The American hog is steadily rooting his way into Germany. The Cologne Grzette, his most pronounced opponent, now layors letting him in for sundry must excellent economic reasons, all of which are really preferable to the prosect of butting. We are all selfish, and will look after our own interests above all others; but there are indirect benefits which, in our extreme cupidity, we are overlooking every day. So e cannot live and prosper within ourselyes. E ery business in our community should be co-aperative to succe d. Those who wrap themselves in the concon of greed will be found in the tail end of the procession, and will finally fall behind among the stragglers and be lost entirely to the interests of the community. Factional fights must be buried, and all interests pull together in harmony. Then Heppiner will be ready for the good work of a board of trade.
