OBITUARY.

John Washington Townsend was born in Missouri, January 4th, 1832, died at his home near Buell, October 19th, 1908, after eight days painful suffering.

He crossed the plains with his mother, brothers and one sister in 1847, settling in Polk county, where the most of his life was spent. He was married to Miss Lettie E. McCariken, January 7, 1854. Eleven children were born to them, six of whom survive him: Mrs. Hannah Dickey, of Sheridan, Jesse, of McMinnville, Mrs Anna Reed, of Buell, and Mary, Mabel and Nellie, at home. He was a member of the Baptist church from early life, and also a member of Amity lodge, No. 2. A. F. and A. M. which order performed the last rites of the ceremony, just north of Dallas. He was a kind husband, father and neighbor. To know him was to love him.

Death has robbed us of our treasure,
And the angels have him now;
Where no shade of pain or sorrow
Comes to cloud this dear one's brow.
O'er his grave the birds are singing,
But they cannot bring our loved one back.

One more chair is vacant,
One more grave is filled,
One more form is laid to rest
By death forever stilled.
Oh, how we miss this dear one
Around the family hearth;
His face was always sunshine,
His words were filled with mirth.

He had a heart most loving,
A quick and ready hand,
A cheering word, a pleasant smile,
For each and every one,
But death has taken him to rest;
And left the sting of sorrow
In many a loving heart.

Jack London's New Book.

Jack London has just written a book of 142,000 words entitled "Martin Eden." The Pacific Monthly has purchased for $7,000 the serial rights for this vivid story. It began in the September number of the Pacific Monthly and will run for twelve months. It is not too much to say of "Martin Eden" that it posesses more of facination and virility grips the imagination and the sympathies more keenly and imparts more of courage than any book produced in years. Send 50 cents in stamps to the Pacific Monthly and they will mail you the Pacific Monthly for six months, beginning with the September number, in which the first installment of London's story appears.

EDISON AMBEROL RECORDS

IMPORTANT ANNOUNCEMENT: We take great pleasure in announcing to the thousands of delighted owners of Edison Phonographs a number of changes and improvements in both Phonographs and Records, which will add much to their pleasure in the future.

Despite the great popularity of the Edison Phonograph in its present form, and the Edison Records, the result of a series of experiments made by Mr. Edison and his associates in his laboratory at Orange, adds to what we now have to offer music lovers the following very interesting improvements:

1—A new Record made of a new composition, by a new process and playing an average of more than four minutes.

This will be known as the Edison Amberol Record. Its most important feature is a recording thread of 200 lines to the inch, or twice as fine as the present Record of 100 threads. By this means more than twice the playing length is secured without increasing the length or diameter of the Record itself.

Since the finer thread required a smaller reproducing point it became necessary to find a new composition that would successfully resist the wear of the smaller reproducer. The successful and accurate moulding of a 200-thread Record, formed of a much tougher composition, also necessitated changes and refinements in our moulding process.

More than two years have been spent in experimenting to secure these results, the work of several experts being constantly directed and supervised by Mr. Edison.

The Edison Amberol Record is the most wonderful production of its kind that the world has seen. The engraved sound waves are so minute that the eye cannot follow them, and yet the sounds are reproduced even more clearly, more naturally and more sweetly than the present Record. At the same time, they are more durable and will wear longer. The present two-minute records will be continued without change.

The Edison Amberol Record will be sold at 50 cents each, making it the lowest price Record now sold, considering also that it will play longer than any other talking machine record now before the public.

2—A series of attachments by which, at slight cost, all present Phonographs, except the Gem, may be equipped to play the longer Record in addition to the present one.

With a Record of a finer thread it becomes necessary to offer an attachment whereby the new Record can be played upon the old Phonograph, so that users will not find it necessary to buy a new Phonograph in order to play the new Records.

Two attachments are required to transform an old Edison Phonograph so that it will play the Amberol Records.

The first is a differential gear which is compartively easy to attach to any Edison Phonograph except the Gem, and which, by changing the speed of the arm which carries the reproducer, makes it possible to carry either the two-minute or four-minute Records.

The second is a new reproducer with a fine enough reproducing point so that it can be used in the finer engraving of the new Records.

Attachments will be sold at the following prices:

For Standard Phonographs, $5 each; for Home and Triumph Phonographs, $7.50 each.

These attachments are now on sale at L. D. Daniel's who will explain also the method of attaching.

3—Several new types of Edison Phonographs by which both the present and the new Record may be played at the pleasure of the operator.

Three new types of Phonographs which are now for sale for playing both the two-minute Records and the Amberol Records, will be called the Edison Standard Phonograph Combination Type, Edison Home Phonograph Combination Type and the Edison Triumph Phonograph Combination Type.

The new types of Edison Phonographs will be sold at:

Edison Standard Combination Type, $30; Edison Home Combination Type, $40; Edison Triumph Combination Type, $60.

We also have the Idelia, Balmoral, Conqueror and Alva Phonographs equipped to play both Records, and finally, we will continue to sell the Gem, Standard, Home and Triumph Phonographs at the same prices as before.

The importance of these improvements cannot be over estimated. Everyone who has had any interest in the Edison Phonograph will find that interest greatly increased and his amusement greatly enchanced by hearing the Amberol Records, which are longer, sweeter and better.

All great improvements in the way of reproducing sound have been made by the National Phonograph Company, and this last improvement—that is, the long Record—makes the Edison Phonograph unquestionably the best Phonograph for pleasure or instruction.

Let us add a new attachment to your Phonograph.
