THE ORIGINAL
Webster's Unabridged DICTIONARY.

BY SPECIAL ARRANGEMENT WITH THE publishers, we are able to obtain a number of copies of this dictionary in every home, school and business house. It fills a vacancy, and furnishes knowledge which no one but just other volumes of the choice books could supply. Young and old, educated and ignorant, rich and poor, should have it within reach, and refer to its contents every day in the year. As some have asked if this is really the Original Webster's Unabridged Dictionary, we are able to state we have learned direct from the publishers the fact that this is the very work which has been in the hands of the author's life, and which he so well employed in writing. It contains the entire vocabulary of about 70,000 words, including the correct spelling, derivation and definition of same, and is the regular standard size, containing about 30,000 square inches of printed surface, and is bound in cloth half morocco and sheep.

Until further notice we will furnish this valuable Dictionary—
First—To any new subscriber.
Second—To any renewal subscriber.
Third—To any subscriber now in arrears who pays up and one year in advance, at the following prices, viz:
Full Cloth bound, gold side and back stamps, marbled edges, \$1.00.
Half Moocco, bound, gold side and back stamps, marbled edges, \$1.50.
Full Sheep bound; leather label, marbled edges, \$2.00.
Fifty cents added in all cases for expressage to Heppner.

As the publishers limit the time and number of books they will furnish at the low prices, we advise all who desire to avail themselves of this great opportunity to attend to it at once.

FREE TO THE AFFLICTED.
All who are suffering from the effects of Youthful Errors, Loss of Manhood, Failing Powers, Gonorrhoea, Gleet, Stricture, Syphilis and the many troubles which are the effects of these terrible disorders will receive, FREE OF CHARGE, full directions how to treat and cure themselves at home by writing to the CALIFORNIA MEDICAL AND SURGICAL DISPENSARY, 1229 1/2 Market Street, San Francisco, California. 465-1v.

MAHMOOD, THE IMAGE-BREAKER.

Mahmood once, the image-breaker, speaker of the Faith. Was at Sumnat tempted sorely, as the legend saith. In the great pagoda's center, monstrous and abhorred, Granite on a throne of granite, sat the temple's lord. Mahmood passed a moment, gazed by the silent face That, with eyes of stone unswerving, eyed the ancient place. Then the Brahmins knelt before him, by his doubt made bold, Pledging for their idol's ransom countless gems and gold. Gold was yellow dirt to Mahmood, but of precious use. Since from it the roots of power sprang a potent juice.

"Were you a stone alone in question, this would please me well," Mahmood said, "but, with the block there, I'my truth must sell."
"Wealth and rule slip down with fortune, as her wheel turns round; He who keeps his faith, he only cannot be ill-crowned."
"Little were a change of station, loss of life or crown, But the wreck were past retrieving if the Man fell down."
So his form mace he lifted, smote with might and main, And the idol, on the pavement tumbling, burst in twain.
Lucky eaves the downright striker: from the hollow core, Fifty times the Brahmins' offer deluged all the floor. (James Russell Lowell.)

WORLD'S FAIR NOTES.

The Indian exhibit at the World's Fair will include representatives of every tribe from the extreme north to Terra del Fuego.

A solid gold brick, weighing 500 pounds and worth \$150,000, will be exhibited in the Mines and Mining building at the World's Fair by a Helena, Mont., mine owner.

The chair in which Thomas Jefferson sat while writing the Declaration of Independence is now owned by the Philosophical Society, Philadelphia. It is reported that this interesting relic will be exhibited at the World's Fair.

The high school of San Diego, Calif., will give a grand Fourth of July celebration and devote the proceeds toward making a complete selection of San Diego fish for exhibition at the World's Fair. The specimens will be preserved in alcohol and properly labelled, etc. The exhibit will be a competitive one.

South Burma and the East Indies intend to have a worthy exhibit at the exposition. The chamber of commerce of Kurrachee has appointed Jehangir H. Kohrar, a prominent wealthy merchant of Kurrachee, special commissioner to develop an exhibit for the fair.

The Paper Trade Club, of Chicago, representing nearly all the paper manufacturers of the city, is arranging for an interesting display at the World's Fair. The club expects to put up a complete paper mill on the grounds and show the process of making paper from the pulp to a finished card in the shape of a World's Fair souvenir.

It is probable that a number of genuine Astrakhan sheep, the finest specimens living, will be exhibited at the World's Fair. A dozen of them have recently arrived in this country from Persia, having been purchased there by United States Minister Beale for Secretary Rusk of the department of agriculture, who intends to try the experiment of raising the species in this country. They are to be taken to Southern California, and if they prosper will be taken to the fair next summer.

Mrs. Potter Palmer, President of the board of lady managers, who has recently returned from a European tour, reports that the women of Europe, particularly of Great Britain, France, Germany and Belgium, are deeply interested in the World's Fair, and are working hard to make the woman's branch of it a splendid success. The women's commissions, which have been formed in these countries, include many of the most distinguished and honored women known at court. The outlook is most promising for a great exhibit of women's industrial, educational and charitable work, from both this country and from abroad.

Three World's Fair commissioners from France are now in Chicago, to erect and decorate the building which will be the headquarters of France at the fair, and to complete arrangements for installing the French exhibit. They are Baron de Vialar, M. Rene Dubisson and M. Henri Mott. They say that France will have an exhibit unrivaled by that of any other nation and that will eclipse anything of the kind ever previously undertaken by the French government. They have asked for 200,000 square feet of additional space. The French building is to be one of the finest of foreign structures and decorated most artistically under direction of M. Motte, who is a celebrated painter and decorator.

The World's Fair grounds and buildings, now nearing completion, are so renowned as a most beautiful and interesting spectacle that not only do from 5,000 to 12,000 people a day, at a cost of twenty-five cents apiece, inspect them, but the great majority of travelers who pass through Chicago devote a day or more to the same purpose. Hundreds of distinguished foreigners and thousands of prominent men from the various states of the Union have availed themselves of this privilege, and it is not exaggeration to say that all, without exception, have been most agreeably surprised at the splendor and magnitude of what they witnessed, and have departed very enthusiastic over the bright prospects of the Fair. Several hundred of the returning delegates of the late republican national convention at Minneapolis inspected the wonders of Jackson park while in Chicago. Nearly all of the delegates to the democratic convention at Chicago have done the same. The Exposition authorities have committees to show visitors about and explain details to them.

Those who have been charged with the preparation of the Turkish exhibit are making very extensive preparations to have it of superior merit and interest. They will charter a large ship to transport the exhibit. They will bring over 400 native Turks arrayed in their national costumes. They will reproduce at Chicago a street in Constantinople with all its peculiar crookedness and narrowness and its interesting bazars and restaurants. The bazars will be filled with saleable articles of Turkish manufacture. The expedition to Chicago will start from Constantinople and will call at all Turkish ports for reinforcements and articles to be placed on exhibition. Adrianople and Philippopolis have caught the fever and will do quite as much as the capital to make the Turkish exhibit a success. The exhibit will include a reproduction in miniature of the Mosque of St. Sophia. This has never been reproduced in any Christian country, and for its reproduction at Chicago special permission of the Sultan had to be obtained.

A plan to utilize all the school houses in Chicago as dormitories for teachers visiting the World's Fair is being agitated. Mrs. Solomon Thatcher, Jr., one of the lady managers, advanced the idea, which has been greatly approved. She says there are more than 300,000 school-children in the country, who will probably attend the fair, and that a nominal fee from a reasonable proportion of them would pay the expenses of transforming every school house in Chicago into a lodging house and keep it in perfect order. There are nearly 250 public school buildings, all of them large structures, which could be thus utilized. It is believed that the majority of the teachers of the country will spend a portion of their vacation in viewing the exposition. If they could be provided with lodgings as indicated, at a mere nominal expense, they would surely be greatly accommodated.

A collective exhibit at the World's Fair by the various college fraternities in the United States is well assured. Much interest has been manifested at the one or two meetings thus far held in promotion of the project. Dr. Peabody, chief of the Liberal Arts department of the Exposition, in which the fraternity exhibit will be installed, has commended the idea. Final arrangements for preparing the exhibit by the fraternities will be made, it is announced at a meeting to be held at the Grand Pacific hotel, Chicago, on Thursday, July 7. Every American college fraternity desiring to participate in the proposed exhibit, should send an accredited delegate to the meeting. Lee Fearn, Rand McNally building, Chicago, is chairman of the committee having the matter in charge.

Chief Ives, who is in Europe in the interest of the Fine Arts department of the World's Fair, has written that the French and American artists in Paris are all agog with enthusiasm for the Fair. The American artists are hard at work, and their section of the exhibit will be unexpectedly large and of the highest order. Chief Ives had several conferences with Commissioner Prout, who is the chief of the fine arts department for the French exhibit, and finds the representative men of French art circles active and in earnest to make their display exceptionally fine and surpassing in extent anything formerly accomplished.

Not to belong to a Woman's World's Fair committee is now regarded by titled and aristocratic European women as a positive lack of distinction. Indeed, the interest in the exposition displayed by prominent and influential women in most of the European countries is truly remarkable. The exhibit of woman's work is sure to be very comprehensive, and, it is believed, surprising.

An exhibit of bells will be made at the World's Fair by a large manufacturing concern in this country, and the firm is planning to display it in a reproduction of the Tsar Kokokol (king of bells), the famous broken bell of Moscow, which is 22 feet in diameter and 21 feet, 3 inches high, weighs 443,772 pounds, and is used as a chapel.

The Ohio State Archeological and Historical Society will exhibit at the World's Fair, among many other interesting articles, a collection of specimens of old colonial and state bank money. It has already gathered several hundred specimens. One of the most interesting is a Mormon bill bearing the signature of J. J. Smith, the originator of the Mormon faith.

A schooner is now being fitted out at Halifax to go to the arctic regions to get ten or twelve Esquimo families, fifty or sixty persons in all, for exhibition at the World's Fair. Dogs, fishing implements, tents and everything necessary to show Esquimo life, will also be procured.

Japan has applied for space in the World's Fair Mines and Mining building, for a mineral exhibit. It will include a fine collection of the celebrated Japanese alloys and bronze preparations.

The Woman's Pharmaceutical Association of Illinois is planning to conduct a model pharmacy in the Illinois building at the World's Fair.

A BOY BAROMETER.

An Illinois Youngster's Hair as a Weather- or barometer.
According to a correspondent of the Chicago Inter Ocean there is a remarkable boy living on a farm in Centerville township, near Mascoutah, Ill., or rather a boy with a remarkable head of hair. His name is Tommy Johnson, and he is about fourteen years of age. He is the only son of Frank Johnson, a well-to-do farmer of Centerville township. The boy is healthy and intelligent and a great deal like other boys, with the exception of his wonderful head of hair.

The hair is straight and black as that of an Indian ordinarily, but at the approach of a storm the hair begins to curl, and it curls two or three days before-hand, and it remains in that condition until after the storm is over, when again it becomes perfectly straight. If the storm is of any magnitude the hair will curl up into little balls.

The boy's hair is used as a barometer by the farmers of that section. If a neighboring farmer wants to loan hay to town, harvest wheat or anything else that makes him particularly interested in the weather, he calls at the Johnson home beforehand and looks at Tommy's hair. If the hair is straight, the farmer makes his arrangements to do the work; but if the hair is curled, then the work is postponed until after the approaching storm. The people of the vicinity have seen the warning of rains and storms verified so often that they have implicit faith in Tommy's hair as a barometer. For an ordinary rain the hair curls only a trifle.

A few weeks ago it was discovered that Tommy's hair was linked in hard balls all over his head, and the news spread all over the community in a very short time. The next day a violent storm struck that section, doing considerable damage. After the storm was over the people were greatly relieved, until it was learned that Tommy's hair was curled up more than ever, and then another storm was expected. The second storm was a cyclone. Homes were blown down and several people were badly injured in the neighborhood. After the cyclone Tommy's hair became perfectly straight again, and the people rejoiced thereat.

CONCERNING THE STARS.

The Word "Fixed" Applied to Heavenly Bodies Gives a Wrong Impression.
Astronomers tell us that the term "fixed" applied to the stars is a mistake, for it is now known that there is not a fixed star in the heavens, and probably no such condition as absolute rest in the universe. All the stars are in motion, and some of them are moving at the rate of two hundred and fifty thousand miles an hour, or more; that three the velocity of our earth on its orbit. It might be thought that this constant motion would produce continual changes in the stellar relations and alter the face of the heavens every few years. But the vast distances at which the stars are set from us destroy the visual effect of their motion, and preserve the unchanging aspect of the heavens. None of the constellations have suffered a dislocation in three thousand years. Sirius, Arcturus and the Pleiades are still in their places. Although the eighty-one stars in Orion have ever been in motion, each without relation to any other, the mighty figure in as it appeared to the man of Uz forty centuries ago.

RUNNING A NEWSPAPER.

From an Exchange.
Running a newspaper is a kind of a funny business, isn't it? It seems to be uphill climb to the breadworks and the Lord only knows what comes next. This business stands next to matrimony for constant torment and poverty and vice, frequently in four or five laps ahead of the latter. Nice business, though. They used to tell us when we went to school that "Jordan was a hard road to travel." This must be Mr. Jordan's road, then, for it possesses all the aforesaid qualifications to a marked degree of perfection—regular old tin cornudroy road. It is a great wonder to us how they ever got any road through at all. There is only one thing that an editor can begin to do with any hope to success, and that is to give satisfaction to every one of his hundreds of readers, every time he issues his blunderbus. There never was but one man who could do this to perfection, and he is now with those good Indians you hear so much about—dead. Nice business, though. Next to running a newspaper...

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder
ABSOLUTELY PURE

paper we would like to be a missionary to the Fiji islands. A fellow might run a slight chance of being eaten up by the affectionate inhabitants of that God-forsaken country, but danged if we wouldn't just as soon die with the proud consciousness of tasting good to some benighted heathen as to be literally devoured to death by a lot of civilized barbarians up here in Yankee-land. Nice business, though. Just about the time the sings of hope begin to throb around in the minds of adversity like a Monday wash-day in November, along comes some good Samaritan with a fifty-cent piece, pays up to along about the first of last year. Then we take a fresh grip on hope and thank perhaps times are really brightening up. And the next thing we know our paper house sends a bill of paper to us C. O. D. about \$40 or \$50 and which costs 50 cents and we take to the woods and beg, borrow or steal the other \$49.50. Nice business, though. But there is always some sunshine after all. Nothing could make anyone feel happier or prouder or nobler than to get a season ticket to some wild west show or some exposition to be held in some city so far away from home that you couldn't begin to walk it and back by press day. But then that is only one of the pleasant features of the business. Another pleasant feature is to do \$4 or \$5 worth of work for a church festival and then have to stay away until the oysters or ice cream are eaten up before you can get your pay. Nice business, though. A man gets cursed for what he don't do, and he gets cursed for what he does do, and whether he does or he don't he is bound to get a cursing anyhow, so he might as well pull down his equanimity, put on a bombazine smile and take it like a little man.

FOOD AND DAIRY COMMISSION.

Two Essentials for a Baking Powder That Will Make a Perfect Bread.

The late report of the Minnesota State Food and Dairy Commission contains the result of a series of experiments made by Prof. C. W. Drew, State Chemist, to determine the strength and keeping qualities of the various baking powders.

The report attaches great importance to these experiments. Baking powders that vary in strength, or that readily lose strength before use, are unreliable and will not give even results; besides, it is an indication of the use of improper ingredients in their compounding. The tests showed the strength or leavening power of the Royal very much greater than the others. The uniformity of strength of all the samples of Royal tested, no matter what their age, was remarkable. Its leavening power was practically unimpaired even in the oldest specimens. The difference in the amount of leavening gas in different samples of the other brands was so great as to seriously impair their usefulness in baking. As much as 25 per cent. loss was found in samples a few months old. All the samples of Royal examined by State Chemist Drew were reported of satisfactory strength and quality.

Dr. Drew states that the "Royal" being of greater strength than any other, and possessing better keeping qualities, it is the natural conclusion that it is the best baking powder made.

GIVEN IN FIGURES.

The daily average of passengers carried over the Brooklyn bridge is 106,695.

It is estimated that the coal strata underlying Colorado exceeds 30,000 square miles.

The number of immigrants coming into the United States from 1821 to 1890 was 15,641,558.

The gold produced in Venezuela in 1890 amounted to 2,321 kilos, 535 grammes; value, \$1,049,506.

SEVEN hundred million gallons of mineral oil were exported from the United States during the past fiscal year. Its value was \$31,215,414.

The director of the mint estimates that the United States can rely upon producing at least \$25,000,000 per year in gold for several years to come.

REV. A. W. MASS, the pioneer deaf mute preacher, writes: "The ratio of deaf mutes to the hearing is as 1 to 1,600; so there are over 60,000 in the United States and about 1,000,000 in the world."

A PRELIMINARY report of the secretary of the treasury of the operations of the internal revenue bureau during the fiscal year ended June 30 last, shows that the total collections from all sources were \$146,035,376, an increase of \$2,440,580, as compared with the collections during the preceding fiscal year.

THOMAS BALDWIN, the aeronaut, was poor and thriftless till he took to dropping from balloons in a parachute. Now, after exhibiting his daring in three-quarters of the globe, he is well-to-do and his wife wears fine diamonds and decorations which admirers of her husband's exploits have given her.
