#### OREGON LAND CO.

Was specially organized for the purpose of buying and subdividing large tracts of land, and has, during the past two years, bought and subdivided over 3200 acres of land into five to twenty acre tracts. The success of this undertaking is shown in the fact that out of 280 tracts of land placed in the market, 225 have been

sold.

We claim that ten acres of choice land in fruit will yield a larger income than 160 acres in wheat in the Mississippi valley.

We also make valuable improvements in the way of roads, fences, etc. We can sell a small tract of land for the same price per acre as you would have to

Farmer, Horticulturist, Dairyman, Etc.

HOUSEHOLD RECIPES. Snow IUE-CREAM. - Beat well together one cup clear, sweet cream, one cup sugar, and one fresh egg; set in snow until cold, then stir in light snow until thick. Put in the flavoring before the snow is added, we prefer vanilla.

COCOANUT COOKIES: No. 1 .- One con sugar, one cup butter, one-half cup milk. wo eggs, one cup dessicated encount, ne teaspoon baking powder sifted in our enough to roll, not too stiff. No One cap butter, two caps of sagar' one cup milk, four eggs, one teaspoon sods, six cups flour, roll out, sprinkle in any shape desired.

PUMPKIN CUSTARD. - Cut a pumpkin into inch square pieces, stew slowly until cent, isinglass 25 per cent. thoroughly cooked, then press through a colander or sieve. To every pint of pumpkin add a piece of butter about twice the size of a walnut, half a teaspoon of salt (scant), one piut of good milk, half a teaspoon each of mace and cinnamon, one teaspoon of ginger, one cup of sugar, and four well-beaten eggs Bake in a pudding-dish, without crust, or in pie tins with a li ht crust.

BOSTON BROWN BREAD: - One and one alf tescups flour, one and one-half tea cups cornmeal, one and one-half teacups rye or Grabom floor, two and one-balf cups milk, slightly sour, one-half cup syrup, a little salt, one teaspoon soda; nix with a spoon, piace in a two quart basin; steam three hours. If you have neither rye nor Graham flour at hand, make it with two cups of flour and two and a half of meal, and the rest as above given. It is very nice made this way, better than any baked brown bread.

A Scotch sheep breeder says the lamb poor feed, the center pair of inciso s are crude, \$1 a pound. 'shed" at about one year and are replaced by two large and permanent teeth. At about two years old a second pair of large teeth are required; at three 14 cent a pound. years old a third, and at four years a fourth pair; the animal is then termed "full mouthed." When the sheep are liberally fed the

first pair of permanent teeth are acquired at about ten month old, the second at 18, the third at twenty-seven and the fourth at about three years There are, however, exceptions to every ule, and the teeth cannot always be relied on in correctly determining the age. IMPERFECT SIGHT OF HORSES AND CATTLE am forced to believe, says a writer in Japan, 40 per cent. the Horseman, from much practical experience among young horses, as well as cent. those more advanced in years, that in nineteen cases out of twenty, the visual organ has not the power of perceiving things aright. There are several causes in operation to produce shying. I have known many with narrow and flat foreeads, possessing small, ill shaped eyes, per cent; 50 per cent. desperate and dangerous shyers. The shape of the cornea has not been convex, per cent. of sartonine, \$21/2 a pound. one part than at another. They are per cent. what I have termed them -"angularly conver" I haved noticed a similar shaped eye in the bovine race. I dare say many persons have noticed that cows when driven along a street, shy a good deal. which may be accounted for by the fact that they meet with objects they are unused to, and being excited, their vision 3-10 cent. is less perfect than when they are in a

tranquil state PROSTED GRASS BAD FOR SHEEP. An old Colorado runchman who seems to understand the sheep question, writing cent. from Central New York, in an article in the Iowa Homestead says "it has been quite settled this season that frosted grass is detrimental to sheep. Flock upon flock were kept in the fields this winter until late. The animals filled themselves well and it was supposed they were doing finely. The ill-effect was only discovered when the sheep gave ocular evidence of poverty of conditon, 25 per cent; 20 per cent, above ten gal-Even these flocks, given a daily ration lone capacity. of grain and still having access to frosted grass, did poorly. Taken from the grass, lava tips for burners, 60 per cent; 55 per and put upon dried feed they degan to cent. recuperate, but many will not entirely recover lost ground until turned to fresh ews. Immediately after heavy freezing should remain until there is a good ware, 60 per cent; 40 and 45 per cent. bite of fresh grass in the spring, at least Glass chimneys, etc., 60 per cent.; 40 in this latitude."

Mr. Durfee, clerk of the senate com-Notes Gathered By Those Who Are Progressive.

Mr. Durfee, clerk of the senate committee on floance, which had charge of the bill for the senate, has compiled a complete list of the changes, which are present herewith. The first figures of the McKinley bill; the last those of the McKinley bill; the last those of the law in force since the revision of 1883. As the changes in way instance has been from 1 3 10 to 3% ocents a pound, according to size; 1% cts. Cylinder and crown glass, polished, 4 changes in way instance has been from 1 3 10 to 3% ocents a pound, according to size; 1% cts. Cylinder and crown glass, polished, 4 changes in way instance has been from 1 3 10 to 3% ocents a pound, according to size; 1% cts. change in many instances has been from ad valorem to specific, it will be seen that per cent is in many cases only used in the figures for the old law:
