

CATARINO GARZA.

Mexico's Most Recent Revolutionist.

HE IS KNOWN BY TACOMANS.

From an Independent Clerk He Has Made To Be A Powerful Agitator Who May Yet Sit to Mexico's Presidential Chair.

Don Catarino Garza, the Mexican revolutionist, who is known by John T. Long, J. H. Cotton and others in Tacoma, has had a remarkable and interesting career.

Personal appointments describe Garza as being much more than the ordinary border adventurer. Not only is he strong physically but he possesses brains, they say, capable of directing the efforts of a man who is not only powerful but ambitious.

Garza is a man about 30 years old and is now in the prime of life. As a boy he possessed a fierce temper and early exhibited the will power and qualities of a leader which have very recently pushed him to the front as the main spring in the Mexican revolutionary movement.

About seven or eight years ago Garza went to Laredo, where he distinguished himself as a political and social reformer. For two or three years he was constantly in hot water and became a thorn in the side of the authorities of Laredo, Corpus Christi and Rio Grande City.

Garza is a man about 30 years old and is now in the prime of life. As a boy he possessed a fierce temper and early exhibited the will power and qualities of a leader which have very recently pushed him to the front as the main spring in the Mexican revolutionary movement.

derived from hip-pocket practice. He has a renegade German in his band who acts as a drillmaster and general military adviser. They call him "El Doche" (the Dutchman). He is skilled in arms and understands bushwhacking to a dot.

Garza was born in 1856 near Matamoros. He has been printer, store clerk, sewing machine agent, policeman and had various other small occupations, but not until he became a revolutionist did he find a field wide enough to satisfy his desire for power or a means of gratifying his vaulting ambition.

Anthracite Companies in the East Lower the Price. PHILADELPHIA, Jan. 22.—It was learned yesterday that the Lehigh & Wilkes-Barre Coal Company made a sharp cut in coal prices Wednesday and it was rumored that other companies were doing likewise.

It is said that the cut was made by the Lehigh & Wilkes-Barre in order that the Reading might understand what the coal companies could do in case they attempted to enforce the demand for a larger share in the anthracite pool.

The Millionaire Powder Manufacturer Deeds Away His Property.

WILMINGTON, Del., Jan. 22.—William Dupont, son of the late Colonel Henry Dupont, head of the great powder firm of this State, today transferred all his real and personal property to ex-Secretary of State Thomas F. Bayard for \$1.

The value of the estate is put at several millions of dollars, and the transfer has created a hubbub here. For several months it has been rumored that Mr. Dupont had instituted proceedings for an absolute divorce from his wife, his own first cousin and daughter of one of the most famous lawyers in the State.

Dupont many months ago left his home in the night and took refuge with his aged mother, who lives at the old homestead, about three miles from this city. It was alleged that his wife went to her mother's home. The deed of transfer was drawn in Minnehaha county, South Dakota, on January 11, and was attested before P. J. Kedge, a notary public.

The laws of this State provide that in giving a fee simple title the wife shall join with the husband in the deed if she is living and not divorced. This last move on the part of Mr. Dupont has set tongues wagging again, and the fact that his wife's name does not appear in the deed leads to the supposition that he has gone to South Dakota, secured a divorce and will locate there in the powder business.

A New Jersey Butcher Establishes a New Industry in the Woods. HICKENACK, N. J., Jan. 22.—An engine slaughter house has been discovered in Bergen county, N. J., situated in the dense forest of the Palisades at a point between Fort Lee and Leon.

The horse butcher is Adolph Shaffer, who intends to cater to the Polish colony about to be settled on the Northern railway Park, a station on the Northern railway of New Jersey.

A reporter who visited Shaffer's place yesterday was sickened by the peculiar odor that prevailed. A horse's head was seen in a box, and a pig's head was seen in a box. A dog's head was seen in a box.

Results of a Lamp Being Overturned in a Woman's Lap. PHILADELPHIA, Pa., Jan. 22.—Mrs. George Collins, who with her husband and four children moved from Mobile to this city eight days ago, was burned to death Wednesday night. She was seated at a table on which a lamp was burning.

Two Pedestrians Ran to Her Assistance, but were too late to be of service. The woman had been completely denuded by the fire. But a small patch remained of her underwear, which adhered to her back, and her stockings were even burned to her shoe tops.

Prominent Localities of the Year Will Have One Next Summer. NEW YORK, Jan. 22.—Messrs. A. J. Cassatt, A. F. Wilcox, John Hunter, O. D. Dennis, J. A. A. H. Morris and D. B. Withers resolved last Tuesday upon a private expedition to the States, to be undertaken in the next summer.

Seattle Forest Dies of Heart Failure in Seattle. SEATTLE, Jan. 22.—Edward Stevenson, whose stage name was Ned Forrest, died very suddenly of heart failure at Providence hospital yesterday morning. Stevenson was well known in Tacoma, where he had played for nearly two years.

SOME ENGLISH COMMENT.

No Message From the President to Congress Until Next Week. WASHINGTON, D. C., Jan. 20.—There is a decided opinion here that a message around the navy department this morning and a more peaceful state of affairs prevailed.

Secretary Tracy had a conference with Senators Cameron and McPherson of the Senate naval committee and it is understood the secretary had before them a statement of the expenditures he has recently incurred in his preparations for a naval demonstration.

It is further understood the secretary received assurance of the committee that he will be supported in every proper and necessary expenditure involved in his precautionary movements.

Secretary Tracy had nothing to give out, and at the state department it was said that the navy department was quiet as the navy department was quiet.

NEW YORK'S NEW CATHEDRAL.

The picture shows the cathedral of St. John the Divine as it will appear, the plans of Messrs. Heins & LaGrange, architects of the design shown, having been substantially accepted by the trustees. It will be probably the finest building structure ever built in New York.

SCARED BY THE GRIP.

Eastern Lumber Camps Deserted. HALF OF THE MEN ARE SICK. Many Deaths Reported, and Owing to Lack of Medical Aid the Men Are Pining in the Cities—Lumber Interests Suffering.

ROCHESTER, N. Y., Jan. 22.—Stories of the terrible suffering and pitiable condition of lumbermen in the lumber camps of the Eastern bay and back Canada woods-districts from the ravages of the grip have been received here and are verified for by lumber and wood pulp agents who have recently come up there.

Many camps are deserted, the accommodations are meagre and it is no fit place for sick men, the lodging houses being log cabins or shanties of the crudest kind. Medical aid is hard to secure and the men are pining away and not well off.

Agents for wood pulp syndicates have returned to report the back Canada woods district in a similar condition. The lumbermen are scared at the prospect, as they call it, and the large towns and cities where they can secure medical aid. In this way the lumbering interests are suffering.
