Was specially organized for the purpose of buying and subdividing large tracts of land, and has, during the past two years, bought and subdivided over 3200 acres of land into five to twenty acre tracts. The success of this undertaking is shown in the fact that out of 280 tracts of land placed in the market, 225 have been

sold. We claim that ten acres of choice land in fruit will yield a larger income than 160 acres in wheat in the Mississippi valley.

We also make valuable improvements in the way of roads, fences, etc. We can sell a small tract of land for the same price per acre as you would have to pay for a large farm. Send for pamphlet, maps and price list.
