. A. B. Starbuck, Mt Tabor.
Chas. Reese, Perrydale.
F. T. Romig, McCoy.
Mrs. F. E. Lynn, Perrydale.
Mrs. Viola Bedwell, Pratt, Kansas.
Frank Fuchs, Dallas.
L. Bruckner, Dallas.

Mr. T. S. Brown and family left Monday for their new home in San Jose. We expect to see them all back on their Salt Creek farm again unless the change should prove beneficial to Mr. Brown's health, when of course, they will make that country their home.

$320.00

FARMERS' TRAIN

To Show in Polk---More Land to be Cut Up---Actual Cost of Streets.

DEMONSTRATION CAR

To be In Dallas and Independence on November 6th.

A farming demonstration train will be operated making an eight day tour through the Willamette Valley leaving Portland November 4th. The train will be run in conjection with the O. A. C. & Experiment Station, of Corvallis and is tendered them by Mr. R. B. Miller grand freight agent, S. P. Co. It will be run entirely for the benefit and education of the farmers of the section and a full demonstration of agriculture, dairying, horticulture, also lecture on annual husbandry will be given by the faculty from train, the object being to promote these industries in the Willamette valley. The train will consist of seven or more cars and lectures and demonstrations will be made from each car. One car will be equipped and devoted to agriculture, growing of grains, grasses, etc., demonstrating modern machinery. Another will be devoted to dairying, live stock, milk testing and milk separating. Another to horticulture, budding, grafting and spraying also fruit packing will be demonstrated by M. O. Lownsdale. There will also be a car fitted up with model stall in which cows will be carried and the process of milking by machinery will be demonstrated by the herdsmen. The train will be accompanied by a photographer in addition to above. There will be a day coach for accomadation of lecturers and where lectures will be given. One sleeping car and an official business car. Trains similar to this have operated in Eastern Oregon and Washington last summer with pronounced success and were of material aid to the farmers, dairymen and fruit men, so much so that frequent requests are being made for other demonstrations. Our aim is to give the people the rare opportunity of getting the benefit of experience of O. A. C. staff. All farmers are cordially invited and urgently requested to attend. The train will arrive at Dallas at 11 a. m. and demonstrate until 12 p. m.

Speakers and demonstrators who will accompany the train are as follows: Dr. Jas. Withycombe, director Oregon experiment station; Mr. M. O. Lownsdale, horticulturist; Prof. A. B. Cordly, entimologist; Prof. C. I. Lewis, horticulturist; Prof H. D. Scvdder, agronomist; Prof. F. L. Kent, dairy husbandry; Prof. R. W. Allen, assistant horticulturist; Mr. Harry Asbahr, herdsman.

The train will start November 4 and will be at Sheridan on November 5 from 8:45 to 10:15; at Dallas from 11 to 12:45; at Independence from 1:50 to 3:25.

A HIGH CLASS ENTERTAINMENT

Bancroft-Lewis Coming.

Under the auspices of the Y. M. C. A. of Dallas college, Dr. Bancroft, the famous psychologist, has been secured to lecture in our city on October 30th and 31st in Woodman hall, assuring people of something startling as well as entertaining along educational lines.

Dr. Bancroft will be ably assisted by Miss D. Lillian Lewis in a repretoire of literary and vocal selections. These artists are considered the highest class lyceum talent, and it speaks great credit for Y. M. C. A. to have secured such high class artists for our city.

ANOTHER SUBDIVISION.

An 80 Acre Tract Near Reservoir To be Platted.

More land in this vicinity is to be broken up and made capable of sustaining 16 families where it now does one. The 80 acres surrounding the city water reservoir has been purchased of Mr. and Mrs. Franx Rowell by a half dozen of our town capitalists and they will soon have it surveyed and laid off in five-and 10-acre tracts for disposal to the small fruit grower. The gentlemen are not yet decided as to whether they will set it out in fruit themselves or allow that to be done by the purchaser. The tract is one of the most sightly in this location, commanding a magnificient view of almost all the entire valley, embraced in which are a couple of our famous snow peaks. The land is as good fruit land as there is in this region, and that is saying a good deal, because there is none better in the world. Everything can be grown prolifically and without any dread of a failure of orop. The entire tract is so situated as to be susceptibly of irrigation over its entire surface, if so desired. The gentlemen interested in the venture are Messers. F. J. Coad, R. E. Williams, W. V. Fuller, I. N. Woods, R. L. Chapman and W. L. Soehren.

THE ACTUAL COST.

Of Our Macadam Street Improvement in Dallas.

City Auditor Brown and Chief Engineer Morrison, the committee appointed by the city council to figure out the exact cost to each individual property owner on the street macadam work has have finished their labors and turned the result of their findings over to City Treasurer Vassall who will report to the city council next Monday evening the amount to be refunded those who have paid in more than was necessary. It will be remembered that at the time of making the assessment a certain price per foot was figured on, this amount being placed sufficiently high so it was assured the cost of improvement would be fully covered. The amount named was $2.25 a foot, so that in some instances there is quite a rebate coming to the owners, more especially on the Bank block, and the Elite millinery block, as we might designate them. The block costing the greatest amount was the one through which the race runs, and which had to be enclosed with concrete. By blocks the cost is as follows: Main street from Oak to hill, $2 a front foot; Main, between Oak and Mill, $2.34; Mill, between Main and Jefferson, $2.14½; Main, between Main and Court, $1.83; Main, between Court and Washington, $2; Court, between Main and Jefferson, $2.25; Court, between Main and Railroad, $1.87; Mill, between Main and Railroad, $1.70. The cost of the block on Washington has as yet not been figured up, as the fixing of that block will probably have to be delayed until spring. These figures do not include the cost of the curbing, for which a seperate assessment was made Some of these blocks already had curbs, some were built of cement and some of wood, the former at a flat cost of 25 cents a foot and the latter at 15 cents. This will be reported on separately.

Mr. and Mrs. George McBee have moved to town for the winter.

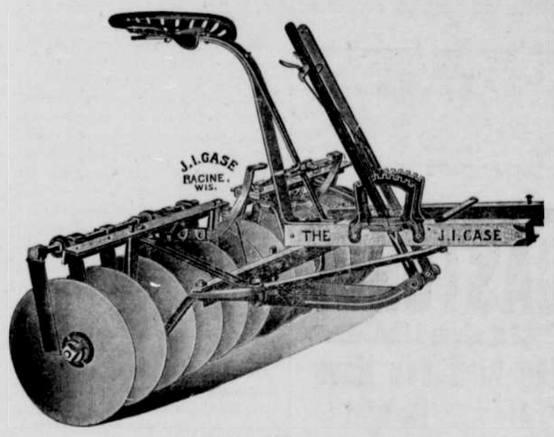
Little fellows high buttoned Russian Overcoats **$4.00 to $8.00**

Boys of all ages can get better satisfaction buying clothes here---than any other place.

Sold by The Bee Hive Store, Dallas

New J. I. Case Disc Harrow



The latest, newest and best thing in the disc harrow line. Sure to please the most critical.

The Slicer Scrapers are a new feature. Notice the illustration above. By a motion of his foot the operator causes the scrapers to move back and forth, slicing the dirt from the discs, thus keeping them perfectly clean.

The Frame is horseshoe in shape, and made of angle and flat steele; is very light and exceeding strong. The harrow is very light, but is so braced that it is very strong and durable.

The Bearings are a great feature in the case. Two chilled rings which take the wear are fitted in each. Bear in miud that these rings take the wear and that they are chilled. When, after long use, they become worn, they can be easily removed and replaced by new ones, which cost but little,

The Spools between discs are strong, and one end is larger, and cup-shaped to fit the curved side of the disc, thus making a large bearing and so supporting the disc that there is no danger of its working loose on the shaft.

The Bumpers are very large, and overcome completely the end or side thrust. They form complete support, the pressure on one gang being concentrated by the pressure on the other.

The Frame is Flexible, thus each section operates independently of the other. If one end of section raises over an obstruction, the other end remains at work, and the companion section not disturbed.

The Stop at rear end of pole is made of steel, and is so constructed that center discs can be adjusted to to work as desired. **Double Levers** only are used.
