ALLIANCE COLUMN

EDITORIAL NOTES.

John Day Sentinel: The Grant county farmers' alliance held a meeting at Mount Vernon yesterday. We noticed quite a number of people going in that direction. Today is the time set for the people's party convention at the same

John Day Sentinel: J. C. Luce, who has been over in Herrey county, a with doubt if cutting dry corn fodder ns once more. John organized five al linners while there and attended a count convention of the people's party. A ticket was made up partly from the own tumber and partly by indorsing nom inces of the two old parties.

bmitted by a subscriber. How the A livnes is Coing to Places. Mr. J. B. Hunter, a well-known repuls-

lican of Nebraska, said a few days agin Denver, when saked about Nebrasks politics: 'Now, you ask about politica' and then as a luncheon, and so affairs in Nebraska. Being a republican, ting nine-tenths of the fodder, I regret very much to say that in my opinion the farmers' alliance will aweer of the Newbury maximum freight bill VE HAVE FOR SALE ALL KINDS OF UNdressed Lamber, 16 miles of Heppuer, at hat is known as the

History Repeats Itself.

Des Moines (Ia.) Tribune; The leadership of the two old parties is a unit in the opposition to the issues presented by democratic parties united in opposition few hours later.

That cutting food adds to its feeding that cutting the cutting food adds to its feeding that cutting the cutting food adds to its feeding that cutting the cutting food adds to its feeding that cutting the cutting that cutting the cut to the new party of their day, and that of necessity drove the free soil elements value is doubtful; beyond this, the cuttogether also. A like movement is now ting induces an animal to cat more and in progress in every state, and we wel-come the transition. The plutocrats will now be driven together, and every man cattle will reject more than 8 per cent. must choose the banner under which be of the food, if bright and good, I would will give battle.

Third Party Possibilities

Mr. Davis, the farmers' candidate for congress from Kansas, has introduced a bill to aid the working people, that provides that the government shall immediately build postoffices all over the country, making them two-story build room, to which the nation and all the states may send , ublic documents, and let the people make such additions to the library as they choose. The government to issue paper money to pay for the whole thing. Give us the hard fisted lation. We need more of them in congress and the state legislatures.

The Law of Happiness.

The best definition of happiness is that the world.-Woman's Tribune.

Some think they can go to places of are substantially wrong in their ideas of the of another. the real source of happiness. You cannot create it within yourself, neither can another give it to you by his will. The law of happiness is this: You must, through desire or honest effort, or both. strive to make some one of God's creat ures more comfortable, contented or happy. In doing so you receive by reflex setion the happiness you create, be-cause all things return to their source.

What is 1t?

E. O.: At no time has so much "filla-ree" appeared as may now be noticed on the Umatilla county hills. This is the finest kind of wild grass, very nutritious, and eagerly eaten by stock, which grow fat upon it. It has heretofore been confined to certain localities, but seems now

to have spread everywhere, and excel-lent rat ge is provided. Settlers who filed timber-culture or

CHOPPING UP CORN FODDER.

Do Not Let the "Next Cow" Muss the Fodder.
I may not be called orthodox in ubelief, but if fed in small quantities a time so that it will be eaten up clary I have cut corn fodder and f d it v by way of comparison, and w

ter was fed in small amou could not see the gain in a v showed any return for my labor. I foun however that I could induce a cosy to eat more stalks up clean at a feeding by cutting them in i-inch lengths, but on dividing the uncut stalks that would represent the cut fodder into two fethe amount rejected was very small

found it a better way to cut up what was left of the rejected stalks, put a little meal upon them and feed them now and then as a luncheon, and so I am cu One of the chief reasons why so much

fodder is wasted in feeding stalks out of the state this fall. Both the old parties doors, and also where the mangers are will put up strong tickets, but that will crowded with fodder when feeding in not make any difference. The alliance the barn, is the mussing of it by the "next cow." It is nearly impossible to an idea has been freely expressed to the an idea has been freely expressed to the has, even momentarily, been in uneffect that the bountiful crops this year other cow's mouth; and I have noticed have toned down the aggressive spirit of that the same was nearly the case the farmers. It is a mistake. The alli when stalks are fed in the manger; so ance is stronger than ever. The defaat so when I fed stalks—before the silos of the Newbory maximum fraight hill were built—I put partitions in the manof the Newbury maximum freight bill gers so that two cows could eat toadded new fuel to the flame. The farm, gether, and if about "so much" was fed, the stalks were eaten up clean.

One winter I tried cutting stalks for two cows; after feeding them all the whole stalks they would eat up clean I fed them all the cut stalks they could consume in the same way without changing the grain ration, and after a week's trial they had not increased the yield of milk an ounce, and after this I the allied industrial forces of the counlet them cut their own stalks. In cooking try; and the fact that they voted together or soaking the stalks I have had no expeio Kansas and Nebraska should evoke no rience, nor do I recall any experiment surprise among thinking people. It is that shows that after the natural juices but history repeating itself, and only have been dried out of a plant any plan makes manifest that which all reformers of steaming, cooking or soaking has showed better feeding results than does have well anderstood from the beginning the slower mastication of the food in a The pro-slave elements in the whig and dry state, adding the water as drink a

vote would be against cutting. If the then say that possibly it might pay to rig np a power cutter.—John Gould in Rural New Yorker.

FEEDING SCIENTIFICALLY

Results of Experiments at the Massachu setts Agricultural Station.

There are three classes of substances that give value to food for animals or ings. A postoffice on the first floor, and human beings-fat, protein and carbo the second floor to be given to the use of hydrates. The fats are pure fat or oil the people for a library and reading very similar to the pure fats found in meat or butter. The protein is the food that is used in the animal system to make muscle and lean meat. These can not be made from fatty food-protein is absolutely necessary for such formation. The carbohydrates comprise such substances as starch, sugar, etc., which are farmer for plain, straight, practical legis made over by the animal into fat-as butter, tailow or pork.

There need be no difficulty in under-

standing these terms if we remember that the fat and the carbohydrates cannot possibly make anything but fat meat The best definition of happiness is that or butter, and the protein cannot possi-given by a French woman, who says it is bly make fat meat, but only lean or a state of constant occupation, for a de sirable object, with a sense of continued than the carbohydrates, because they progress. It is this condition which are more digestible and more easily makes reformers the happiest people in made into meat or butter. In fact, when figuring the value of a feeding ration scientists consider the fats equal in value Some think they can go to places of amusement and find happiness. Some think they can create it within themselves, and nearly every one declares stand that all these classes of substances that their happiness is dependent upon must be fed and that trouble will follow the conduct of others. But all of these if we give too much of one and too lit-

These foods as bought at Amherst con tained the following quantities of these three feeding substances in pounds per

Corn- Wheat seed Linseed Gluten meal. bran. meal. ineal. meal. seed Linseed Gluten meal. Fat. 85% 88 204 180 131 Protein . 227 325 801 600 630 Carbohy-drates 1,359 1,000 422 726 909 Total....1,67114 1,413 1,427 1,506 1,750

The substances that go to make up the full 2,000 pounds in each ton are water, ash and cellulose. Ash is what That produces that beautiful, soft, deli is left after burning the whole food-it

One dollar's worth of corn will give a large quantity of carbohydrates and comparatively little fat and protein, while one dollar's worth of linseed meal gives less carbohydrates and a great deal more of the others. In fact, the corn has too little protein while the linseed meal has too much. It would pay better to buy one dollar's worth of each of these foods and mix them than to buy two dollars worth of either one. A good sized cow should digest each day food enough to contain 215 pounds of Mr. Leander Copple was in our neigh- and 1/2 pounds of carbohydrates and 1/2 pound of fat, or more in the Mr. Sam Creeson made a trip to Black be fed in the form of hay, folder or ensilage, but the grain is needed to give the ration strength without adding too much to its bulk.

The problem is to buy the grains that Mr. Gosney was in our neighborhood, bring most to the farm for the money If a man buys cotton seed meal or lin seed meal he would be foolish to feed it with the same measure used in feeding cornmeal or bran. Six pounds of corn meal might have the best effect on a cow if fed with clover hav, while six pounds of cotton seed meal, costing the same money, might kill her, because it would supply too much protein. We doubt if it will pay any farmer to feed heavily of concentrated foods unless he is willing to give up the "forkful" and quart sys-tem and feed by the scales with the idea of giving so many pounds of fat, protein and carbohydrates to each animal in stead of so much "hay and grain Tables of analyses are now easily obtained and the farmer can figure them out. In these times of high prices it will pay any farmer to figure on this proemption claims on railroad land in 1883 or 1887 can recover their fees by applying to Frank H. Snow, U. S. Commissioner, at Lexington. Bring your filing receipt. 435-tf. matter. Too many farmers are buying cornmeal for protein, which is just about as economical as buying sawed
