-larger, cleaner, and finer fruit
-more money. Isn't that fruit
growers' reasoning? Nothing
will contribute to this end more than effective spraying. And Effective Spraying can best be attained with

Bean Magic Spray Pumps

Effective spraying means High Pressure Spraying and till the advent of the Bean Magics a high pressure could not be maintained with a hand pump for any length of time, on account of the body-racking effort needed to operate it. The Bean patent spring divides the work between the two strokes of the handle and works against only one-half the pressure shown on the gauge and saves exactly one-third the labor.

We have these pumps in stock and will be pleased to show them. We cannot recommend them too strongly.
