STARTING IN THE SHEEP BUSINESS.

good Advice for Those Going Into Sheep

Try to get from some place west near he Rockies a car or two of young ewes, graded Shrop or Merino, making sure that the skins are clean, for scab is a bad thing to introduce on new ground. Two and three-year-old ewes are best, and if you must take any inferior ones in the lot, cull as fast as you can, sell the culls and not doing the reverse, as is comotimes the case. Culling and keepng the best, selling the rest for what they will bring, is the strongest point of sheep management here.

one advantage possessed by western sheep is that they are very sound inside and do not need so much care at lamb-ing time as big, well bred sheep, and make good nurses afterward. raise one good lamb worth, as a rule, at months old, what was paid for its mother. The fleece at clipping time is worth from sixty cents to one dollar, but if it were not so awfully dirty it would bring more. If you hear of any other sheep nearer home, such as grade Cotswolds, do not be afraid to buy if

left stifle; cartie, same on right hip.

Ginani-French, Land and Live Scale, Co., Forsame on left stifle, Cattle, same on both hipse
same on left stifle. And and Live Scale on the house,
in placed at one end of the bouse. It
should be substantially made and have
a gate, A, at one side. The gate bears a
hook and when not in use is folded back
and fastened to a staple in the wall.

To remove hogs from the pen close the
gate and back the wagon with its rear
end squarely against the end of the
platform. The movable block, E, Fig
2, is then pushed asute and the swinging
door is then easily removed. The hogs
may then, without the least difficulty,
be driven along the passage and directly
is into the wagon with not one-tent the
vexation of loading from an open pen.

James M. Shull in Rural New Yorker.

It is gratifying to know that the muttan market has kept up well this spring,
Supplies were light early in the season.

In sowing grass for pasture, get a
mixture of seeds that will ripen at diffnot contact and have a mixture of seeds that will ripen at diffnot contact and live stifle, and have a mixture of seeds that will ripen at diffnot contact and supplies the platform. The movable block of the
platform of loading from an open pen.

James M. Shull in Rural New Yorker.

It is gratifying to know that the muttan to market has kept up well this spring,
Supplies were light early in the season.

In sowing grass for pasture, get a
mixture of seeds that will ripen at diffnot contact and first the contact of seeds that will ripen at diffnot contact and first plant and live sould be substantially made and have
a mixture of seeds that will ripen at diffnot contact and stifle, cannel on the left shoulder. Banes in from the contact and stifle and the left shoulder and left hip.
