Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by restoring the hearing power of the ear. The only way to do this is by using the "Fletcher's" method. When the ear is diseased, it is inflamed, and the hearing power is lost. The Fletcher's method is the only one that can cure the ear, and restore the hearing power. It is a simple, safe, and effective method, and has cured thousands of deaf people. It is the only method that can be used at home, and does not require any special apparatus. It is the only method that can be used by anyone, and does not require any special training.
