Scientific show window lighting produces even distribution of light over your entire display. Every corner of your window is attractively and brilliantly illuminated—there is no "spotty" effect.

Volume or quantity of light, however, should not be mistaken for good illumination. Glare is as bad as too little light. Scientifically planned by lighting engineers, a good window lighting installation will make your store prosperous.

Multitudes pass your store nightly. They are all prospective customers and not one of them can resist the attraction of well displayed goods set off by electric window lighting.

You want your window displays to reflect the character and enterprise of your establishment. Call us up now.
